## 1.0 Introduction

The Drinking Water State Revolving Fund (DWSRF) was created in 1996 as a result of New York State's enactment of Chapter 413 of the Laws of 1996 (Clean Water/Clean Air Bond Act, "Bond Act") and passage of the 1996 Amendments to the Safe Drinking Water Act (Public Law 104-182) by the U.S. Congress. The DWSRF provides a financial incentive for municipally and privately owned public water systems to undertake needed drinking water infrastructure improvements (e.g., treatment plants, distribution mains, storage facilities). This program provides market rate and below market rate financing for the construction of certain eligible public water system projects for the protection of public health. As financings are repaid, money is made available for new financings making it a true revolving fund. For qualifying communities with demonstrated financial hardship, interest rates can be reduced to zero percent and grants may be provided. The DWSRF program is administered jointly by the New York State Department of Health (DOH) and the New York State Environmental Facilities Corporation (EFC).

Since its inception in 1996, New York's DWSRF has received $1.45 billion including $1.19 billion in federal funds through US Environmental Protection Agency (US EPA) Capitalization Grants and $265 million in state funds from the Clean Water/Clean Air Bond Act. The program has executed $5.24 billion in financings to assist public water systems throughout the state including the provision of $337 million in grant funds to disadvantaged communities. This tremendous level of success has been achieved through the leveraging of program funds, the recycling of repayments and interest earnings, and the efficient management of the program. These financings and grants have assisted 395 public water systems in protecting public health by making 702 public drinking water system infrastructure projects more affordable for residents throughout New York State.

In this federal fiscal year (FFY) 2017 funding cycle, the state expects to receive an estimated federal Capitalization Grant of $45 million to capitalize the DWSRF and the state is required to provide a 20% match of the federal Capitalization Grant. The $265 million in state dollars that were committed during the early years (1998-2003) of the program from the Clean Water/Clean Air Bond Act are considered as "banked" or overmatch funds and are credited towards meeting that federally mandated state match.

The Safe Drinking Water Act requires the State to prepare a plan identifying the intended uses of the funds in the DWSRF and describing how those uses support the goals of the DWSRF. To meet that requirement, the State prepares an Intended Use Plan (IUP) annually, providing for public review and comment, before submitting it to the US EPA. The US EPA must receive the IUP before it awards the Capitalization Grant to the State's DWSRF under the Safe Drinking Water Act.

## 2.0 Program Changes and Initiatives FFY 2017

- There are no program changes or new program initiatives anticipated for FFY 2017.

### Program Changes Adopted in Prior FFYs

- The items that appeared under this heading in the Draft IUP have been incorporated into the appropriate sections of this document. Program changes adopted in prior FFYs will no longer be tracked in future IUPs, but they will be incorporated into the appropriate IUP sections in the following year. This formatting revision does not provide for any programmatic changes nor does it impact any project listed on the IUP.

**Ongoing Initiatives:**

1. **Expanding the Number of Projects Eligible for Subsidized Interest Rate Funding:**
   Based on the success of a similar change made to the Clean Water State Revolving Fund (CWSRF), DOH and EFC initiated a pilot program in FFY 2015 to expand the number of projects that are eligible to apply for subsidized interest rate financing through the DWSRF. This initiative will continue for FFY 2017.

   To implement this initiative, the annual list has an expanded (lowered) subsidized interest rate funding line as well as a hardship evaluation eligibility line. The expanded subsidized interest rate funding line is set at an increased amount of the actual total resources available and will make more projects eligible to apply for subsidized interest rate financing. The use of an increased amount of the total available resources is supported by program equity including repayments, interest earnings, carryover funds, fund drawdown rates and the historical fact that all listed eligible projects do not formally apply for financing. For this IUP funding cycle, two times the total available resources will be used to set the subsidized interest rate funding line.

   With this expanding of the subsidized interest rate funding line, it is **no longer be used to determine the eligibility to be evaluated or apply for hardship**. To be eligible to be evaluated or apply for hardship financing, projects must have a public health priority ranking score equal or greater than **the score where the hardship application eligibility line is drawn**. The public health priority ranking score used for hardship application eligibility will continue to be the "raw score" or that score which is exclusive of short term financing and/or phased bonus points. The hardship application eligibility line is drawn at the project where the cumulative amount of projects' costs equals the total resources available. This is where the subsidized interest rate funding line would have historically been drawn if it had not been expanded with this initiative. Therefore, there is no change to the method used for determining the eligibility to be evaluated or apply for hardship financing.

   Prior to this initiative of expanding the subsidized interest rate funding line, systems with acute health risk violations such as coliform contamination were already likely to rank high enough to be eligible for subsidized interest rate financing whereas those with chronic health risk violations such as organic contamination may not have been eligible. This change will make interest rate subsidy available for more projects with chronic health risks while continuing to assist those systems with projects that address acute public health risks. This change will also provide a more affordable funding alternative to many compliant public water systems that require drinking water infrastructure improvements to assist them in remaining compliant and thereby continue to protect public health.

   In anticipation of the increased application rate due to this initiative, a firm deadline has been set as the cut-off date for the receipt non-hardship financing applications. In addition, subsidized interest rate financing applications must meet a minimum threshold to be accepted for processing and that minimum threshold is discussed below under the initiative entitled "Application Threshold".

2. **Application Threshold:**
   In anticipation of the potential for an increased application rate due to the expanding of the subsidized interest rate funding line and to more efficiently utilize program resources, the DOH and EFC have initiated a requirement setting a minimum threshold for financing applications in order to be considered for processing. This application threshold applies

to all non-hardship financing applications. This threshold may also be phased in over time for all confirmed hardship projects.

The minimum threshold for DOH and EFC to accept non-hardship funding applications for processing includes:

- A water district has been established or expanded, or the maximum amount to be expended for such district is increased, and if needed, the Office of the State Comptroller (OSC) approval is obtained. This may only be applicable to towns and counties as cities and villages are not required to form water districts within their boundaries.
- A bond resolution has been adopted establishing the legal authority of municipal applicants to issue debt for the project, and to incur the expense for all project costs. Issuance of debt for the project should be authorized by non-municipal applicants as well,
- State Environmental Quality Act (SEQRA) work must be completed including a State Historic Preservation Office (SHPO) signoff;
- Must have a DOH endorsable Engineer's Report submitted by December 31, 2016;
- If not already provided, a completed copy of the Smart Growth Assessment Checklist must be submitted (see Attachment IV); and
- An executed engineering agreement for planning services, if those services are expected to be financed with the project. An application for financing may be considered complete without an executed engineering agreement for planning services, however, those costs will not be considered eligible for financing.

3. **Climate Change Initiative:**
When ranking projects by public health priority, as applicable, the DOH will take into consideration projects' attributes for physical climate risk mitigation due to sea level rise, storm surges, flooding or any combination thereof. If appropriate, public health priority ranking points may be awarded under the categories of C-2 (10 points), C-4 (5 points), D-4 (10 points) and D-6 (5 points) for projects that provide climate risk mitigation. The awarding points for this purpose may be in any combination and is dependent on the availability of data or the provision of a hazard risk analysis by projects' sponsors demonstrating mitigation against future extreme weather events. Other documentation as provided by projects' sponsors demonstrating that the project is protective of future climate impacts may also be acceptable to be awarded points under the aforementioned point categories.

4. **Asset Management:** The DOH and the EFC encourage communities that apply for financing in this and future IUP periods to prepare and submit an asset management plan to accompany the engineering report and/or plans and specifications for their project. An asset management plan would support communities by encouraging the building of sustainable infrastructure. The DOH reserves the right to require an asset management plan for any project that has shown deficiencies with respect to managerial, technical, and financial capacity. In support of the DWSRF's federal capacity development requirements, if otherwise DWSRF eligible, asset management plan costs are reimbursable as a part of any DWSRF financed project.

5. **Energy Efficiency:** New York State encourages the efficient use of energy in all drinking water projects. Therefore, the DOH and the EFC are recommending, if applicable, that engineering reports and/or plans and specifications submitted to the DOH identify project components that incorporate energy efficiency, water efficiency, and/or other environmentally innovative activity.

6. **Interconnections:** Under provisions of the 1996 Amendments to the Federal Safe Drinking Water Act, DOH is required to ensure that all systems receiving DWSRF assistance have adequate managerial, technical, and financial capabilities to provide safe drinking water. The failure to meet this requirement could result in a significant reduction of the DWSRF federal Capitalization Grant awarded to the state for the program. Therefore, systems that lack adequate managerial, technical, and financial capacity may be determined as ineligible by DOH to receive DWSRF assistance unless the project to be financed corrects the managerial, technical, and financial deficiencies.

   DOH will continue to promote the regionalization and interconnections for public water systems in an effort to enhance managerial, technical, and financial capacity for those systems. Therefore, when the possibility to interconnect to another public water system exists for a project seeking assistance, and if that interconnection will address the scope of the project with respect to its priority health ranking, the interconnection must be a carefully considered alternative as a part of the State Environmental Quality Review Act process and also be discussed in detail in the engineering report. If the system applying for DWSRF assistance decides not to pursue a possible interconnection alternative when it exists and would address the scope of the project with respect to its priority health ranking, then detailed justification satisfactory to DOH must be provided demonstrating that the interconnection is a technically, financially, or managerially disadvantageous option. See Section 8 of this IUP for additional information regarding capacity requirements.

7. **New York Water Infrastructure Improvement Act (NYS Water Grants):**
   $400 million is anticipated to be appropriated over three state fiscal years to fund both drinking water and waste water infrastructure projects as follows:
   - For round 1- $50 million was appropriated in the (2015-2016) State Fiscal Year (SFY) with $20 million being awarded for drinking water projects.
   - For round 2- $175 million was appropriated in SFY 2016-2017 with $87.5 million awarded for drinking water projects.
   - For round 3- $175 million is expected to be appropriated in SFY 2017-2018 with the amount to be allocated for drinking water projects yet to be determined. The schedule for the third round has not yet been determined as of the finalization of this IUP.

   DOH & EFC are administering the NYS Water Grant funds for drinking water infrastructure projects.

   The NYS Water Grants funds will be provided as grants for drinking water infrastructure rehabilitation or replacement projects and the grants will be limited to $3 million or 60% of the total project cost, whichever is less. Preference is given to projects that will address the reduction to serious public health risks. Projects will be ranked based on public health priority in accordance with the existing DWSRF public health priority ranking criteria and a minimum of 75% of the total drinking water funds will be reserved for hardship communities.

   Although these funds are not considered DWSRF funds, all NYS Water Grant potential projects will be listed in the DWSRF IUP so that applicants may have the option of utilizing DWSRF funds for the non- NYS Water Grant funded portions of their projects. Projects seeking NYS Water Grant funds will not be required to take a DWSRF financing if the applicant can demonstrate that they can obtain comparable financing to DWSRF financing for the non- NYS Water Grant funded portions of the projects. Any associated DWSRF funding provided for NYS Water Grant drinking water projects will be in accordance with the terms and conditions of the DWSRF program. Additional information regarding these funds is available at www.efc.ny.gov/NYSwatergrants .

## 3.0 Short and Long-Term Goals

The Safe Drinking Water Act (SDWA) Amendments of 1996 authorize a DWSRF to assist public water systems with financing the costs of infrastructure needed to achieve or maintain compliance with SDWA requirements and to protect public health. The DWSRF program will help ensure that New York State's drinking water supplies remain safe and affordable, and that drinking water systems that receive funding will be properly operated and maintained.

### 3.1 Short-Term Goals

- Continue to implement the DWSRF program for the State of New York.
- Receive project Listing Forms, score and rank projects based on human health risk and compliance with the SDWA.
- Make available short-term financing to help accelerate project development.
- Make available long-term financing for projects in priority order, taking into account project affordability.
- Make available financing and/or financial assistance payments (grants) to help small public water systems and disadvantaged communities finance needed projects.
- Make available emergency financing to allow for emergency repairs when no other funding source is available to the eligible public water system.

### 3.2 Long-Term Goals

- Help public water supplies achieve and maintain compliance with federal and state drinking water standards and enforceable requirements of the SDWA and the New York State Sanitary Code.
- Protect and enhance New York's public drinking water supplies using the financial incentives provided by the DWSRF and the programs that the DWSRF supports.
- Administer the DWSRF in a fiscally responsible manner that will ensure its revolving nature in perpetuity.
- Assist public water supplies to improve drinking water quality, quantity and dependability by providing reduced interest rate long-term financing and/or Additional Financing Subsidies (Grants).
- To support the national reduction of federal DWSRF unliquidated obligations, New York State will work to reduce the amount of year to year carry-over funds by expanding the number of projects eligible for subsidized interest rate financing as detailed in Section 2 of this IUP.

## 4.0 Financial Status

### 4.1 Total DWSRF Monies

Capitalization for the New York DWSRF program during this IUP funding period will be provided from the FFY 2017 federal Capitalization Grant and unobligated funds carried forward from the previous FFY IUP (October 1, 2015- September 30, 2016). New York State has not yet

received a FFY 2017 DWSRF Capitalization Grant and the IUP may be amended at a future date to reflect a different amount depending on the finalization of the federal budget. The minimum state match requirement is 20% of each federal award. The match is made from Bond Act funds that were provided in excess of the 20% minimum amount required under the federal SDWA that have been credited (banked) against future state match requirements. The 100% state match requirement for the state program management set-aside will be met with in-kind services. The proposed sources and uses of the DWSRF for this IUP funding cycle are presented in Table 1 below. After leveraging, the total available DWSRF funding capacity to finance drinking water projects is estimated at $354,116,875 for this IUP period. Since all eligible projects do not apply for financing, a factor of two is being used to set the subsidized interest rate funding line thereby placing the subsidized interest rate funding line at a cumulative project cost of $708,233,750.

**Table 1**
**Proposed Sources and Uses**

| **Sources** | **Amount** |
|---|---|
| FFY 2017 Capitalization Grant [1] | $45,000,000 |
| Carry-over monies from FFY 2016 | $47,000,000 |
| Anticipated Repayments and Interest Earnings | $174,000,000 |
| **Total Sources** | **$266,000,000** |
| **Uses** | **Amount** |
| Administrative Set-Aside | $1,800,000 |
| Technical Assistance Set-Aside | $900,000 |
| State Program Management Set-Aside | $4,500,000 |
| **Total Set-Asides [2]** | **$7,200,000** |
| State Match for the DRAA SMLP program [3] | $2,094,375 |
| Direct Financings | $175,000,000 |
| Grants Expected to Close | $12,000,000 |
| Grant Funds Reserved | $8,000,000 |
| New Grant Funds Available for Award [1] | $9,000,000 |
| Reserve Allocation for Leveraged Financing [4] | $52,705,625 |
| **Total Uses** | **$266,000,000** |

**1** These amounts are based on an estimation the national DWSRF federal allocation for federal FFY 2017. However, the DWSRF federal allocation has not yet been appropriated and these are subject to change depending on the federal budget.
**2** Refer to Section 6.0 for a descriptions and details of set-asides.
**3** The NYSDOH received a supplemental DWSRF federal Capitalization Grant of $56,572,914 from the Disaster Relief Appropriations Act (DRAA) of 2013 to finance drinking water infrastructure projects that provide for resiliency and mitigation against future climatic events. The state is required to provide a 20% state match of the Capitalization Grant and the listed funds are the remaining state match funds required for the SMLP projects that have not yet closed on their financings.
**4** Leveraged three times, these funds will provide financing of $158,116,875 worth of eligible projects. This combined with Direct Financings, Grants Expected to Close, and New Grant Funds Available for Award results in the **funding capacity** for this IUP period being approximately **$354,116,875.** A factor of two is being used to set the expanded subsidized interest rate funding line thereby placing the line at the cumulative project cost of **$708,233,750.**

### 4.2 Fees

Up to 4% of the total amount of federal Capitalization Grants (as provided by Section 1452(g)(2) of the SDWA) can be set-aside to support the cost of administering the DWSRF program. Costs of DWSRF program administration not covered by the 4% administrative set-aside must be paid from fees charged to DWSRF recipients. A program administration fee of 1.1% of the project costs plus an annual fee of 0.11% of the outstanding principal balance of the financing will be assessed to support the administration of the DWSRF program. The 1.1% program administration fee may be included as part of the financing. For non-hardship projects that receive short-term financing, an administrative fee equal to 0.6% will be charged and may be included as part of the short-term financing. A description of the fees is presented in Attachment III. Fees collected by the DWSRF are held in an account outside of the DWSRF.

For the state fiscal year 2015-2016, the DWSRF collected approximately $1,271,774 in program administration fees. It is anticipated that in state fiscal year 2016-2017 a similar amount of fees will be recognized and collected.

### 4.3 Transfer of Funds

The SDWA Amendments of 1996 offered states the flexibility to meet the funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other (Section 302 of Public Law 104-182). An amount equal to up to 33 percent of the DWSRF Capitalization Grant could be transferred from the DWSRF to the CWSRF program, or an equivalent amount from the CWSRF to the DWSRF program. While the authority expired on September 30, 2001, Congress has extended this provision within US EPA's annual budgets. Pending Congressional approval of an extension within US EPA's proposed budget for this funding cycle, transfers between the CWSRF and the DWSRF programs during current and future IUP periods may be made. Any funds transferred during this IUP period will be returned using program funds within this IUP period. Therefore, there will be no effect on the funding line of either the DWSRF program or the CWSRF program.

### 4.4 Eligible Systems and Types of Projects to be Funded

Drinking water systems that are eligible for project funding are community water systems, both public and privately owned, and non-profit, non-community water systems (when funding is provided, a "recipient").

"Drinking water infrastructure project" or "water supply project" means the planning, design, construction, improvement, or acquisition of facilities, equipment, sites, or buildings for the supply, control, treatment, distribution, and transport of drinking water and the testing and monitoring to ensure the integrity and quality of such water intended to improve drinking water facilities including achievement of compliance with the federal SDWA or other applicable federal law and state drinking water quality goals and standards.

Projects eligible for DWSRF financing include investments to upgrade or replace infrastructure, address noncompliance with federal or state health standards, prevent future violations of such standards, and provide the public with safe drinking water. Examples of such projects include but are not limited to:

- rehabilitation or development of new drinking water sources to replace contaminated supplies;
- installation or upgrading of facilities if the project will improve the quality of drinking water to comply with primary or secondary standards or treatment/performance criteria;
- installation or upgrading of storage facilities, including finished water reservoirs, to prevent microbiological contamination or to provide adequate delivery pressures;
- installation or replacement of transmission and distribution mains to prevent contamination caused by leaks or breaks;
- funding and/or construction to promote the consolidation of water supply services, particularly in circumstances where individual homes or water systems generally have an inadequate quantity of water, the water supply is contaminated, or the system is unable to maintain adequate compliance for financial or managerial reasons;

- the purchase of a portion of another system's capacity, if the purchase is part of a consolidation plan to bring the system(s) into compliance;

- capital investments made to improve the security of drinking water systems; and

- in accordance with the SDWA, any of the above listed project types which are publicly owned and which were previously financed subsequent to July 1, 1993, may be eligible for refinancing provided that they comply with DWSRF requirements. Planning, design and other pre-construction costs incurred prior to July 1, 1993, may be allowed if clearly documented and related to an otherwise eligible project.

Ineligible projects include projects submitted by systems that lack technical, managerial or financial capacity or are classified as priority systems based on US EPA's Enforcement Targeting Tool (ETT) are not eligible for funding unless the proposed project will ensure capacity or compliance. Also, projects whose primary purpose is fire protection, growth/development, dams, reservoirs, or acquisition of land not integral to an eligible project are not eligible.

The US EPA issued a notice in the Federal Register (63FR 59299, November 3, 1998) which allows States to provide DWSRF assistance to projects that solve public health problems for residents currently served by contaminated private water sources. This policy allows for the creation of a community water system (publicly or privately owned) to address an existing public health problem caused by unsafe drinking water provided by individual wells or surface water sources. This policy also extends to a situation where a new regional public water system is created by consolidating several existing public water systems that have technical, financial or managerial difficulties. Under this policy, a proposed project may only receive DWSRF assistance if the following conditions are met:

- upon completion of the project, the entity responsible for the DWSRF financing meets the federal definition of a community public water system;

- the project is on the Project Annual List and addresses an actual public health problem with serious risks;

- the project is limited in scope to the specific geographic area affected by contamination;

- the project is only sized to accommodate a reasonable amount of growth expected over the life of the facility (growth cannot be a substantial portion of the project);

- the applicant demonstrates that sufficient public notice to potentially affected parties was provided and alternative solutions to addressing the problem were considered; and

- the project is a cost-effective solution to solving the public health problem.

### 4.5 Financial Planning Process

Projects submitted for financing will be screened for eligibility, scored, ranked and listed. Projects can be submitted to the DOH for listing at any time. All eligible projects for which Listing Forms were submitted on or before September 2, 2016 are included in the final IUP. Eligible projects for which Listing Forms were submitted after September 2, 2016 will be included in the next IUP (October 1, 2017 – September 30, 2018). Projects for which an engineering report or plans and specifications were submitted to the DOH or which completed construction and submitted a listing form by September 2, 2016 are listed on the Project Annual List. Under the anticipated financing schedule, leveraged financing funded from bond issuance

will be determined as needed and direct long-term and short-term financings will be originated throughout the year.

### 4.6 Types of Assistance and Terms

The DWSRF program will offer the following types of financial assistance:

1. **Short-Term Financing Program (STFP)** – Short-term financing will be offered interest free and at market rate for terms of up to three (3) years. Before any short-term financing is provided, an applicant must, among other conditions, receive approval of an engineering report for the project, complete the State Environmental Review Process (SERP), be evaluated for compliance with the Smart Growth Act, obtain approval from the Office of the State Comptroller for any necessary district formation, and adopt a bond resolution for the project.

   - **Short-Term Interest Free Financing (STIFF)** - The STIFF program provides short-term financing to recipients that are developing projects eligible for long-term DWSRF financing. STIFF is available for projects that are eligible to be funded from the current Project Annual List and have not completed construction. The amount available is limited to one-third of the estimated total project costs as set forth on the Project Annual List. Recipients that qualify for hardship assistance are not subject to the one-third project cost limitation. STIFF is not available to pre-finance any *awarded grants*.

   - **Short-Term Market Rate Financing (SMRF)** – For projects with scores too low to be eligible for long-term DWSRF financing or projects eligible for STIFF but with financing needs in excess of the one-third project cost limitation referenced above, short-term financing may be made available at EFC's short-term cost of funds (market rate). SMRF may be used to pre-finance third party grants. EFC and DOH encourage applicants to inquire about SMRF availability as we believe this financial assistance is generally less expensive and more convenient than traditional bond anticipation note financing.

For FFY 2017, EFC and DOH project $75 million to be available for DWSRF SMRF. Upon reaching this threshold amount of SMRF transactions, DOH and EFC will, if prudent, revise the threshold. In the event EFC determines to raise the threshold, applicants may experience delays in SMRF funding. DOH and EFC intend to make SMRF available to as many applicants as possible. However, DOH and EFC have determined that additional considerations may need to be given to the process of SMRF allocation. Therefore, depending on the number of applications received and the total dollar amounts associated with them, the following priorities which are in order of public health benefit may be applied, if necessary, to DWSRF SMRF availability:

- Projects on the Annual List with scores above the subsidy funding line requiring short-term financing in excess of the amount available under the Short Term Interest Free Financing (STIFF) Program. This can include financings beyond the STIFF for Annual List projects and pre-financing of third-party grants.

- Projects on the Annual List that require “interim” financing prior to the next scheduled pooled financing. These financings typically occur for projects with STIFF that matured prior to the leveraged financing pool or projects that require additional funds prior to the leveraged financing pool.

- Projects on the Annual List below the Subsidy Line and not reachable for subsidy via bypass between the Subsidy Line down through 45 points. DOH and EFC, may elect not to process applications for SMRF for projects with priority health ranking scores of 40 points or lower.

2. **Leveraged Financing** - Leveraged Financings are DWSRF financings funded from bond proceeds. Certain bond series issued to fund DWSRF financing will be secured by federal and state match dollars deposited to and held in program financing indentures. Leveraged Financings will be at market rate or receive an interest subsidy either from earnings received from a dedicated reserve allocation equal to one-third of the financing amount or from other program assets. Certain hardship communities may receive an interest subsidy of more than one-third of the financing amount. Other program assets or investment earnings from the reserve allocation will provide a 33 1/3% interest subsidy, based on the market rate of the related EFC bonds, to certain recipients, thereby resulting in a subsidized interest rate on the financing. In instances where the project qualifies for a hardship financing, the interest subsidy may reduce the net interest rate to zero percent. The performance of investments held in the financing indenture or the general accounts of the program will not impact the net interest rate on leveraged recipient financings.

3. **Regular Reduced Rate Direct Financing** - Regular Reduced Rate Direct Financing will be made available to recipients not eligible for Leveraged Financing. Direct Financing recipients are determined by EFC and may include non-investment grade borrowers or small financing requests.

4. **Hardship Financing** – Direct or Hardship Financing will be made available to qualified recipients at rates below the regular reduced interest rate. Certain hardship eligible recipients may receive leveraged financing. If qualified, Hardship Financing may also be issued for 30 years. A description of the DWSRF Disadvantaged Community Program is provided in Section 7.0.

5. **Additional Financial Assistance (Grants)** – Grants, also called additional subsidy, may be made available to eligible qualified recipients. A description of the DWSRF Disadvantaged Community Program is provided in Section 7.0.

6. **Emergency Financing** - The emergency financing program allows for the expedited financing to eligible public water systems for emergency situations as defined in Attachment I of this IUP. This funding is only available to public water systems for projects when no other funding source is available to the system. The determination of when an emergency exists would be made by the DOH. Imminent threats to public health would include situations that result in the unavailability of a source of potable water at a public water system for an extended period of time. Projects that are designed to address such emergency situations will receive the highest priority ranking and will be added to the Project Annual List. These projects would receive the first priority for any funds that are by-passed in accordance with by-pass procedures authorized in Section 10.2 of this IUP.

7. **SRF Bond Market Rate Program** - The SRF Bond Market Rate Program provides eligible financing recipients with project scores below the subsidy funding line on the Project Annual List access to the public market at preferred market rates. Projects funded with market rate obligations will be retained on the Project Annual List of the IUP for 5 years. For projects with scores that rise above the subsidy funding line during that 5 year period (including through by-pass), subsidy assistance will become available at the then target rate for the remaining term of the recipient financing.

8. **SRF Bond Guarantee Program** - The SRF will provide a bond guarantee for bonds issued by eligible recipients. The Bond Guarantee Program is available to support eligible projects

for which DWSRF subsidized financing is not available. Bonds issued by recipients and guaranteed by the DWSRF may be issued for terms of up to thirty years.

9. **Green Bond Designation** - EFC issued State Revolving Funds Revenue Bonds, Series 2014B with the Green Bonds designation, facilitating investors' identification of environmentally beneficial projects. Project descriptions and status were reported in conjunction with this initiative.

   EFC may choose to offer State Revolving Funds Revenue Bonds in the future with the Green Bonds designation. Recipients with projects funded with Green Bonds proceeds may be required to provide periodic updates related to the status of project completion.

### 4.7 Program Financial Terms

1. **Short-Term Financing** - Communities will borrow through the STFP by issuing municipal Bond Anticipation Notes ("BANs") to the EFC. The EFC will provide funding in the amount of the BANS on an interest-free or EFC market rate basis. Upon maturity, the BANs may be retired with long term DWSRF financing, the issuance of long term debt obligations by the community, or other funding. Applicants other than municipalities will borrow through the STFP by issuing a promissory note to EFC secured by a letter of credit if not PSC regulated. Only DWSRF market rate short-term funds will be available to pre-finance any awarded grants.

2. **Leveraged Financing** - The financing terms, including the payment of principal and interest, are based on the terms of the EFC's bonds, proceeds of which fund the Leveraged Financing. Principal amortization will be required to commence the earlier of a) within one year of the project completion or b) no later than two years after closing the financing (consistent with New York State Local Finance Law). Principal amortization cannot exceed 30 years from the project completion date or the Period of Probable Usefulness, whichever is sooner. The interest subsidy is provided either from other program assets or interest earnings on the investment of the reserve allocation. Reserve investments will be limited to U.S. Treasury securities, U.S. Government guaranteed securities, securities of Government Service Enterprises (GSE) such as the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation, GSE guaranteed securities, investment agreements collateralized by U.S. Treasury securities, U.S. Government guaranteed securities, GSE securities, and GSE guaranteed securities and entered into with banks, broker dealers or insurance companies rated in one of the two highest rating categories by each nationally recognized rating service that rates their obligations, and state obligations, state guaranteed securities or other qualified obligations rated in one of the two highest rating categories by each nationally recognized rating service that rates the bonds. The Effective Market Rate for leveraged financing made from New York's DWSRF in 2015B financing is **3.79%**. The Effective Interest Cost (EIC) for recipient financings based on this transaction is approximately **2.53%** (1/3 subsidy). These rates are subject to change.

3. **Regular Reduced Rate Direct Financing** – Terms governing principal amortization are the same as those applicable to Leveraged Financing. Interest payable on the financing will be set at two-thirds of the interest rate, as determined by the most recent issuance of DWSRF bonds issued to provide financing to eligible recipients.

4. **Hardship Financing** - For eligible projects the terms governing principal amortization shall be as long as 30 years from the project completion date or the Period of Probable Usefulness, whichever is sooner. Any interest payable on Hardship Financing will be set at less than two-thirds of the interest rate, as determined by the most recent DWSRF financing; rates may be as low as zero. To be considered for hardship financing, eligible projects must have a total numerical score greater than (or equal to) that of the project with the lowest

score (excluding bonus points) from the Project Annual List where the Hardship Application Eligibility Line is drawn.

5. **Additional Financial Assistance (Grants)** - Grants will be provided to qualified recipients based on the Hardship Criteria as outlined in Section 7. If determined to be eligible, projects will be ranked according to project priority ranking system score. Projects with the highest scores will receive confirmation letters for hardship assistance until the available funding is fully committed. To be considered for hardship grants, eligible projects must have a total numerical score greater than (or equal to) that of the project with the lowest score (excluding bonus points) from the Project Annual List where the Hardship Application Eligibility Line is drawn.

6. **Emergency Financing** - Emergency financing would initially be issued as regular reduced rate direct financing. Interest payable on the financing would be set at two-thirds of the interest rate, as determined by the most recent issuance of DWSRF bonds for eligible recipient projects. However, before an emergency financing can be issued, the recipient must demonstrate credit worthiness and fiscal viability in accordance with EFC criteria. Privately owned water systems regulated by the Public Service Commission would be permitted to apply for funding only if the Public Service Commission has issued an order allowing the water system to surcharge its customers to repay the financing.

7. **SRF Bond Market Rate Program** - Bonds issued by eligible recipients and guaranteed by the EFC will be purchased by the EFC from proceeds of DWSRF bonds publicly issued by the EFC to investors. All avenues of recourse currently available to the EFC will apply with respect to recipient bonds guaranteed by the EFC, including its statutory right to intercept any state aid annually appropriated by the state to the recipient.

8. **SRF Bond Guarantee Program** - The SRF will provide a bond guarantee for bonds issued by eligible recipients. The Bond Guarantee Program is available to support eligible projects for which DWSRF subsidized financing is not available. Bonds issued by recipients and guaranteed by the DWSRF may be issued for terms of up to thirty years.

### 4.8 Fund Management and Long-Term Effects of Funding Decisions – Leveraging

A significant need exists for financial assistance for eligible drinking water projects in New York State. The US EPA's *Drinking Water Infrastructure Needs Survey and Assessment – Fourth Report to Congress* dated April 2013 estimated that more than $22 billion will be needed in New York State over the next twenty years to ensure continued delivery of safe public drinking water. Listing Forms received by the DOH indicate an aggregate need of approximately $7.69 billion over the next several years based on the multi-year list. Anticipated project financing needs for this IUP, ending September 30, 2017, is about $4.19 billion based on projects on the Annual List. Given these needs, New York State plans to continue to leverage the available DWSRF capital by a factor of three to one. Table 1 details the proposed sources and uses for FFY 2017 including the leveraging of funds exclusive of the direct financings, grants and set- asides.

All DWSRF financings are made in a fiscally responsible manner that will ensure the revolving nature of the program in perpetuity. In addition, the fiscal aspects of the program are regularly evaluated to ensure optimum use of DWSRF resources. Further, the long-term effect of leveraging the DWSRF three to one will be to extend the reach of financial assistance benefits to more New York State public water systems than could be served if leveraging were set at a lower level.

## 5.0 Amending the IUP

This IUP may be amended during the funding cycle to reflect both programmatic and/or project specific changes. Draft amendment notices will be published in the New York State Department of Environmental Conservation (DEC) Environmental Notice Bulletin (ENB). At the end of the comment period, responses to any significant comments will be made available and the final amendment notice will be published in the ENB and at www.efc.ny.gov/dwiup.

## 6.0 Set-Aside Activities

Section 1452 of the SDWA authorizes states to use a portion of the federal Capitalization Grant (set-asides) to support various drinking water programs. Section 1452 allows up to 31% of a state's federal Capitalization Grant to be used for administrative activities, technical assistance activities, state program management activities, and special activities. New York State proposes to use 16% FFY 2017 Capitalization Grant for set-aside purposes. Table 2, presented at the end of this section, specifies intended set-aside allocations. The State intends to maximize the use of Capitalization Grant monies for water system infrastructure projects. Therefore, only those funds considered essential for DWSRF and water supply program support have been allocated to set-aside activities. Also, any unused set-aside monies can be transferred to the project fund after receiving an approved amendment to the Capitalization Grant. The intended use of funds and expected accomplishments for each set-aside are described below.

Descriptions of how the FFY 2017 set-aside monies will be budgeted will be included in the federal Capitalization Grant Application Set-Aside Work Plans:

### 6.1 Administrative

The SDWA authorizes states to use up to 4% of the total annual federal Capitalization Grant (as provided in Section 130 of the SDWA Amendments of 1996) to support the cost of administering the DWSRF program. The State plans to use 4% of the total annual federal Capitalization Grant for administrative activities.

Administrative tasks include, but are not limited to: developing and finalizing the Capitalization Grant application package to secure federal funds; implementing the Operating Agreement (OA) between the DOH and the US EPA; performing technical project reviews and ranking project proposals in priority order; preparing an IUP which identifies available funding resources and expenditures and establishes current year and multi-year project priority lists; implementing a State Environmental Review Process; reviewing and approving engineering reports, construction plans and specifications; conducting project inspections; evaluating and determining specific project affordability (hardship); conducting public participation efforts; conducting database management activities; establishing DWSRF accounts; directing the investment of DWSRF funds; preparing project financing agreements (including cost summaries and project financing schedules); preparing necessary financial documents; issuing Corporation Bonds and originating financing; establishing annual reserve allocations; establishing disbursement schedules; processing disbursement requests and conducting associated document reviews; collecting and managing repayments; establishing and collecting DWSRF fees; insuring program and fiscal audits are conducted; and preparing technical and financial reports to meet federal and state mandates.

### 6.2 Technical Assistance

Section 1452(g)(2)(D) of the SDWA authorizes states to use up to 2% of the total annual federal Capitalization Grant to provide technical assistance to small water systems (those with populations of 10,000 or fewer). This technical assistance may include assistance to potential

DWSRF applicants complying with federal and state drinking water regulations. The State plans to use 2% of the total annual federal Capitalization Grant to continue to fund the enhancement of the State's existing Small Water Systems and Comprehensive Performance Evaluation Programs and provide for direct technical assistance to small water systems.

### 6.2.1 Small Water Systems

The DOH implements the Small Water Systems program aimed at providing direct technical assistance to small communities experiencing operational, emergency, or compliance problems.

Since its inception, the DOH's Small Water Systems Technical Assistance Program has helped numerous communities improve their drinking water systems while saving money using self-help techniques. The purpose of this program is to offer technical assistance to address the needs of small community water systems. The DOH, often working with and through, its partners at the NYS Environmental Facilities Corporation, the NY Rural Water Association, the Rural Community Assistance Program, and other associations, provides guidance to communities in considering project alternatives, calculating alternative project costs, preparing budgets for selected projects and reviewing existing operation and maintenance practices. Additionally, the Program has assisted communities to develop criteria for consultant selection, determine project priorities, select the most sensible project, use inexpensive but qualified labor and materials, use volunteers or municipal forces, and avoid duplication of services. This assistance is useful to the small water systems in helping them improve their overall capacity.

During FFY 2017 the DOH Small Water System Program proposes to:

- provide direct technical assistance to small community water systems via routine consultation and referral;

- oversee the "circuit rider" contract that provides on-site training and other direct technical assistance to manufactured housing communities mobile home parks and other small community and non-transient non-community public water systems (those not currently served by such a program), including a review of the contractor's quarterly progress reports on which continued funding is contingent.

- coordinate available US EPA sponsored SDWA compliance training and guidance to small water systems;

- coordinate federally offered Technical Assistance to ensure that help is provided at very needy, non-complying water systems;

- provide guidance to small water systems on emergency preparedness, vulnerability assessment, and security-related initiatives;

- coordinate sampling and analytical assistance to small systems for required organic, inorganic, and radiological water quality compliance testing;

- participate in meetings with the public and individual systems, as opportunities arise, to explain the Small Systems Technical Assistance Program and its advantages to local communities;

- encourage small water systems and local health department (LHD) staff to consider collaborative or regional approaches to water supply services, such as consolidating and/or seeking legislative authorization for municipal regionalized water systems;

- encourage small water systems to form partnerships, initiate contract operation and maintenance agreements, and implement mutual-aid agreements as via the New York Water and Waste Water Agency Response Network (NYWARN);

- implement a number of small system projects and otherwise assist small systems endeavoring to find technical and economically-viable solutions to long term compliance issues, focusing primarily on communities applying for DWSRF financing but also working with those using other means of financing;

### 6.2.2 Comprehensive Performance Evaluation Program

The primary Comprehensive Performance Evaluation (CPE) program goal is to review and evaluate the capabilities of existing treatment facilities to determine if they are meeting current standards and performance goals. A secondary, but equally important goal is to develop a program, based upon the evaluation, for the optimization of each facility to assure compliance with current and future standards and regulations.

The DOH's CPE program has resulted in the detailed assessment of 146 water treatment facilities since November 1994. Although most of these plants are able to meet the current Filtration Performance Criteria and Maximum Contaminant Levels (MCLs), the structural, operational and administrative deficiencies noted in the evaluations will make it difficult for many of these systems to do so consistently, and to comply with future regulations without considerable operational or capital improvements. There are approximately 320 surface water filtration systems and more than 200 GWUDI filtration systems for microbial contaminants on ground water systems determined to be under the direct influence of surface water (GWUDI) and several hundred filtration/treatment systems for the removal of other (eg. chemical) contaminants in New York State

During FFY 2017 the DOH proposes to:

- conduct 1 - 2 CPEs as necessary for compliance with 40 CFR 141.563(c), complete with a detailed evaluation report, recommendations, and follow-up meetings with the community to review the report, outline necessary improvements, and discuss an optimization program. This task will be accomplished with bureau staff and other field staff that may be temporarily assigned to lead or assist staff conducting the CPEs;

- continue to develop and issue comments and recommendations for initial remedial actions to the community within 30 days after the completion of the field work, followed by the submission of the completed evaluation report to the community within an average of 180 days after the completion of the field work;

- conduct Focused Performance Evaluations (FPE's) as necessary to assess specific operational issues including filter media evaluations, DBP and disinfection assessments, TOC/color problems and GWUDI treatment assessments;

- conduct follow up visits, as time permits, at communities that had a FPE/CPE to determine the degree of implementation of the recommendations, to discuss any new difficulties at these facilities, and to support communities having a specific critical problem; and

- improve where needed/ appropriate, training of field staff responsible for follow-up, making equipment available where needed and holding workshops on trouble-shooting techniques as appropriate.

### 6.3 State Program Management

The SDWA authorizes states to take up to 10% of the total annual federal Capitalization Grant to support state program management activities. The State plans to use 10% of the total annual federal Capitalization Grant to administer the Public Water System Supervision (PWSS) program. States are required to match these set-asides on a one-for-one basis above and beyond the 20% match required of all capitalization funds. This amount will be matched with in-kind services associated with the State's existing PWSS and Drinking Water Enhancement Programs.

#### 6.3.1 Administer the PWSS Program

The PWSS program enables the DOH to continue administration and oversight of the drinking water program, ensuring consistency in the implementation of and compliance with the requirements of the New York State Sanitary Code on a statewide basis. Additionally, the PWSS program assures that public water systems are operated in a manner that ensures adequate protection of their source water(s) and delivery of potable, aesthetically pleasing drinking water.

To achieve these goals, the DOH plans to implement the following objectives during FFY 2017 and subsequent years: assure compliance with Part 5 of the State Sanitary Code;

- coordinate with the DOH Wadsworth Center to assure that State Laboratory capabilities are maintained;
- provide technical assistance to public water systems in achieving compliance;
- assure public health protection at public water systems using surface water sources;
- assure public health protection by developing, adopting and implementing mandatory federal drinking water regulations into the State Sanitary Code, including development and submittal of primacy packages;
- ensure that local health department water supply programs properly implement the program;
- assure that water supply facilities are built in accordance with proper design criteria by providing conceptual review and design approval of new construction and major modifications to water supply systems;
- continue to assess whether community groundwater systems may be under the influence of surface water;
- continue to implement the State's Capacity Development Program including submitting the Annual Capacity Development Report to the U.S. EPA by December 31st of each year and submitting the triennial Report to the Governor; continue to implement the Source Water Assessment and Protection Programs and Well Head Protection Program;
- continue to perform security inspections of public water systems;
- assure potable water is provided during water supply emergencies;
- assure staff are properly trained;

- assure that water systems are operated by certified operators;
- continue to collaborate and assist US EPA with initiatives such as the Child Health Initiative and the Unregulated Contaminant Monitoring Rule;
- continue to track NYC filtration avoidance compliance; and
- ensure that all US EPA reporting requirements under the grant are met and that US EPA proposals for regulations and policies are promptly commented upon as requested;

### 6.4 Special Activities

Section 1452(k) of the SDWA authorizes states to take up to 15% of the annual federal Capitalization Grant for land acquisition, capacity development projects, wellhead protection, and source water petitions. No more than 10% of the federal Capitalization Grant can be allotted to any one of these special activities. At the time of this IUP printing, New York State is not proposing to take or use any of the allotted set-aside funds from the FFY 2017 DWSRF Capitalization Grant for the following programs. However, New York State reserves the right to issue an IUP amendment during the Federal Fiscal Year to use set-aside funds for these programs.

1. Land Acquisition

Funds in the DWSRF can be used to purchase land integral to the construction of facilities, but not for other purposes such as watershed protection. A separate set-aside of 10%, however, may be used to establish a separate low-interest fund for land acquisition, particularly for watershed protection. New York State is not proposing to create such a fund at this time. There are a number of existing programs that can be used to purchase sensitive watershed lands. These include the State's 1986 Environmental Bond Act, the 1996 Clean Water/Clean Air Bond Act, the New York City Watershed Agreement, the Clean Water State Revolving Fund, as well as local, regional and private sources. The State will review the need to create additional capacity for land acquisition as part of its source water assessments and delineation efforts.

2. Capacity Development Projects

The State has proposed to use a portion of the allotted Program Management set-aside to implement the statewide capacity development strategy. The DOH with input from the EFC, the New York State Public Service Commission, the Office of State Comptroller, and other state agencies will use the capacity development strategy to address non-viable public water supplies in the State.

3. Wellhead Protection

The DEC developed New York's Wellhead Protection Program (WHPP), which was approved by the US EPA in 1990. The goal of the WHPP is to protect the ground water sources and wellhead areas that supply public drinking water systems from contamination. New York's approach to wellhead protection recognizes and includes the existing federal, state and county programs that protect groundwater, and compliments these programs through a combination of activities and efforts using existing public and private agencies and organizations at all levels. In New York, the WHPP has focused on assisting municipal community water systems with an interest in developing protection plans for their ground water supplies.

In October 1998, administration of New York's WHPP was transferred from the DEC to the DOH. The basis for the transfer of this program responsibility was due to the creation of the Source Water Assessment Program (SWAP) under the 1996 SDWA Amendments and the need to ensure efficiency and compatibility in the administration of these key water supply management programs. The WHPP and the SWAP share several similar program elements (e.g., delineation and contaminant inventory) for identifying areas of source water vulnerability to contamination, and both programs provide a foundation for focusing source water protection efforts at the local level.

The DOH submitted a Biennial Wellhead Protection Report to the US EPA on November 15, 1999 for the October 1997 through September 1999 reporting period. This biennial report was prepared in accordance with the reporting requirements and criteria outlined in the US EPA guidance provided to states and is consistent with previous New York State submittals on progress reporting for the WHPP. The DOH submitted a Biennial Wellhead Protection Report, using the 2001 Source Water Assessment and Protection Reporting Matrix, to the US EPA on November 9, 2001 for the October 1999 through September 2001 reporting period. Future wellhead protection reporting, if done, will be prepared in accordance and be consistent with any revised US EPA reporting requirements that may become available.

4. Source Water Petitions

The DOH continues to work with communities to improve source water protection throughout the state. Assessments of drinking water sources were completed in the Source Water Assessment Program (SWAP) and all new sources are required to complete assessments of the susceptibility of the source to contamination. No source water petition partnerships are anticipated at this time and therefore there is no intention to develop a financing program for them during this FFY.

**TABLE 2**
**INTENDED USE & DISTRIBUTION OF NYS DWSRF FFY 2017 SET-ASIDE FUNDS**

| Set-Aside | % Allowed by SDWA | FFY 2017 Maximum Allocation[1] Allowed by SDWA | NYS % | NYS's FFY 2017 Use |
|---|---|---|---|---|
| **Administration** | **4%** | **$1,800,000** | **4%** | **$1,800,000** |
| DOH (2%) | | | | ($900,000) |
| EFC (2%)[2] | | | | ($900,000) |
| **Technical Assistance** | **2%** | **$900,000** | **2%** | **$900,000** |
| DOH | | | | ($900,000) |
| **State Program Management** | | | | |
| Administer PWSS Program | **10%** | **$4,500,000** | **10%** | **$4,500,000** |
| DOH | | | | ($4,500,000) |
| **Special Activity Set-Asides[3&4]** | **15%** | **$6,750,000** | **0%** | **$0** |
| Land Acquisition | (10%) | **($4,500,000)** | | |
| Capacity Development | (10%) | **($4,500,000)** | | |
| Wellhead Protection | (10%) | **($4,500,000)** | | |
| SW Petition Programs | (10%) | **($4,500,000)** | | |
| **Total Set-Asides[5]** | **31%** | **$13,950,000** | **16%** | **$7,200,000** |

[1] Based on an estimated Federal Capitalization Grant of $45,000,000 and is subject to change.
[2] Depending on DOH/EFC program needs, DOH and EFC may adjust the percentages of the Set-Asides.
[3] No more than 10% for any individual component and a total of 15% under Special Activity Set-Asides.
[4] The DOH may issue an IUP amendment to use set-aside funds for these programs depending on DOH/EFC program needs.
[5] The US EPA Safe Drinking Water Act allows for States to use up to 31% of the federal Capitalization Grant for set- asides and NYS intends on using only 16% of the federal Capitalization Grant for total set-asides.

## 7.0 Disadvantaged Community Program and Hardship

### 7.1 Introduction

Chapter 413 of the Laws of 1996 (Clean Water/Clean Air Bond Act) provided $265,000,000 to finance drinking water infrastructure projects in New York State. Of these monies, $90,000,000 was allocated to provide direct financial hardship assistance payments for projects in disadvantaged communities. Since the inception of the program the DOH and the EFC exercised the federal SDWA Hardship Provision that allowed states to utilize up to 30% of their annual DWSRF Federal Capitalization Grant to provide Additional Financing Subsidies (Grants) beyond the interest free financing rate to eligible disadvantaged communities. For FFY 2017 states are federally required to use no less than 20% and no more than 30% of their Federal Capitalization Grant for additional financing subsidies in the form of grants, negative interest loans, or principal forgiveness. It is anticipated that NYS will use the 20% of its Federal Capitalization Grant to provide additional financing subsidies (Grants) beyond the interest free financing rate to eligible disadvantaged communities through the hardship program as outlined in this section. Table 3 reflects the cumulative amount of grant funds that were provided to disadvantaged communities and the estimated new grant to confirmations be provided for in FFY 2017.

**Table 3**
**Total Financings and Hardship Grant Funds**

| Federal Fiscal Years | Federal DWSRF Dollars Provided to NY State | Total Project Financings **Through FFY 2016** | Grants Awarded to Disadvantaged Communities |
|---|---|---|---|
| 1997 - 2016 | $1,186,225,943 [1] | $5,241,422,956 [2] | $337,284,926 [3] |
| 2017 (Estimated) | $45,000,000 | | $9,000,000 [4] |

**1 Since inception- includes $86.8 million American Recovery & Reinvestment Act (ARRA) and $56.5 million Disaster Recovery and Reinvestment Act (DRRA) SRF Capitalization Grants.**
**2 Includes refinancings & Grants Awarded to Disadvantaged Communities. Exceeds Capitalization Grant amount due to leveraging of funds and the recycling of repayments and interest earnings.**
**3 Does not include $71.5 million in DWSRF ARRA principal forgiveness.**
**4 Estimated new hardship grant commitments to be provided for FFY 2017.**

Municipalities with eligible drinking water infrastructure projects may qualify for hardship (interest-free) financing through the Drinking Water State Revolving Fund (DWSRF). Certain municipalities that qualify for hardship financing may additionally qualify to receive grant funding through the DWSRF.

DOH and EFC qualifies municipalities for hardship financing based on publicly available census data rather than requiring detailed demographic and economic data from the municipalities. Upon finalization of each IUP, qualifying municipalities will be issued a confirmation letter offering interest-free financing and grant, as available. EFC will consider interest-free financing to have been allocated to a project upon submission of an acceptable financing application for that project.

### 7.2 Restrictions on Hardship Funding

Eligible Applicants are limited to $14 million in combined interest-free financing and grant over a 5-year period. Municipalities that reach the $14 million limit will be eligible for additional hardship financing five years after the FFY in which the $14 million limit is reached.

For special districts or other areas for which accurate census data is not available, other income data, including income surveys, may be provided by the municipality and considered by EFC. The income survey must be in a form acceptable to EFC. If the project service area encompasses municipal jurisdictions which have different MHIs, a “weighted average” MHI, based on approximate residential units served by the project, will be calculated and used in

determining eligibility for hardship financing. Municipalities and eligible privately owned public water systems have the option of submitting an income survey to justify inclusion as a hardship community if they disagree with the census data.

### 7.3 Hardship and Grant Eligibility Criteria

Although DOH and EFC have been providing hardship assistance in the form of additional subsidy (grants) since the inception of the DWSRF program, the provisions for additional subsidization from US EPA DWSRF Capitalization Grants became a requirement in Federal Fiscal Year (FFY) 2010. The amount of additional subsidy available, is dependent upon the amount of federal funding allocated to the DWSRF in a particular FFY and is shown in Table 1.

**Hardship Eligibility Criteria:**
To be considered for interest-free financing, municipalities must meet the following criteria:

- Must be a municipally-owned or NYS Public Service (PSC) Regulated Privately owned drinking water infrastructure project.
- Must be listed in the Annual List with a score at or above that of the Hardship Application Eligibility line
- Municipal population is less than 300,000 per the 2013 American Community Survey. Alternatively, a municipality with a population greater than 300,000 can qualify if the project is for an established water district or a service area with a population less than 300,000. An income survey of the water district or service area would be required.
- 2013 Median Household Income (MHI) of the municipality must be less than or equal to the statewide 2013 MHI ($58,003, as determined by American Community Survey (ACS)) to be evaluated to qualify for grant.
- Projects for communities with an MHI between 100% and 125% of the 2013 statewide MHI ($58,003 - $72,504) will be required to submit a hardship application for evaluation to qualify for zero or reduced interest rate hardship financing.
- Projects for communities with an MHI between of greater than 125% of the 2013 statewide MHI ($72,504) are not eligible for hardship financing.
- An income survey, Census Designated Place (CDP), or other acceptable demonstration of a more accurate MHI for the service area may be used in lieu of the published MHI
- Total project cost is less than $14 million dollars.

**Grant Eligibility Criteria:**
All candidates for grant must meet all following screening criteria:

- Eligible for hardship (meet the hardship eligibility criteria above)
- 2013 Median Household Income (MHI) must be:
    - Less than $46,402 which is 80% of the statewide 2013 MHI or
    - If the MHI is 80% to 100% of the 2013 statewide MHI ($46,402 - $58,003) then the family poverty rate must be greater than or equal to the 2013 ACS statewide average family poverty rate.
    - Projects that serve communities with an MHI above the statewide MHI of $58,003 are not eligible for hardship grant.
- Construction cannot reach substantial completion prior to October 1 of the FFY in which the grant funding is awarded.

### 7.4 Determination of Maximum Grant Award

Projects are subject to a maximum grant award as described below.

- Projects are limited to the lesser of $2 million or 60% of total project costs, whichever is less.
- Municipalities or projects that reach the grant offer of $2 million will be eligible for additional grant funds five years after the FFY in which the $2 million limit is reached.

- No municipality could receive more than their maximum grant award for any combination of projects, and no single project (if shared by more than one municipality) would receive more than the maximum grant amount of $2 million or 60% of the total project cost, whichever is less.

Future Funding Cycles may incorporate thresholds for different levels of grant funds in a similar manner to the CWSRF hardship program depending on the availability of grants, demand for grants, and the success of these changes to DWSRF program.

### 7.5 Project Evaluation and Identification

Projects that meet the hardship criteria above and receive a hardship confirmation letter will appear on the Category C Hardship list and will receive an "H" designation on the Annual List in the following IUP. DOH will determine a set amount of funding each FFY that will be available for grants and interest-free hardship financing based on a percentage of the federal Capitalization Grant and total resources available respectively. DOH will determine the projects that meet the criteria necessary to be evaluated to receive a hardship confirmation letter offering interest-free hardship financing and, if applicable, grant. Using the amount of funding available for both hardship financings and grant, DOH and EFC will determine which projects, in order of public health priority ranking can be issued hardship confirmation letters. After finalization of the IUP (October 1), EFC will issue the hardship confirmation letters to qualifying municipalities stating that they are eligible for interest-free hardship financing and, if applicable, grant. Grant award letters will require the municipality to countersign and return to EFC, setting forth the conditions of the grant offer.

DOH and EFC may modify the data being used to evaluate for hardship and/or grant awards. Such modifications will be announced in a draft IUP or through IUP amendments. DOH and EFC will continue to honor the commitment of hardship and grant, if offered, to those municipalities whose census data change during the hardship/grant offer period.

### 7.6 Timing for closing on Interest-Free Financing and Grant

Municipalities issued hardship confirmation letters at the beginning of each FFY (year 1) will have until the application deadline in the following FFY (year 2) to submit a complete financing application, and until the end of the following FFY (year 2) to close on a financing. These dates will be specified in the hardship confirmation/grant offer letter.

In all cases, a municipality will need to close on DWSRF short-term or long-term financing before the confirmation letter expires to remain eligible for hardship financing. Submittal of a short-term financing application and closing of a short-term financing will qualify as meeting the submittal and approval dates stated within the DWSRF hardship confirmation letter. For hardship eligible municipalities that close a short-term financing, the financial hardship eligibility expiration date will become the short-term financing maturity date and the municipality will need to close on their hardship long-term financing before that date. If a municipality has not executed a DWSRF financing by the expiration date identified in the confirmation letter the municipality will be evaluated for hardship and grant eligibility in the next IUP period using the hardship evaluation criteria in place for that IUP.

### 7.7 Co-funding

Confirmation that a project qualifies for hardship assistance will help facilitate funding coordination with other State and Federal agencies that finance drinking water projects. The New York State Water and Sewer Infrastructure Co-funding Initiative brings together representatives from the DOH, EFC, DEC, Department of State, Office of Community Renewal, United States Department of Agriculture Rural Development, Office of the State Comptroller,

and New York State Energy Research and Development Authority to ensure optimum funding potential and assistance for New York's communities.

Co-funding is anticipated and encouraged by the provision of additional points to a project's score in the priority system. A project must receive co-funding assistance of either $25,000 or 5% of the project costs, whichever is less, to qualify for project co-funding points. Coordination of joint funding of projects is done on a project by project basis for those projects that apply to multiple funding entities.

## 8.0 Capacity Assessment

To provide safe and reliable drinking water, the federal and state governments are investing substantial financial resources in the drinking water infrastructure of New York State. To assure the DWSRF is invested wisely, each DWSRF applicant must demonstrate that its water system has adequate technical, financial and managerial capacity.

### 8.1 Technical Capacity

To assure adequate technical capacity, the applicant must demonstrate adequacy of source water, adequacy of infrastructure and technical knowledge. The DOH will review central office and local office records to assure that the system is being properly operated and maintained. The water system must not have outstanding drinking water compliance problems unless the project is aimed at correcting those problems. The engineering report and plans and specifications for the proposed project will be evaluated to insure that the system has a reliable source for its drinking water and that it is adequately protected; that the project will maintain system compliance; and that the education, experience, and technical skills and capabilities of the system operator are appropriate for that system.

### 8.2 Financial Capacity

To assure adequate financial capacity, the applicant must have sufficient rates, charges and revenues to cover necessary costs, demonstrate credit worthiness and fiscal condition in accordance with EFC criteria. The EFC will review the applicant's financial capacity during the full application process to determine financial viability before the awarding of financial assistance. The EFC's review will include, but not be limited to, the project budget, municipal bond resolution(s), annual financial reports to the Office of the State Comptroller, and other financial information to assure adequate financial capacity of the applicant.

### 8.3 Managerial Capacity

To assure adequate managerial capacity, the water system must have clear ownership identity and be appropriately staffed by personnel with expertise to administer overall water system policies and operations. The DOH will review the applicant's managerial capacity to assure that management is involved in the day to day supervision of the water system, is aware and responsive to all required regulations, is available to respond to emergencies, is capable of identifying and addressing all necessary capital improvements, is responsive to their customers and is capable of keeping accurate records and assures financial viability. The water system must have a qualified water operator in accordance with the State's existing Operator Certification Program.

### 8.4 Systems with Inadequate Capacity

For all systems that seek funding under the DWSRF, the DOH will review any history of violations, outstanding compliance problems, reported source contamination or inadequacies, treatment failures, needs survey data, operations and maintenance issues, and operator and owner coverage to determine whether a system lacks adequate capacity. A system that requires improvements to obtain adequate capacity can apply to the DWSRF provided the improvements will ensure compliance and render the water system viable. Using the procedures outlined in Sections 8.1, 8.2, and 8.3 to evaluate the system's technical, financial, and managerial capacity, the DOH will assess whether DWSRF assistance will help to ensure compliance. In addition, the DOH will consult with the local health department, which provides the daily oversight and regulation of the water system, to make this assessment.

### 8.5 Long-Term Capacity

Water systems must maintain adequate capacity. The DOH and EFC will assess whether each water system has a long-term plan to undertake feasible and appropriate changes in operations necessary to develop adequate capacity. The DOH will review Water Resource Management Strategies, Comprehensive Studies, the Needs Survey and other available engineering reports, as well as consult with the local health departments, in making these assessments. The DOH and EFC will encourage restructuring efforts when two or more systems can benefit and other options, such as contract management or partnerships with other communities in their area, in an effort to improve the overall capacity. The priority ranking criteria provides additional points to encourage this objective. In addition, restructuring efforts and other cooperative arrangements among systems will be encouraged as part of the implementation of the statewide capacity development strategy.

### 8.6 Annual Reporting Requirements

The State will submit to the US EPA and include in the IUP, documentation that summarizes the results of the capacity assessments conducted on those systems seeking funding under the DWSRF in the preceding year. The summary will include statistics on the numbers, types, and sizes of systems assessed to determine technical, managerial, and financial capacity, including the assessment outcomes; whether DWSRF assistance will ensure compliance for those systems with inadequate capacity; and whether restructuring efforts will result in both developing adequate capacity and achieving long-term capacity for systems. Table 4 summarizes the required capacity assessment information. Table 4 shows the summary for capacity development reviews.

**Table 4 - Capacity Development Review Summary (10/1/15 – 9/30/16)**

| Statewide Capacity Reviews | | Totals | System Type: | | System Size (population served) | | |
|---|---|---|---|---|---|---|---|
| | | | CWS | NTNC | <1000 | 1,000-3,300 | >3300 |
| Passed | | 31 | 31 | 0 | 12 | 6 | 13 |
| Failed | | 0 | 0 | 0 | 0 | 0 | 0 |
| (Failed) Requiring Restructuring | | 0 | 0 | 0 | 0 | 0 | 0 |
| Priority Systems[1] Requesting DWSRF Assistance | Funded | 0 | 0 | 0 | 0 | 0 | 0 |
| | Being Processed | 6 | 6 | 0 | 3 | 2 | 1 |

[1] Projects submitted by systems that lack technical, managerial or financial capacity or are classified as priority systems based on US EPA's Enforcement Targeting Tool (ETT) are not eligible for funding unless the proposed project will ensure capacity or compliance. Also, projects whose primary purpose is fire protection or growth/development, dams and reservoirs, or acquisition of land not integral to an eligible project are not eligible.

## 9.0 State Environmental Review Process/Determination of Equivalency Projects

The State Environmental Review Process (SERP) applies to all projects receiving financial assistance from the DWSRF. The SERP incorporates environmental review requirements of the National Environmental Policy Act (NEPA) and its implementing regulations (40 CFR, Part 6 and 40 CFR, Part 1500), the State Environmental Quality Review (SEQR) Act, Article 8 of the Environmental Conservation Law (ECL) and its implementing regulations under 6 NYCRR, Part 617, as well as the DOH regulations under 10 NYCRR, Part 97. The DWSRF applicant must complete the SERP before receiving DWSRF financing.

All projects that are financed from the DWSRF are classified by the DOH under the SERP as either Tier I or Tier II projects. Tier I projects, also referred to as equivalency projects, refer to a project or multiple projects that meet the NEPA threshold and whose cumulative total is an amount equal to the federal Capitalization Grant to the State. Tier II projects, (non-equivalency projects), refer to all other projects that receive DWSRF financial assistance.

Tier I projects must undergo an environmental review consistent with the NEPA. For the DWSRF program, Tier I projects will include:

- projects for which an environmental review consistent with NEPA has already been completed; and

- projects that meet the definition of a NEPA categorical exclusion.

If necessary, additional Tier I projects will include:

- projects for which applicants have voluntarily undertaken to complete a NEPA equivalent environmental review;

- projects that have a particular environmental significance, due to the nature and scope of the projects; and

- projects for which the environmental review can be considered functionally equivalent to a NEPA environmental review, with some minor additional elements.

Tier II projects are subject to the environmental review requirements of SEQR with additional requirements imposed by the SERP for the DWSRF program. Applicants will be notified by the DOH whether their project(s) proposed for financing through the DWSRF program fall under the category Tier I (equivalency) or Tier II.

All DWSRF projects must perform a SEQRA Type 1 coordinated review unless they are a SEQRA Type II action, a Categorical Exclusion under NEPA or have performed a Federal NEPA review. Guidance on the environmental review process and SEQRA requirements for DWSRF projects is available at www.efc.ny.gov/seqr/dwsrf

## 10.0 Federal and State Program Requirements

The federal and state program requirements cited below are not meant to be all inclusive but are prominent requirements that prospective program applicants need to be aware of and comply with for receiving financing through the DWSRF program. Additional guidance related items 10.1, 10.2, and 10.3 below is available in the Construction Bid Packet for Treatment Works Projects at www.efc.ny.gov/mwbe .

### 10.1 American Iron and Steel

As of January 17, 2014, the use of American Iron and Steel (AIS) became a federal requirement for projects funded through the DWSRF and that requirement will be continuing for the FFY 2017 DWSRF funding cycle.

### 10.2 Federal Prevailing Wage (Davis-Bacon)

Congress has mandated that federal labor laws regarding prevailing wages, hours of work, and rates of pay shall apply to construction carried out in whole or in part with assistance from the DWSRF. These requirements are collectively known as the Davis-Bacon laws. These requirements are in addition to the requirements of NYS prevailing wage laws. US EPA guidance requires that any DWSRF financings comply with the Davis-Bacon laws and incorporate these provisions into any project construction work that has been or will be contracted. Work done by a municipal applicant's employees, generally known as "force account" or "work force", is not generally subject to Davis-Bacon requirements.

### 10.3 Minority and Women Business Enterprise/Equal Employment Opportunity

EFC maintains a robust MWBE program that includes training, technical assistance and guidance for SRF recipients. EFC is also committed to creating opportunities for certified firms to participate on all SRF projects as both prime contractors and subcontractors. EFC's MWBE program requires prime contractors and service providers to conduct good faith efforts to achieve a 20% combined MBE and WBE participation goal for their contract.

EFC's MWBE program complies with both federal and state regulations. Federal Disabled Business Enterprise regulations are found in Title 40 of the Code of Federal Regulations (CFR), Part 33 and require SRF recipients to offer fair share opportunities for agreements and/or sub-agreements to disadvantaged, minority and woman-owned businesses.

The NYS law and regulations for Minority and Women Owned Business Enterprises can be found in Executive Law, Article 15-A, and Title 5 of the New York Code of Rules and Regulations (NYCRR), parts 140-145. The NYS laws and regulations may be amended from time to time so the SRF recipients should check EFC's website for news about any updates that may affect SRF requirements.

### 10.4 State Smart Growth Public Infrastructure Policy Act

On August 30, 2010 the New York State Environmental Conservation Law was amended to add the State Smart Growth Public Infrastructure Policy Act. This law required that starting September 27, 2010, any new or expanded public infrastructure project receiving financing from a state infrastructure agency must be consistent with the relevant smart growth public infrastructure criteria as they are defined in the law to the extent practicable. DOH requires that a smart growth assessment form be submitted with along with the DWSRF project listing form to add a new project to the IUP and those forms are available in Attachment IV of this IUP. Depending on the project scope, DOH may also require as a part of the engineers report and/or through other DWSRF application materials that may be developed, an analysis of the project with respect to its compliance with the criteria of the smart growth law. If this analysis is determined to be required and has not been provided, DOH will notify the applicant during the review process for the engineer's report.

## 11.0 How to get a Project Listed on the Intended Use Plan

Projects must appear on the IUP Annual List in order to apply for DWSRF financing. The type of financing available is dependent on the public health priority ranking of the project and its relation to the subsidized interest rate funding line and hardship evaluation eligibility line on the Annual List. Projects below the subsidized interest rate funding line are eligible to apply for market rate financing and projects above that line are eligible to apply for subsidized interest rate funding. Projects with a score above or equal to that score where the hardship evaluation eligibility line is drawn will be evaluated for hardship funding which may consist of grant and/or zero interest rate financing (depending on availability). Applicants that qualify for hardship funding will automatically be notified in writing if their project qualifies for hardship funding.

**To Get a Project Listed or Placed on the Annual List:**

**For Projects Not Currently Listed in the IUP**

- Submit a listing form & Smart Growth Assessment form **(see Attachment IV of the IUP).**

- An Engineer's Report is required along with the listing form to get the project listed on the Annual List. The Engineer's report should be in accordance with Section 1.1 of the 2012 edition of the Recommended Standards for Water Works (RSWW). The RSWW are available at www.10statesstandards.com.

- DOH accepts listing forms on a continual basis and add new projects to the IUP at the beginning of each funding cycle. For projects to be added the IUP at the start of each funding cycle (October 1), new listing forms must be received by the close of the draft IUP comment period which is usually during the first week of September. For listing forms that are submitted after the close of the draft IUP comment period, those projects will appear in the IUP for the subsequent funding cycle. Attachment II of the IUP provides details as to the funding cycle schedule including dates related to the submittal of listing forms.

**For Projects Already Listed and Appearing on the IUP Multiyear List Only**

- If not already submitted, provide a Smart Growth Assessment form and an Engineer's Report to get the project placed on the Annual List. A request to move the project from the Multiyear List to the Annual List should also be provided.

**To Get a Project Financed:**

- Once the project is on the Annual List of the IUP, prospective applicants need to submit a full financing application along with the required supporting documents. After that application is filed, DOH and/or EFC will contact the applicant to provide further guidance to assist with completing the process. It is recommended that prospective applicants contact the appropriate DOH Area Project Manager as shown in Attachment VIII to discuss the project prior to filing the financing application. The financing application and guidance materials are available at www.efc.ny.gov/dwsrf.

## 12.0 Project Priority Lists

### 12.1 Project Selection Process

Both federal and state laws required that New York develop a Project Priority Ranking System. The priority ranking system establishes a list of eligible projects to be funded in a manner consistent with the SDWA such that the most serious risks to public health are given the highest priority. The DOH has given the highest priority to acute public health risks, particularly those related to microbiological organisms. The next priority was given to situations that pose chronic and longer term risks to consumers, such as organic chemical contamination. The scoring criteria also consider issues that are related to infrastructure upgrading or replacement. The project ranking system also considers, as mandated by the SDWA, special allocations and restrictions on the use of DWSRF monies for disadvantaged and small systems. A detailed description of the Project Priority Ranking System and Scoring Criteria are included as Attachment I to this IUP.

### 12.2 Description and Use of Project Lists

Projects must be listed in the IUP to receive DWSRF financing. This IUP includes the following prioritized lists of eligible projects being considered for financing from the DWSRF:

- The **Project Annual List** for this IUP includes all projects for which an engineering report or plans and specifications are submitted to the DOH or for which construction is completed by September 2, 2016. Projects must be included on this list to be considered ready to apply to receive financing. A project is deemed "ready" when all technical submittals have been received by the DOH. Projects that have submitted Listing Forms, but have neither submitted an engineering report, plans and specifications nor completed construction have been included on the Multi-Year List.

  The Project Annual List includes a subsidized funding line. Projects listed above this subsidy funding line comprise the Funding List, which includes all those projects expected to qualify for subsidized interest rate financing within the current IUP financing period. Provisions are made in the Project Priority Ranking System to by-pass projects that may not progress as expected (see Attachment I). The DOH may proceed with an accelerated by-pass of those non-hardship projects that have been on the Project Annual List, above the subsidy funding line for two or more consecutive IUP periods and fail to submit a complete application by December 1, 2016.

  Funds released by project by-passing will first be used for the Emergency Financing Program to finance imminent threats to public health. Funds released by project by-passing will then be used to finance cost increases incurred by projects on the IUP above the subsidy funding line. Any remaining funds available will be used to finance projects below the subsidy funding line in order of priority ranking.

  The project cost presented on the Project Annual List reflects the applicant's estimated project cost.

  It should be noted that for some larger projects there may not be sufficient funds available in a single IUP financing period for their complete financing. As necessary, DOH at its discretion and in consultation with the applicant will segment and/or phase finance on a cash flow basis larger projects over several IUP financing periods to maintain a statewide program of maximum effectiveness.

- The **Category A List** consists of projects for small systems serving less than 10,000 people from the Project Annual List. This list includes a funding line and a line designating the SDWA minimum funding requirement (15% of the DWSRF) for small public water systems.

- The **Category B List** consists of projects for water systems serving greater than or equal to 10,000 people from the Project Annual List**. This list has not been included in the IUP.**

- The **Multi-Year List** includes all eligible projects for which Listing Form forms have been submitted and reviewed, including those projects on the preceding Multi-Year List. The DOH accepts Listing Forms on a continuous basis. All eligible projects for which Listing Form forms are submitted on or before September 2, 2016 will be included on the Multi-Year List in the final IUP.

- The **Category C (Hardship) List** includes all eligible projects that have received written confirmation that they qualify for financial hardship assistance.

Copies of the Project Annual List, the Category A (Small Systems) List, the Multi-Year List, and the Category C (Hardship) List follow at the end of this section.

# PROJECT ANNUAL LIST

The Project Annual List begins with projects that have received a written confirmation letter that they qualify for financial hardship. These projects are identified by 'H' in the column labeled "score."

Phased or segmented projects are assigned 2000 points in addition to their total project ranking system score. Phased points will not typically be assigned for any Listing Form received if the prior related phase or portion of the project closed on long term financing more than five years earlier and the improvements already funded are operational. (DOH reserves the right to assign phased points for projects that require additional financing, regardless of time frames, to address the more serious original public health priorities for which the project received its original score.)

Projects that are eligible for subsidy or designated hardship and have closed on a short-term financing are assigned 1000 points in addition to their total project ranking system score and are identified in the column labeled "project cost" by 'NOTE: Short-Term Loan Closed'

# Annual List

## NYS Drinking Water State Revolving Fund - Final IUP October 1, 2016 to September 30, 2017

| Project # | County (CODES See legend*) | System Name/ Borrower | Description | Pop. | Project Cost | Score | Cumulative Total |
|---|---|---|---|---|---|---|---|
| 16746 | Allegany | CANASERAGA VILLAGE PUBLIC WATER / Canaseraga (V) | New wells, decommisioning of well and springs to address Coliform violations, New Ground Water Source, Upgrade Storage, Upgrade Distribution System | 900 | $850,000 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 15003 | Ulster | ELLENVILLE (VILLAGE) WATER DIS / Ellenville (V) | New ground water source to replace GWUDI wells along with other improvements, New Ground Water Source, Upgrade Storage, Upgrade Distribution System | 4,323 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 18013 | Cattaraugus | RANDOLPH VILLAGE / Randolph (T) | East Randolph and Randolph (V)'s project includes meters, Upgrade Other Expenses, New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New System Consolidation, Upgrade Other (OT) | 1,250 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 16692 | Herkimer | VAN HORNESVILLE WATER WORKS / Stark (T) | VanHornesville Water System, New Surface Water Treatment Rule Compliance Facility, New Storage, Upgrade Distribution System | 372 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 16114 | Cayuga | CAYUGA VILLAGE / Cayuga (V) & Aurelius (T) | Interconnection with adjacent system to address SWTR, New Surface Water Treatment Rule Compliance Facility, Upgrade Distribution System, New Inter-Connection | 600 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 18017 | Allegany | RICHBURG VILLAGE PUBLIC WATER / Richburg (V) | (V) Richburg & (V) Bolivar Consolidation., New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, Upgrade Storage, Upgrade Distribution System, New System Consolidation | 600 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 17529 | Jefferson | TIBBETS POINT WATER DISTRICT / Cape Vincent (T) | Serve area with private contaminated wells, New Surface Water Treatment Rule Compliance Facility, New System Consolidation, New Water District | 200 | $1,758,930 | H | $2,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 17562 | Jefferson | DEFERIET VILLAGE / Deferiet (V) | Distribution and storage improvements. Joint project between Villages of Herrings and Deferiet, Upgrade Storage, Upgrade Distribution System, New System Consolidation | 300 | $1,000,000 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 16106 | Greene | TANNERSVILLE VILLAGE / Tannersville (V) | Upgrade Water Treatment Plant, New Ground Water Source, Upgrade Transmission, Upgrade Distribution System | 448 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 17457 | Erie | CHAFFEE WATER CO / Chaffee Water Co. | New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New Storage | 200 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 17629 | Essex | ESSEX WD / Essex (T) | Address turbidity and organic violations, New Ground Water Source, Upgrade Distribution System | 300 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 16618 | Dutchess | SHOREHAVEN CIVIC ASSOC / DCWWA | DCWWA ZONE J treatment for radiologics and iron, UV disinfection as alternate for chlorination to reduce DPBs, Upgrade Water Treatment Plant, Upgrade Ground Water Source, Upgrade Distribution System | 300 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 18111 | Ulster | ROSENDALE WATER DISTRICT / Town of Rosendale | Upgrade Surface Water Treatment Rule Compliance Facility, New Ground Water Source, Upgrade Storage, Upgrade Distribution System | 2,200 | $1,600,000 | H | $5,208,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 18009 | Tompkins | DRYDEN VILLAGE / Dryden (V) | DWSRF Project Number 18107 is recombined back into this project, New Water Treatment Plant, New Ground Water Source, New Transmission, New Storage, Upgrade Distribution System | 2,000 | $600,000 | H | $5,808,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 17623 | Saratoga | CORINTH VILLAGE / Village of Corinth | New Surface Water Treatment Rule Compliance Facility, Upgrade Distribution System | 4,700 | $4,900,000 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 17888 | Tompkins | TRUMANSBURG VILLAGE / Trumansburg (V) | New well to provide source redundancy. New transmission main to provide adequate CT. System consolidation, New Ground Water Source, New Transmission | 2,300 | $0 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 17931 | Cayuga | PORT BYRON VILLAGE / Port Byron (V) | Joint project with (V) Port Byron, (T) Montezuma & (T) Mentz. Address Organic Violations, Upgrade Distribution System, Extend Distribution System, New System Consolidation | 1,400 | $0 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |
| 18094 | Clinton | C2 SHARED WATER PROJECT / Champlain (T) | Joint project between (T) Champlain and (V) Champlain., Upgrade Storage, Upgrade Distribution System | 4,000 | $0 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown isRemaining Balance Not Funded With Short Term Loan | | |

# HARDSHIP

## NYS Drinking Water State Revolving Fund
## Final IUP Category C Hardship List for October 1, 2016 to September 30, 2017

| Project | County | System Name/ Borrower | Description | Pop. | Project Cost | Score | Cumulative Total |
|---|---|---|---|---|---|---|---|
| 16746 | Allegany | CANASERAGA VILLAGE PUBLIC WATER / Canaseraga (V) | New wells, decommisioning of well and springs to address Coliform violations, New Ground Water Source, Upgrade Storage, Upgrade Distribution System | 900 | $850,000 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 15003 | Ulster | ELLENVILLE (VILLAGE) WATER DIS / Ellenville (V) | New ground water source to replace GWUDI wells along with other improvements, New Ground Water Source, Upgrade Storage, Upgrade Distribution System | 4,323 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 18013 | Cattaraugus | RANDOLPH VILLAGE / Randolph (T) | East Randolph and Randolph (V)'s project includes meters, Upgrade Other Expenses, New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New System Consolidation, Upgrade Other (OT) | 1,250 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 16692 | Herkimer | VAN HORNESVILLE WATER WORKS / Stark (T) | VanHornesville Water System, New Surface Water Treatment Rule Compliance Facility, New Storage, Upgrade Distribution System | 372 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 16114 | Cayuga | CAYUGA VILLAGE / Cayuga (V) & Aurelius (T) | Interconnection with adjacent system to address SWTR, New Surface Water Treatment Rule Compliance Facility, Upgrade Distribution System, New Inter-Connection | 600 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 18017 | Allegany | RICHBURG VILLAGE PUBLIC WATER / Richburg (V) | (V) Richburg & (V) Bolivar Consolidation., New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, Upgrade Storage, Upgrade Distribution System, New System Consolidation | 600 | $0 | H | $850,000 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 17529 | Jefferson | TIBBETS POINT WATER DISTRICT / Cape Vincent (T) | Serve area with private contaminated wells, New Surface Water Treatment Rule Compliance Facility, New System Consolidation, New Water District | 200 | $1,758,930 | H | $2,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 17562 | Jefferson | DEFERIET VILLAGE / Deferiet (V) | Distribution and storage improvements. Joint project between Villages of Herrings and Deferiet, Upgrade Storage, Upgrade Distribution System, New System Consolidation | 300 | $1,000,000 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 16106 | Greene | TANNERSVILLE VILLAGE / Tannersville (V) | Upgrade Water Treatment Plant, New Ground Water Source, Upgrade Transmission, Upgrade Distribution System | 448 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 17457 | Erie | CHAFFEE WATER CO / Chaffee Water Co. | New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, New Storage | 200 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 17629 | Essex | ESSEX WD / Essex (T) | Address turbidity and organic violations, New Ground Water Source, Upgrade Distribution System | 300 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 16618 | Dutchess | SHOREHAVEN CIVIC ASSOC / DCWWA | DCWWA ZONE J treatment for radiologics and iron, UV disinfection as alternate for chlorination to reduce DPBs, Upgrade Water Treatment Plant, Upgrade Ground Water Source, Upgrade Distribution System | 300 | $0 | H | $3,608,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 18111 | Ulster | ROSENDALE WATER DISTRICT / Town of Rosendale | Upgrade Surface Water Treatment Rule Compliance Facility, New Ground Water Source, Upgrade Storage, Upgrade Distribution System | 2,200 | $1,600,000 | H | $5,208,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 18009 | Tompkins | DRYDEN VILLAGE / Dryden (V) | DWSRF Project Number 18107 is recombined back into this project, New Water Treatment Plant, New Ground Water Source, New Transmission, New Storage, Upgrade Distribution System | 2,000 | $600,000 | H | $5,808,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 17623 | Saratoga | CORINTH VILLAGE / Village of Corinth | New Surface Water Treatment Rule Compliance Facility, Upgrade Distribution System | 4,700 | $4,900,000 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 17888 | Tompkins | TRUMANSBURG VILLAGE / Trumansburg (V) | New well to provide source redundancy. New transmission main to provide adequate CT. System consolidation, New Ground Water Source, New Transmission | 2,300 | $0 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 17931 | Cayuga | PORT BYRON VILLAGE / Port Byron (V) | Joint project with (V) Port Byron, (T) Montezuma & (T) Mentz. Address Organic Violations, Upgrade Distribution System, Extend Distribution System, New System Consolidation | 1,400 | $0 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 18094 | Clinton | C2 SHARED WATER PROJECT / Champlain (T) | Joint project between (T) Champlain and (V) Champlain., Upgrade Storage, Upgrade Distribution System | 4,000 | $0 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 18139 | St.Lawrence | STAR LAKE WATER DISTRICT / Fine (T) | New Ground Water Source, New Storage, New Inter-Connection | 927 | $0 | H | $10,708,930 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |
| 15749 | Rensselaer | RENSSELAER CITY PWS / Rensselaer (C) | New Storage, New Distribution System, System Consolidation | 7,500 | $881,900 | H | $11,590,830 |
| | | | | | NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | | |

## NYS Drinking Water State Revolving Fund
## Final IUP Category C Hardship List for October 1, 2016 to September 30, 2017

| Project | County | System Name/ Borrower | Description | Pop. | Project Cost | Score | Cumulative Total |
|---|---|---|---|---|---|---|---|
| 18105 | Chautauqua | WS IMPROVEMENTS / Sinclairville (V) | Upgrade Ground Water Source, Upgrade Ground Water Source, Upgrade Transmission, New Transmission, Extend Distribution System, New System Consolidation | 588 | $0<br>NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | H | $11,590,830 |
| 17513 | Essex | WINEBROOK HILLS WD / Newcomb (T) | New wells to replace surface water source with organics and DBP issues, New Ground Water Source, Upgrade Distribution System | 250 | $0<br>NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | H | $11,590,830 |
| 17976 | Otsego | SOUTHSIDE WATER DISTRICT NO. 5 / Oneonta (T) | Southside Water District No. 5. , New Ground Water Source, New Complete System (New System), New Storage, New Distribution System, New Water District | 1,570 | $0<br>NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | H | $11,590,830 |
| 17987 | Otsego | SOUTHSIDE WATER DISTRICT NO. 6 / Oneonta (T) | Southside Water District No. 6., New Ground Water Source, New Complete System (New System), New Storage, New Distribution System, New Water District | 1,569 | $0<br>NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | H | $11,590,830 |
| 18096 | Jefferson | ORLEANS WATER IMPROVEMENTS / Orleans (T) | Consolidation of PWS w/ violations and to serve contaminated private wells, Extend Distribution System | 450 | $0<br>NOTE: Short - Term Loan Closed, Project Cost Shown is Remaining Balance Not Funded With Short Term Loan | H | $11,590,830 |
| 17163 | Essex | TICONDEROGA WD / Ticonderoga (T) | New Surface Water Treatment Rule Compliance Facility, Upgrade Water Treatment Plant, New Ground Water Source, New Storage, Upgrade Distribution System | 5,000 | $13,033,104 | H | $24,623,934 |
| 18061 | Franklin | TUPPER LAKE V / Tupper Lake (V) | New wells to replace SW source and inadequate DE plant., New Ground Water Source, Upgrade Distribution System | 5,500 | $5,221,808 | H | $29,845,742 |
| 17537 | Delaware | DOWNSVILLE WATER DISTRICT / Colchester (T) | Package Filtration Plant for GWUDI Spring Source and Addition of Corrosion Control Treatment., New Surface Water Treatment Rule Compliance Facility, New Water Treatment Plant | 500 | $318,476 | H | $30,164,218 |
| 18067 | Otsego | GILBERTSVILLE VILLAGE / Gilbertsville (V) | Address NTU and Disinfection deficiencies, New Ground Water Source, New Storage, Upgrade Distribution System | 477 | $5,000,000 | H | $35,164,218 |
| 17504 | Schoharie | CENTRAL BRIDGE WATER DISTRICT / Central Bridge WD | Upgrade water treatment plant for DBP control and organics removal., Upgrade Water Treatment Plant, Upgrade Distribution System | 1,061 | $4,000,000 | H | $39,164,218 |
| 15958 | Greene | PRATTSVILLE WATER DISTRICT / Prattsville (T) | Adress organics violations and inadequate source capacity, New Ground Water Source | 410 | $1,454,454 | H | $40,618,672 |
| 18038 | Saratoga | MECHANICVILLE CITY / Mechanicville (C) | Interconnection to Saratoga County WA. Phase 1A improvements. Alternative to Project 17742., New Transmission, Upgrade Storage, Upgrade Distribution System, New Inter-Connection | 5,100 | $4,115,240 | H | $44,733,912 |
| 15097 | Warren | HAGUE COMMUNITY HOMEOWNERS ASSOC.,INC. / Hague HOA | Hague Home Owners Association, New Surface Water Treatment Rule Compliance Facility, New Transmission, Upgrade Distribution System | 20 | $92,000 | H | $44,825,912 |
| 16117 | Jefferson | ALEXANDRIA TOWN WD #1 - OTTER STREET / Alexandria (T) | Address NTU compliance issue, Extend Distribution System, Upgrade Distribution System | 60 | $3,600,000 | H | $48,425,912 |
| 18099 | St.Lawrence | TRI-TOWN WD / Brasher (T) | Address Coliform violations, New Complete System (New System), New System Consolidation | 1,250 | $8,004,765 | H | $56,430,677 |
| 17514 | Cattaraugus | DELEVAN VILLAGE / Delevan (V) | New Surface Water Treatment Rule Compliance Facility, Upgrade Ground Water Source, Upgrade Storage, Upgrade Distribution System | 1,090 | $1,690,350 | H | $58,121,027 |
| 17289 | Wayne | WOLCOTT VILLAGE / Wolcott (V) | New Surface Water Treatment Rule Compliance Facility, New Water Treatment Plant, Upgrade Ground Water Source | 2,200 | $1,250,000 | H | $59,371,027 |
| 17622 | Chautauqua | BROCTON VILLAGE / Brocton (V) | Address turbidity violations, Surface Water Treatment Rule Compliance Facility, Upgrade Water Treatment Plant | 4,000 | $3,295,000 | H | $62,666,027 |
| 17385 | Onondaga | NORTHEAST LAFAYETTE WD / East Syracuse (V) | Inter-connection to eliminate GWUDI source., New Surface Water Treatment Rule Compliance Facility, New Transmission, New Inter-Connection | 250 | $535,600 | H | $63,201,627 |
| 18184 | Essex | CROWN POINT WD / Crown Point (T) | Replacing wells with organic contamination and replacing mains with severe break history., Upgrade Water Treatment Plant, New Ground Water Source, Upgrade Distribution System | 995 | $1,135,775 | H | $64,337,402 |

## NYS Drinking Water State Revolving Fund
## Final IUP Category C Hardship List for October 1, 2016 to September 30, 2017

| Project | County | System Name/ Borrower | Description | Pop. | Project Cost | Score | Cumulative Total |
|---|---|---|---|---|---|---|---|
| 17619 | Livingston | GENESEO VILLAGE / LCWSA | New Surface Water Treatment Rule Compliance Facility | 7,600 | $813,000 | H | $65,150,402 |
| 18257 | Greene | CAIRO WATER DISTRICT / Cairo (T) | Develop redundant water source., New Ground Water Source, Upgrade Storage, Upgrade Distribution System | 725 | $1,400,000 | H | $66,550,402 |
| 17432 | Chautauqua | CASSADAGA VILLAGE / Cassadaga (V) | New Ground Water Source, New Storage, Upgrade Distribution System | 760 | $5,047,000 | H | $71,597,402 |
| 18185 | Oswego | PHOENIX VILLAGE / Phoenix (V) | New Surface Water Treatment Rule Compliance Facility | 2,138 | $212,439 | H | $71,809,841 |
| 18020 | Lewis | WATER DISTRICT #1 / Denmark (T) | Serve private contaminated/poor yielding wells., New Storage, Extend Distribution System | 275 | $1,000,000 | H | $72,809,841 |
| 17597 | Oswego | AREA 1 WATER SYSTEM / Schroeppel (T) | Address organic contaminant violations, New Distribution System, New System Consolidation | 3,200 | $11,312,382 | H | $84,122,223 |

# PROJECT PRIORITY RANKING SYSTEM

**Project Priority Ranking System for the**
**Drinking Water State Revolving Fund (DWSRF)**

## (I) Priority Ranking System and Intended Use Plan

A. Priority Ranking System

The purpose of the priority ranking system is to establish a list of eligible projects to be funded in a manner that the most serious risks to public health are given the highest priority. The New York State Department of Health (NYSDOH) proposes that the highest priority be given to acute public health risks, particularly those related to microbiological organisms. The next priority has been given to situations that pose chronic and longer-term risks to consumers, such as organic chemical contamination. The scoring criteria also considers issues that are related to infrastructure upgrading or replacement. Consistent with these priorities, the numerical scores in the Drinking Water State Revolving Fund (DWSRF) priority ranking system are based on the following criteria:

Technical Factors

A. MCL/Treatment Technique Violations
B. Other Sanitary Code Violations
C. System Reliability/Dependability Issues

Non-Technical Factors

D. Governmental Needs
E. Financial Needs

The total numerical score for a project or a project segment will be the sum of the scores for criteria A, B, C, D and E.

B. Intended Use Plan

The State will prepare a document called the Intended Use Plan (IUP) that describes how the State intends to use available DWSRF resources for the year to meet the objectives of the Safe Drinking Water Act (SDWA) and to further the goal of protecting public health. The IUP will include specific detail on how the State will use all funds available. The IUP will also include a list of projects expected to qualify for financing within the fiscal period addressed by the IUP. A project must be listed in an IUP to be eligible for financing.

## (II) Project Ranking

A. Special Allocations and Restrictions

The federal Safe Drinking Water Act Amendments of 1996 (SDWA) require that, on an annual basis, water systems serving fewer than 10,000 persons must receive a minimum of 15% of the DWSRF. This minimum allocation for systems serving less than 10,000 persons will occur to the extent that there are a sufficient number of eligible projects to fund.

The SDWA also states that up to 30% of the annual DWSRF federal capitalization grant can be used to give loan subsidies to disadvantaged communities.

The State of New York will impose an annual cap or ceiling of 50% of DWSRF resources that can be received by any single applicant. In addition, the State may limit DWSRF financing to the demonstrated annual cash flow needs of any single applicant.

The New York State Clean Water/Clean Air Bond Act of 1996 requires the development of a Memorandum of Understanding among the Governor and Legislative Leaders regarding selection of projects to be funded from the Drinking Water provisions of the Bond Act. Projects identified in the Memorandum of Understanding will be incorporated into an annual funding list for Bond Act financing in conjunction with projects selected according to the Priority Ranking System.

B. Project Ranking Categories

Projects will be placed in categories to allow priority ranking within a specific grouping of projects. Federal legislation requires that, on an annual basis, a minimum of 15% of the DWSRF be received by water systems serving fewer than 10,000 people. Also, water systems that qualify for financial hardship have special conditions that require a separate category for these projects. Therefore, three priority ranking categories will be created:

1. Category A. Water systems serving > 10,000 people.
2. Category B. Water systems serving < 10,000 people.
3. Category C. Water systems that have received written confirmation of qualification for financial hardship assistance.

C. Description and Use of the Project Lists

Several lists of projects will be created to organize and manage projects with different levels of priority and readiness. These listings will display the status of all projects in the system and indicate the final list of projects that qualify for funding in the current IUP.

1. Multi-Year List:

   This list will contain all eligible projects for which pre-application forms have been submitted and reviewed. This list will contain projects from Categories A and B. New projects can be added to this list on a continuous basis.

2. Hardship List:

This list will contain all projects with written confirmation that they qualify for financial hardship assistance (Category C). This written confirmation will be limited to projects that have a total numerical score greater than (or equal to) the project with the lowest score (excluding bonus points awarded under Section II.E.2.) eligible to be funded from the current Project Annual List. Written qualification for financial hardship assistance will remain valid for two consecutive annual federal funding cycles.

3. Project Annual List:

This list will contain Category C projects and the projects from the Multi-Year List which are anticipated to be ready for long-term financing during the effective period of the IUP. Applicants for these projects are expected to apply for the funds projected to be available during the fiscal period addressed by the IUP. Projects from Categories A and B will be listed in descending order of total numerical score (resulting from the Priority Ranking System Scoring Criteria).

4. Funding List:

This list will include all projects from the Project Annual List expected to qualify for long-term loans within a particular IUP. Projects will be listed according to the three project categories. All Category C that are on the Project Annual List will qualify for funding. Projects in Category A will then be selected from the Project Annual List in priority order to meet the 15% minimum requirement for water systems serving less than 10,000 people. All remaining projects on the Project Annual List will be selected in priority order until the remaining annual DWSRF funding amount is encumbered. The project selection is subject to Restrictions and Project By-pass Criteria in Sections II.A and D of this document.

D. Project By-pass

Projects on the Project Annual List can be by-passed, if any of the following occurs:

1. Project is withdrawn by the applicant.

2. Project does not meet the dates and/or conditions in the project schedule or the Project Financing and Loan Agreement.

3. The applicant has reached the 50% annual DWSRF resources cap for fundable projects on the Project Readiness List. All other projects for the applicant that would exceed the 50% cap will be by-passed.

E. Special Priorities

1. Emergencies:

An emergency is a catastrophic situation that results in an imminent threat to public health. The determination of when an emergency exists will be made by the NYS DOH. Imminent threats to public health include situations that result in the unavailability of a source of potable drinking water for an extended period of time. Projects designed to address emergencies will receive the highest priority ranking.

2. Projects with Prior Funding Agreements:

Projects with executed Project Financing and Loan Agreements for long-term and short-term DWSRF loans will be given significant additional bonus points when they are placed on the Project Annual List. This will help to ensure the availability of DWSRF financing needed for completion of on-going projects.

Phased or segmented projects for which additional funds have been conditionally committed in an executed Project Financing Agreement (PFA) for long-term DWSRF financing will be listed, in descending priority score order. These projects will be assigned 2000 points in addition to their total project ranking system score.

Projects for which funds have been committed in an executed PFA for short-term DWSRF financing will be listed, in descending priority score order. These projects will be assigned 1000 points in addition to their total project ranking system score. Other projects will then be listed in descending priority score order.

F. Tie Breaking

In the event of a tie score for projects, the higher total score under Technical Factors (Criteria A, B and C) will be used as a tie breaker. If this still results in a tie score, the size of the population served by the system will be used as a tie breaker. The larger population will be given preference.

G. Eligible Project Limitation

Eligible projects are activities that address critical water system problems. The NYS DOH may require separation of unrelated project components into separate projects if it is necessary to focus on critical water system problems. These separate projects will be scored independently. Projects must be adequately supported by technical documentation, data, reports, etc.

## (III) Priority Ranking System Scoring Criteria

The numerical scores in the DWSRF priority ranking system are based on technical and non-technical criteria. The technical criteria are A.) MCL/treatment technique violations; B.) Other sanitary code violations; and C.) system reliability and dependability issues. The non-technical criteria are D.) governmental needs and E). financial needs. The total numerical score for the project or project segment being scored shall be the sum of the scores for criteria A, B, C, D and E. Projects must be adequately supported by technical documentation, data, reports, etc.

Technical Factors

A. MCL/Treatment Technique Violations. Points awarded are based on treatment of MCL exceedances and/or replacement with an alternate source of supply, and for interconnection with, or purchase from adjacent water system(s) in lieu of treatment (more than one item may apply):

| | Score |
|---|---|
| 1. Microbiological | |
| a) Surface Water Treatment Rule | |
| i. Filtration | 100 |
| ii. Filtration Performance Criteria (NTU compliance) | 50 |
| iii. CT Disinfection | 30 |
| b) *E. coli* | 80 |
| c) Total Coliform | 40 |
| 2. Organics | |
| Organic chemicals (POC/UOC) and disinfection by-products | 40 |
| 3. Lead and Copper/Corrosion (mandated) | 30 |
| 4. Radiological | 25 |
| 5. Inorganic/Physical | |
| a) Nitrates | 50 |
| b) Other health-related | 25 |
| c) Aesthetic | 10 |

B. Non-treatment Sanitary Code Violations (more than one item may apply):
The project need must be adequately supported by technical documentation, data, reports, etc.

| | |
|---|---|
| 1. Inadequate Source Capacity (public health hazard) | 50 |
| 2. Inadequate Distribution Pressure (public health hazard) | 25 |
| 3. Uncovered Finished Water Storage (public health hazard) | 25 |

C. System Reliability/Dependability Issues (more than one item may apply): Score

The project need must be adequately supported by technical documentation, data, reports, etc.

1. Complete replacement or major rehabilitation of existing treatment facility for primary contaminants that has exceeded design life and/or does not meet the design standards in the current edition of Recommended Standards For Water Works. In lieu of treatment, replacement with an alternate source of supply, and/or interconnection with, or purchase from, adjacent water system. — 20

2. Upgrade, replace and/or install major vulnerable system components to meet the design standards in the current edition Recommended Standards For Water Works. Any of the following apply. — 10

   a) A principal component integral to an existing filtration process such as sedimentation, flocculation, filtration, chemical feed, or backwashing (can only receive points for Criteria C.2a. or C.1.)

   b) Pump stations

   c) Existing wells

   d) Existing disinfection system for a groundwater/surface water supply

   e) Transmission main

   f) Finished water or distribution storage

   g) Other water treatment systems for secondary contaminants only (or replacement of source instead of treatment)

3. Aged mains and appurtenances — 5
4. Redundancy of critical components (pumps, valves, chemical feed-systems, etc.) — 5
5. Asbestos main replacement — 5
6. Control/automation for operational efficiency (computerization, control valves, metering, laboratory upgrading) — 5
7. Inadequate source capacity which is not a public health hazard (can only receive points for Criteria B1 or C7) — 5

Non-Technical Factors: Score

D. Governmental Needs (more than one may apply)

Additional points will be assigned to a project on the basis of state or local government needs, policies, and/or requirements.

| | |
|---|---|
| 1. Development of a water system or extending existing system to service contaminated or insufficient yielding private wells at existing residential housing (new systems are not eligible for points under Criteria A, B or C) | 40 |
| 2. Consolidation of water systems (can include improving technical, managerial and financial capacity development) | 25 |
| 3. System dependent on a Sole Source Aquifer for its source. (These points can only be obtained if system scores points from Criterion A, B, C.1. or C.2.g.) | 25 |
| 4. A project that has received written commitment of funding from another governmental source (e.g., co-funded with Clean Water SRF, Rural Development, HUD, etc.) These points do not apply to refinancing of projects. | 10 |
| 5. Consistent with Water Resources Management Strategy | 5 |
| 6. Proposes operational changes that improve and insure adequate technical, managerial and financial capacity of the system in order to insure compliance | 5 |

E. Financial Need

The Median Household Income (MHI) of the community in which the water service area is located is used as a numerator and the Statewide MHI is used as the denominator in the following equation to determine the financial need factor.

$$\frac{\text{Community MHI x 100}}{\text{Statewide MHI*}} = \text{Factor}$$

| Factor | ≤70 | >70 -≤77.5 | >77.5 - ≤85 | >85 - ≤92.5 | >92.5 - ≤100 | >100 |
|---|---|---|---|---|---|---|
| Points | 25 | 20 | 15 | 10 | 5 | 0 |

*2013 MHI is $58,003.

The MHI of the community in which the water service area is located and the Statewide MHI will be determined from the 2013 U.S. Census Bureau's American Community Survey 5 year income data. If there is reason to believe that the census data is not an accurate representation of the MHI within the area to be served, the reasons the will be documented and applicant will furnish, or the Department may obtain, additional information regarding the MHI. Information will consist of reliable data from local, regional, state or federal sources or from an income survey conducted by a reliable impartial source. Communities have the option of conducting an income survey to ensure the accuracy of the MHI used.

## Appendix A. Glossary of Terms

CT - The product of the free residual disinfectant concentration (C) in milligrams per liter determined before or at the first customer, and corresponding disinfectant contact time (T) in minutes, expressed by the formula (C) x (T) = CT. (10 New York Code of Rules and Regulations (NYCRR) Part 5, Subpart 5-1, Public Water Systems.)

DWSRF - Drinking Water State Revolving Fund. A fund for financing, planning, design and construction of drinking water projects.

*E. coli* - *Escherichia coli*. A microscopic organism of fecal origin.

HUD - United States Department of Housing and Urban Development.

MCL - Maximum Contaminant Level. The maximum permissible level of a contaminant in water which is delivered to any user of a public water system as specified in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

MHI - Median Household Income.

NTU - Nephelometric Turbidity Unit. The system under which measured turbidity is reported.

PFA - Project Financing Agreement. An agreement between the NYS Environmental Facilities Corporation and a loan recipient in order to provide financial assistance from the DWSRF for an eligible project.

POC - Principal Organic Contaminant. Any organic chemical compound belonging to specific chemical classes as described in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

Primary Contaminants - Any contaminant for which a maximum contaminant level has been established for protection of public health.

Secondary Contaminants - Any contaminant for which a maximum contaminant level has been established for reasons other than protection of public health (i.e., aesthetic purposes such as taste, odor and staining of fixtures).

Surface Water Treatment Rule - A regulation that requires that all surface water be treated in accordance with 10 NYCRR Part 5, Subpart 5-1, Section 5-1.30, Public Water Systems.

UOC - Unspecified Organic Contaminant. Any organic chemical compound not otherwise specified in 10 NYCRR Part 5, Subpart 5-1, Public Water Systems.

# ATTACHMENT II

# ANTICIPATED INTENDED USE PLAN SCHEDULE FOR THE October 1, 2016 - SEPTEMBER 30, 2017 FUNDING PERIOD

## Anticipated Intended Use Plan Schedule for the October 1, 2016 to September 30, 2017 Funding Period

**July 13, 2016----------**Draft IUP Released

**August 3, 2016----------**Public Webinar 10:00 AM (See Attachment VII)

**August 24, 2016----------**Public Hearing 3:00 PM (See Attachment VII)

**September 2, 2016---------**Close of Draft IUP Comment Period (See Attachment VII)

**October 1, 2016----------**Start of the FFY 2017 financing period

**March 01, 2017----------**Cut-off date for receipt of complete applications for non-hardship projects

**May 1, 2017----------**Cut-off date for new or revised listing forms for inclusion the FFY 2018 Draft IUP

**September 1, 2017---------**Cut-off date for new or revised listing forms for inclusion the FFY 2018 Final IUP

**To be determined----------**Leveraged financing

**September 30, 2017--------**End of financing period.

**To be determined----------**Principal Payment Dates for Leveraged Financing Projects. (Note: Principal and Interest payments will be required in 2017 on new leveraged financings, and recipients should contact EFC to discuss payment schedules and redemption dates on BANs to be refinanced with the DWSRF.)

# ATTACHMENT III

# FINANCING FEES
# AND
# FINANCING OPTIONS

# Financing Fees

**Issuance Costs**

Fees associated with processing a DWSRF financing are based on the amount financed (i.e., project costs). Issuance costs are calculated as follows:

Program Administration: This cost is calculated by multiplying the project costs by 1.1%. This fee is used to support the administration of the DWSRF program. For non-hardship projects that receive short-term financing, an administrative fee equal to 0.6% will be charged.

Direct Expenses: The direct expense is calculated by multiplying the project costs by 1.0%. Direct Expenses represent the recipient's proportionate share of EFC's costs to complete the transactions necessary for a bond sale and include bond counsel costs, financial advisor fees, printing costs, rating agency fees and trustee fees.

State Bond Issuance Charge:
Certain Public Authorities that sell bonds, including EFC, must collect the State Bond Issuance Charge as required by Section 2976 of the Public Authorities Law. The Issuance Charge applies only to leveraged financings. As permitted by law, EFC has obtained the NYS Division of Budget's approval of a State Bond Issuance Charge partial waiver through March 31, 2017. For planning purposes, applicants applying for financing after March 31, 2017 (Leveraged or Guarantee) should use 0.84% of the total of Project Costs and Direct Expenses as the rate for this charge. The rate for leveraged financings through March 31, 2017 would be determined as follows:

| Financed Amount | Rate |
|---|---|
| $1,000,000 or less | 0.168% |
| $1,000,001 - $5,000,000 | 0.336% |
| $5,000,001 - $10,000,000 | 0.504% |
| $10,000,001 - $20,000,000 | 0.672% |
| More than $20,000,000 | 0.840% |

**Maintenance Charge**

An annual fee is charged to defray the cost of maintaining financing accounts during the life of the financing. This fee is calculated as 0.11 percent of the outstanding financing balance.

Exceptions to the above fees apply to certain financings. EFC will work with the applicant to determine the appropriate DWSRF financing type. Fees apply to the different types of DWSRF financing as follows:

Long-Term Leveraged Financing
- Program administration fee
- Direct expenses
- State bond issuance charge
- Maintenance charge

Long-Term Direct Financing
- Program administration fee
- Direct expenses
- Maintenance charge

Reduced Interest Rate Direct Financing

- All fees waived

Short-Term Interest Free Financing

- Program administration fee for non-hardship projects

Short-Term Market Rate Financing

- All fees waived

SRF Bond Market Rate Program

- Direct expenses
- State bond issuance charge
- Maintenance charge applies only if, and after, subsidy assistance becomes available

SRF Bond Guarantee Program

- Direct expenses

**Disbursement Requests**

Once a financing has closed, the project funds not disbursed at closing will be available on a weekly basis provided an acceptable disbursement request, supported with proper cost documentation, has been submitted to EFC. Disbursement request forms will be included in the PFA that the recipient will execute to obtain financing. The recipient should make certain proper financial coverage is in place in the event that a disbursement is delayed, denied or adjusted.

Disbursement request forms can be submitted via:

1. Mail to: NYS Environmental Facilities Corporation, 625 Broadway, Albany, NY 12207-2997

2. Fax to: (518) 402-7085

3. E-mail to: DisbursementRequests@efc.ny.gov. Note: TThis email address should only be used for the submission of the disbursement request and supporting documentation for that request. Additional documentation or information requested by the assigned Financial Analyst should be sent directly to the analyst.

Further information about the disbursement request process is available in the "Disbursement Request Information Sheet" which is one of the reference and guidance documents in the financing application package.

## New York Drinking Water State Revolving Fund
# FINANCING OPTIONS

The DWSRF provides short-term and long-term funding for eligible projects. In addition to the traditional DWSRF interest rate subsidy for projects, the EFC has developed a second set of financing options for projects that are either:

a) Not reachable for subsidized financing on the current Annual List in the DWSRF Intended Use Plan (IUP), or

b) Need financing for eligible project costs above the subsidized amount available on the Annual List.

Please keep the following in mind:

- All projects should be listed on the IUP Annual List.
- No financings may be for a term in excess of the useful life of the project.
- The by-pass process may impact the availability of financing (see IUP for further information). A project below the subsidized funding line but ready for financing may be financed with the long-term market-rate or short-term market-rate options, which then may be automatically converted to interest-subsidized financing if a project becomes reachable following the by-pass process.

In addition to the financing options in the attached matrix, for projects that demonstrate a need for hardship financing (see the IUP), the DWSRF provides for reduced interest-rate financings (as low as interest-free) and, for qualified projects, grants, to the extent that funds are available.

Short-term financing with either the short-term market-rate or the short-term interest-free program is intended to provide a seamless transition for project financing (minimizing or eliminating the need for other non-SRF funding sources).

# DWSRF Financing Options Matrix

| Timing | Short-Term | | Long-Term | |
|---|---|---|---|---|
| **SRF Project Score** | Above the subsidy line | Projects otherwise not eligible for subsidy | Above the subsidy line | Below the subsidy line |
| **Option** | **Interest-Free** | **Market-Rate** | **Subsidized-Interest** | **Market Rate** **(other than Bond Guarantee)** |
| **Benefit** | 0% Interest (33 1/3% of the lesser of eligible project costs or IUP amount; 100% of the lesser of eligible project costs or IUP amount for Hardship Financings) | AAA/Aaa borrowing rates | AAA/Aaa borrowing rates, plus 33 1/3% subsidized interest rate for up to 30 years | AAA/Aaa borrowing rates |
| | | | Economies of scale in SRF bond issue | |
| **Interest Rate Subsidy Timing** | No interest expense | Based on MMD AAA one year rate plus EFC cost of funds | Available from closing | Not available initially; available in the year the project score is above a future funding line |
| **Fees (as a % of SRF – Financed project costs unless otherwise noted)** | None | 0.6% program administrative fee | a. 1.0% direct expense<br>b. 1,1% program administrative fee<br>c. State Bond Issuance Charge | a. 1.0% direct expense |
| | | | c. 0.11% Annual administrative fee on outstanding balance | c. None initially; 0.25% annually on outstanding balance should recipient become eligible and receive subsidy |
| **Availability** | Available for up to 3 years or readiness for long-term financing, whichever is sooner, for a recommended minimum term of six months | | Ongoing, may be financed pursuant to a leveraged financing schedule. Repayment term up to 30 years from long-term closing. | |
| **Project Status** | Approved engineering report, environmental review completed and other approvals as necessary for short-term financing. | | Final costs known. Project approvals and permits obtained. and major contracts awarded. | |

Phone: (518) 402-7650

**Or Email to: bpwsp@health.ny.gov**

**Form Revised July 8, 2015**

## INSTRUCTIONS
## LISTING FORM, DWSRF PROJECT SCHEDULE AND COST ESTIMATE

This form is used to gather preliminary schedule and cost information about your project. It will help us to determine project eligibility and a target date for providing your DWSRF financing. New York State Department of Health (DOH) staff may call you to verify this information and to develop a more detailed schedule for completion of all activities needed for a complete financing application. You should confer with your engineer and financial advisor regarding the schedule and cost estimate. Please call DOH at 1-800-458-1158 (within NYS State) or (518) 402-7650 for assistance regarding this Listing Form.

**PROJECT INFORMATION** This section of the form should include the **Name of the Water System**, **Name of the Municipality** serviced by the water system, and the **County** and **Legislative Districts** in which the project is located. A **Project Description** and the **Location** of the project should also be included (*e.g.,* Construct new water treatment plant at 69 Mill Road in Village of Waterburgh. If an engineering report has not been provided with this form, please attach a narrative description including details with respect to the issues the project will be solving as related to the priority ranking system (see Attachment 1 in the IUP). The applicant should provide information regarding the **Population Served by the Water System** and the **Population Served by the Project**.

**Has the project been listed in a previous DWSRF Intended Use Plan (IUP)?** If a Listing Form (previously called pre-application) has previously been submitted for the same project, it is not necessary to complete an additional Listing Form. If project information, contact information, actual or targeted activity dates, or project cost estimates previously submitted have changed, the applicant may wish to submit a revised Listing Form. If so, please include the **DWSRF project tracking number.**

Indicate if **other funding sources** (i.e., Rural Development, Housing and Urban Development, etc.) are available for the project. If other sources of funding are available please attach a separate sheet with details about the funding source, funding amount, type of funding (*i.e.,* grant, low interest loan), and date the funding was granted (letter of confirmation).

### CONTACT INFORMATION

DOH will be using the contact information provided on the Listing Form to identify the borrower, the consulting engineer, and other key project contacts (if applicable). Individuals listed on this portion of the Listing Form may be contacted directly by DOH staff to answer technical questions.

### PROJECT COST ESTIMATE

The accuracy of project costs will vary depending on the stage of project development. Please use the best available estimate when completing the form. Cost estimates should be provided for **Construction Costs**, **Engineering Fees** (planning, design, and construction phase), **Other Expenses** (legal expenses, bond counsel costs, force account costs, fiscal expenses, interest during construction, and miscellaneous expenses), **Equipment Costs**, **Land Acquisition Costs**, and **Contingencies**. **Financial assistance anticipated from other Funding Sources** (Rural Utilities, Housing and Urban Development, etc.) should be subtracted from the **Subtotal Project Costs** of the above listed cost estimates. The **Estimated Issuance Cost** (approximately 3% of project costs) should be added to the subtotal to determine **Total Amount to Finance**. If certain cost elements are unknown and cannot be reasonably estimated, please indicate on the form. Estimates for all expenses will eventually be needed so that sufficient monies for the project are included in the IUP.

### PROJECT SCHEDULE

1. Provide the date (targeted or actual) when an approvable **Engineering Report** and all **Technical Submittals** will be completed. Required Technical Submittals include environmental review documents and findings, final plans and specifications, engineer's certification of technical requirements, certification of title to project sites, Minority & Women's Business Enterprise - Equal Opportunity (M/WBE-EEO) program documents. Additionally, the borrower should contact DOH and other responsible permitting agencies (e.g., New York State Department of Environmental Conservation) for anticipated review and issuance times. Please contact EFC for applicable financing application deadlines and anticipated financing closing dates.
2. Provide the date (targeted or actual) of **Start of Construction** (*i.e.,* date Notice to Proceed was issued). Although the construction schedule may be very tentative when you complete the pre-application, it is important to set target dates as they indicate when DWSRF financing will be needed.

3. Indicate if the project is being submitted for **Refinancing**. If the project is being refinanced, include the actual date of Construction Completion.

A fillable copy of this form is available at www.efc.ny.gov/smartgrowth

NEW YORK STATE OF OPPORTUNITY. | Environmental Facilities Corporation | Department of Health

# Smart Growth Assessment Form

## New York State Drinking Water State Revolving Fund (DWSRF)

This form must be submitted with all new project listing forms and should be completed by the applicant's project engineer or other design professional.[1]
Please refer to EFC's "Smart Growth Guidance".[2]

### Applicant Information

DWSRF Applicant: DWSRF No.:

Project Name:

Is project construction complete? ☐ Yes, date: ☐ No

Project Summary: (provide a short project summary in plain language including the location of the area the project serves)

### Section 1 – Screening Questions

**1. Prior Approvals**

1A. Has the project been previously approved for DWSRF financing? ☐ Yes ☐ No

1B. If so, what was the DWSRF project number(s) for the prior approval(s)? DWSRF No.:

Is the scope of the project substantially the same as that which was approved? ☐ Yes ☐ No

IF THE PROJECT WAS PREVIOUSLY APPROVED BY EFC'S BOARD AND THE SCOPE OF THE PROJECT HAS NOT MATERIALLY CHANGED, THE PROJECT IS **NOT** SUBJECT TO SMART GROWTH REVIEW. SKIP TO SIGNATURE BLOCK.

**2. New or Expanded Infrastructure**

2A. Does the project add new water mains or a new treatment plant? ☐ Yes ☐ No
*Note: A new infrastructure project adds water mains or treatment plants where none existed previously*

2B. Will the project result in an increase such that a NYSDEC water withdrawl permit will need to be obtained or modified or will it result in the NYSDOH approving an increase in the capacity of the water treatment plant? ☐ Yes ☐ No
*Note: An expanded infrastructure project results in an increase of the permitted water withdrawl or an increase in the permitted flow capacity for the water treatment system*

IF THE ANSWER IS "NO" TO BOTH "2A" AND "2B", THE PROJECT IS **NOT** SUBJECT TO FURTHER SMART GROWTH REVIEW. SKIP TO SIGNATURE BLOCK.

[1] If project construction is complete and the project was not previously financed through the DWSRF, an authorized municipal representative may complete and sign this assessment.

[2] Available at www.efc.ny.gov/smartgrowth

**3. Court or Administrative Consent Orders**

3A. Is the project expressly required by a court or administrative consent order? ☐ Yes ☐ No

3B. If so, have you previously submitted the order to NYS DOH? If not, please attach. ☐ Yes ☐ No

## Section 2 – Additional Information Needed for Relevant Smart Growth Criteria

DOH has determined that the following smart growth criteria are relevant for DWSRF projects and that projects must meet each of these criteria to the extent practicable:

**1. Uses or Improves Existing Infrastructure**

1A. Does the project use or improve existing infrastructure? ☐ Yes ☐ No

Please describe:

**2. Serves a Municipal Center**

Projects must serve an area in either 2A, 2B or 2C to the extent practicable.

2A. Does the project serve an area **limited** to one or more of the following municipal centers?

i. A City or incorporated Village ☐Yes ☐No

ii. A central business district ☐Yes ☐No

iii. A main street ☐Yes ☐No

iv. A downtown area ☐Yes ☐No

v. A Brownfield Opportunity Area ☐Yes ☐No
(for more information, go to www.dos.ny.gov & search "Brownfield")

vi. A downtown area of a Local Waterfront Revitalization Program Area ☐Yes ☐No
(for more information, go to www.dos.ny.gov and search "Waterfront Revitalization")

vii. An area of transit-oriented development ☐Yes ☐No

viii. An Environmental Justice Area ☐Yes ☐No
(for more information, go to www.dec.ny.gov/public/899.html)

ix. A Hardship/Poverty Area ☐Yes ☐No
*Note: Projects that primarily serve census tracts and block numbering areas with a poverty rate of at least twenty percent according to the latest census data*

Please describe all selections:

2B. If the project serves an area located outside of a municipal center, does it serve an area located adjacent to a municipal center which has clearly defined borders, designated for concentrated development in a municipal or regional comprehensive plan and exhibit strong land use, transportation, infrastructure and economic connections to an existing municipal center? ☐Yes ☐No

Please describe:

2C. If the project is not located in a municipal center as defined above, is the area designated by a comprehensive plan and identified in zoning ordinance as a future municipal center? ☐Yes ☐No

Please describe and reference applicable plans:

**Signature Block:** By entering your name in the box below, you agree that you are authorized to act on behalf of the applicant and that the information contained in this Smart Growth Assessment is true, correct and complete to the best of your knowledge and belief.

## DRINKING WATER STATE REVOLVING FUND PUBLICALY OWNED APPLICATION CHECKLIST

The application checklist includes a list of application items that may apply to a DWSRF project. The checklist includes boxes to indicate which items have been submitted to DOH and EFC. There are two application checklists: one for publicly owned projects, which follows, and one for privately owned projects. The checklists are also available on the EFC web site at www.nysefc.org and click on "Drinking Water State Revolving Fund", then "Application Process" then DWSRF Application Materials for either: Publicly-Owned Municipal Systems or Privately-Owned Systems

NEW YORK STATE OF OPPORTUNITY. | Environmental Facilities Corporation | Department of Health

(518) 402-7086 (f)

**www.efc.ny.gov/DWSRF**

## New York Drinking Water State Revolving Fund

# PUBLICLY-OWNED SYSTEMS:
## APPLICATION CHECKLIST

This checklist will assist in determining the documents and information that are needed to apply for financing through the DWSRF. An explanation of each of these items is provided in the "Description of Application Components." The items necessary for closing and the type of financing offered to you will be determined by your project status and your funding needs. Please contact EFC at 518-402-7085 to review this checklist and if you have any questions.

**Please do not submit a Financing Application until your project is listed on the Annual Project Priority List, as published in the current DWSRF Intended Use Plan (IUP), and the critical components identified in PART I have been completed.**

**Please note that EFC will not begin to process a Financing Application until the items identified in Part I have been received and your Engineering Report has received regulatory approval and has been deemed eligible for DWSRF financing.**

**Items in Part I MUST be included with your application for financing. Items in Part II should be submitted with Part I items, if they are currently available.**

### PART I – Items Required to Process an Application for DWSRF Financing

**Check the appropriate boxes below.**

**Applicant Name:** _____

**DWSRF Project No.:** _____

**Date Prepared:** _____

## PUBLICLY-OWNED SYSTEMS: APPLICATION CHECKLIST

**Please call EFC to review the Checklist at the beginning of the application process.**

DOH/EFC Project Team Members

DOH Engineering: _____
EFC Finance: _____
EFC Legal: _____
EFC MWBE: _____

(Team member names will be provided after your application is submitted.)

## PART I – Items Required to Process an Application for DWSRF Financing

**Check the appropriate boxes below.**

| No. | Checklist Item | Submitted Earlier | Submitted with this Application |
|---|---|---|---|
| 1. | Application Form [1] | ☐ | ☐ |
| 2. | Municipal Bond Resolution(s) | | |
| | a) Bond Resolution (Certified Copy) | ☐ | ☐ |
| | b) Proof of Publication of Permissive Referendum (if applicable) | ☐ | ☐ |
| | c) Proof of Publication of Estoppel Notice | ☐ | ☐ |
| 3. | Environmental Review Documents and Findings [2] (see SEQRA/SERP guidance in the "Environmental Review Requirements" ) | ☐ | ☐ |
| | OPRHP / SHPO Project Review Letter [2] (Initial or Final Letter) | ☐ | ☐ |
| 4. | District Formation/Increase Authorization | ☐ | ☐ |
| 5. | Agreement for Engineering Planning Services | ☐ | ☐ |

**Applicant Name:** _____

**DWSRF Project No.:** _____

**Date Prepared:** _____

**PART II – Items that may be necessary to close a DWSRF financing and/or disburse funds.**

Your project status and financing needs will determine the type of financial assistance offered by EFC and the timing of the closing.

Timely availability of DWSRF funds will be dependent, in part, upon the accuracy and completeness of these submissions. EFC will review the submissions and may provide comments or request clarification. For this reason, applicants are strongly encouraged to develop and submit these materials, as soon as practicable.

**Please call EFC to discuss which of the following items apply. Check the appropriate boxes below.**

| No. | Checklist Item | Submitted Earlier | Submitted with this Application | Not Applicable |
|---|---|---|---|---|
| 1. | Financial statements (audited if available) for the three (3) most recent fiscal years. (For Applicants other than counties, cities, towns and villages) | ☐ | ☐ | ☐ |
| 2. | Co-funding Documentation | | | |

# OUTPUT AND OUTCOME MEASURES

# Environmental Results Grant Requirements

As required by US EPA Order 5700.7, Environmental Results under US EPA Assistance Agreements, New York will provide the following output and outcome measures as applicable in its DWSRF Biennial/Annual Reports. NIMS, PBR and the IUP:

**NATIONAL REPORTABLE OUTPUTS/OUTCOMES FOR DWSRF**

1. The annual percentage of assistance agreements to bring entities into compliance.
2. Fund utilization rate [cumulative financing agreement dollars to the cumulative funds available for projects] for the DWSRF.
3. Return on Federal Investment [cumulative dollar amount of assistance disbursements to projects divided by cumulative federal outlays for projects].
4. The cumulative number of project completions.

**ANTICIPATED OUTPUTS ESTIMATES FOR DWSRF**

1. Number of binding commitments (25).
2. Number of financing agreements (25).
3. Number of assistance agreements for system compliance (23).
4. Number, dollar amounts, and/or population served of projects financed (50/$150M).
5. Fund utilization rate remaining higher than the national average.
6. Rate at which projects progressed as measured by disbursements as a percent of assistance provided remaining at or higher than the national average.

**ANTICIPATED OUTCOMES (SHORT-TERM/LONG-TERM) ESTIMATES FOR DWSRF**

1. Number of projects initiating operation resulting in improved compliance (5).
2. Improved compliance for systems receiving DWSRF assistance. (7)

**ANTICIPATED OUTPUTS ESTIMATES FOR SET-ASIDES**

1. Small System Technical Assistance
   - Number of systems receiving training (400).
   - Number of systems receiving on-site technical assistance (100).
2. State Program Management
   - Data management system maintained.
   - State required updates to primacy made.
3. Source Water Protection Program
   - Number of source water strategies in place and implemented (15).
4. Capacity Development Program
   - Implement statewide strategy.

**ANTICIPATED OUTCOMES (SHORT-TERM/LONG-TERM) FOR SET-ASIDES**

1. Improved compliance for systems receiving Technical Assistance.
2. Attainment of primacy for new rules.
3. Improved data quality.
4. Improvement to capacity development baseline.

# ATTACHMENT VII

**Public Comments, Responses & Revisions on the FFY 2017 DWSRF Draft Intended Use Plan**

The Notice of Availability of the Federal Fiscal Year 2017 Draft Intended Use Plan was published in the Environmental Notice Bulletin on July 13, 2016. The Environmental Facilities Corporation and the Department of Health hosted a public webinar on August 3, 2016 and a public hearing on August 24, 2016. The webinar and public hearing presented an overview of the Federal Fiscal Year 2017 DWSRF Intended Use Plan and provided the opportunity for the public to provide input and ask questions about the program. The public comment period for the Draft Intended Use Plan was from July 13, 2016 through September 2, 2016.

**Program Specific Comments:**

The Department of Health received no program specific comments during the FFY 2017 DWSRF Draft Intended Use Plan public comment period.

**Project Specific Comments:**

Project specific comments were made during the comment period and details related to those project specific changes are included in Appendix 1 of this Intended Use Plan.

**Minor revisions:**

- Incorporated the items from Section 2.0 of the Draft Intended Use Plan under "Program Changes Adopted in Prior FFYs" into the appropriate sections of the Intended Use Plan**.**

- The addition of two sections including:
    - Section 10.0 – "Federal and State Program Requirements"
        - This addition was done to incorporate certain items into the body of the Intended Use Plan that already existed in Section 2 of the Draft Intended Use Plan under "Program Changes Adopted in Prior FFYs".

    - Section 11.0 – "How to get a Project Listed on the Intended Use Plan"
        - This addition was made to provide general guidance to prospective applicants on how to get a project listed on the Intended Use Plan.

- A list of acronyms used in the Intended Use Plan was added after the Table of Contents

- Various other corrections of typographical errors.

None of the minor revisions cited above impacted any project listed on the Intended Use Plan nor provided for any programmatic changes between the Draft and Final Intended Use Plans.

# Summary of Project List Changes

# I. Project Annual List

## I. A. Project Annual List Additions

| Project | County | System Name/ Borrower | Description | Project Cost | Score | Comments |
|---|---|---|---|---|---|---|
| **18366** | **Delaware** | EAST BRANCH VALLEY INC / Hancock (T) | East Branch Water District., New Surface Water Treatment Rule Compliance Facility, New Water District | **$613,365** | **220** | New project with engineering report received after draft IUP printing. |
| **18381** | **Erie** | LAWTONS WATER CO / North Collins (T) | Aquisition of private water company and improvements to address SWTR & Nitrate issues, New Surface Water Treatment Rule Compliance Facility, Upgrade Distribution System, New Inter-Connection | **$1,125,000** | **180** | New project with engineering report received after draft IUP printing. |
| **18275** | **Essex** | KEESEVILLE V / Chesterfield (T) | Upgrade Water Treatment Plant, Upgrade Storage, Upgrade Distribution System | **$6,405,114** | **150** | Engineering report received after draft IUP printing, project now ready. Updated cost and score based on new information. |
| **18348** | **Delaware** | ROXBURY WATER DISTRICT / Town of Roxbury | Roxbury and Grand Gorge Joint project. , New Surface Water Treatment Rule Compliance Facility, Upgrade Ground Water Source, Upgrade Distribution System | **$3,605,000** | **150** | New project with engineering report received after draft IUP priinting. |
| **18351** | **Oswego** | SANDY CREEK WD3/RICHLAND WD 5 / Sandy Creek (T) | Upgrade Ground Water Source, New Transmission, New Distribution System | **$13,994,000** | **110** | New project with engineering report received after draft IUP printing. |
| **18354** | **Rensselaer** | HOOSICK FALLS (V) PWS / Hoosick Falls (V) | Village Water System Extension to Town Phase 1 - NYS Rt 22 North & South., New Pump Station, Upgrade Distribution System, Extend Distribution System, New System Consolidation | **$5,510,500** | **100** | New project with engineering report received after draft IUP printing. |
| **18349** | **Madison** | WEST CENTRAL WATER IMPROVEMENT PROJECT / Lenox (T) | West Central Water Improvement Project., Extend Distribution System, New System Consolidation, New Water District | **$3,300,000** | **85** | New project with engineering report received after draft IUP printing. |
| **18367** | **Delaware** | FISHS EDDY COMMUNITY WATER SUP / Hancock (T) | Fish's Eddy Water District., New Ground Water Source, Upgrade Distribution System, New Water District | **$356,895** | **80** | New project with engineering report received after draft IUP printing. |
| **18350** | **Madison** | ROUTE 20 WATER DISTRICT / Cazenovia (T) & Nelson (T) | Route 20 Water District., Extend Distribution System, New System Consolidation, New Water District | **$2,850,000** | **75** | New project with engineering report received after Draft IUP printing. |
| **18376** | **Oswego** | RT 11 NORTH/FULLER RD WD PHASE E / Hastings (T) | New Distribution System | **$17,140,000** | **75** | New project with engineering report received after draft IUP printing. |
| **18356** | **Wayne** | WOLCOTT VILLAGE / Wolcott (V) | Upgrade Water Treatment Plant, Upgrade Distribution System | **$8,002,070** | **70** | New project with engineering report received after draft IUP printing. |
| **18347** | **Cayuga** | GENOA-KING FERRY WD / Genoa (T) | Upgrade Ground Water Source, Upgrade Transmission, Upgrade Distribution System | **$1,835,502** | **65** | New project with engineering report received after draft IUP printing. |
| **17632** | **St.Lawrence** | CANTON VILLAGE / Canton (V) | New Ground Water Source, Upgrade Transmission | **$8,596,774** | **55** | Engineering report receoved after draft IUP printing, project now ready. Updated cost based on new information. |

# I. Project Annual List

## I. A. Project Annual List Additions

| Project | County | System Name/ Borrower | Description | Project Cost | Score | Comments |
|---|---|---|---|---|---|---|
| **18345** | **Herkimer** | HERKIMER VILLAGE / Herkimer (V) | Replace Finished Water Transmission Main. Add UV disinfection at WTP., Upgrade Water Treatment Plant, Upgrade Transmission | **$1,524,400** | **55** | New project with engineering report received after draft IUP printing. |
| **18346** | **Delaware** | DENVER WATER DISTRICT / Roxbury (T) | Denver Water Disrict., New Ground Water Source, Upgrade Distribution System | **$1,030,000** | **50** | New project with engineering report received after draft IUP printing. |
| **18377** | **Albany** | ALBANY CITY / | Upper Washington Ave Corridor Improvements., New Storage, New Pump Station | **$2,500,000** | **50** | New project with engineering report received after draft IUP printing. |
| **18378** | **Albany** | ALBANY CITY / Albany (C) | Replace Gas CL2 system., Upgrade Water Treatment Plant | **$2,657,400** | **50** | New project with engineering report received after draft IUP printing. |
| **18304** | **Orange** | WALLKILL CONSOLIDATED WD / Wallkill (T) | Installation of water main to serve the Woodland Acres Community, New Transmission | **$1,012,500** | **50** | Project ommitted from Draft IUP due to data input error. Revised project score from 20 to 50 based on new information. |
| **18359** | **Schuyler** | WATKINS GLEN VILLAGE / Watkins Glen (V) | Upgrade Storage | **$929,511** | **40** | New project with engineering report received after draft IUP printing. |
| **18358** | **Allegany** | ANDOVER VILLAGE PUBLIC WATER / Andover (V) | New Water Treatment Plant, Upgrade Transmission, Upgrade Distribution System, New System Consolidation | **$7,934,502** | **40** | New project with engineering report received after draft IUP printing. |
| **18365** | **Steuben** | SOUTH CORNING VILLAGE / South Corning (V) | New Water Treatment Plant, New Ground Water Source, New Storage | **$2,332,000** | **35** | New project with engineering report received after draft IUP printing. |
| **18368** | **Allegany** | NEW WD & STORAGE / Almond (V) | New Storage, New Distribution System | **$3,492,000** | **35** | New project with engineering report received after draft IUP printing. |
| **18280** | **Orange** | KIRYAS JOEL VILLAGE / Village of Kiryas Joel | Comprehensive water meter replacement., Upgrade Distribution System | **$1,582,277** | **30** | Engineering report received after draft IUP printing, project now ready. |
| **18369** | **Allegany** | ALMOND VILLAGE PUBLIC WATER / Almond (V) | Upgrade Water Treatment Plant, Upgrade Storage, Upgrade Distribution System | **$922,000** | **25** | New project with engineering report received after draft IUP printing. |
| **18352** | **Ontario** | TANK REPLACEMENT&TRANSMISS MAIN / Farmington (T) | New Transmission, Upgrade Storage | **$9,307,080** | **15** | New project with engineering report received after draft IUP printing. |
| **18371** | **Orange** | MAYBROOK VILLAGE / Village of Maybrook | New Storage | **$1,292,253** | **15** | New project with engineering report received after draft IUP printing. |

## I. A. Project AnnualList Additions

| Project | County | System Name/ Borrower | Description | Project Cost | Score | Comments |
|---|---|---|---|---|---|---|
| **18333** | **Albany** | MENANDS VILLAGE / Menands (V) | South End Water Systen Improvements., Upgrade Distribution System | **$2,918,000** | **15** | Engineering report received after Draft IUP printing. |
| **18306** | **Orange** | WALLKILL CONSOLIDATED WD / Wallkill (T) | Replacement of aged water mains, Upgrade Distribution System | **$1,250,000** | **10** | Project ommitted from draft IUP due to data input error. |

| Total # Projects | Total Cost |
|---|---|
| **28** | **$114,018,143** |

# I. Project Readiness List

## I. B. Project Readiness List Deletions

| Project | County | System Name/ Borrower | Description | Project Cost | Score | Comments |
|---|---|---|---|---|---|---|
| **17438** | **Oneida** | ROME CITY / Rome (C) | SWTR LT 2 Compliance incl. UV and Covered Storage, (removed Phase 2 Project# 18023 from IUP & recombined back into this project)., Upgrade Water Treatment Plant, New Storage | **$4,000,000** | **1,165** | Project financed during previous funding cycle after Draft IUP release. |
| **17337** | **Erie** | HUNTERS CREEK MOBILE HOME PARK / Hunters Creek MHP | Address total coliform detections and organic exceedances, Upgrade Water Treatment Plant, New Storage, New Pump Station, Upgrade Distribution System | **$175,100** | **185** | Project moved to multi-year list due to inaction since original listing in 2003 and a change in system ownership after the original listing submittal. |
| **17355** | **Yates** | DRESDEN VILLAGE / Dresden (V) | New Transmission, Upgrade Storage, New Inter-Connection | **$515,000** | **140** | Project removed from IUP based on new infromation. |
| **15722** | **Orange** | MONROE WD #8 (SKYVIEW HILLS) / Monroe (T) | Extend system to serve area with private contaminated wells. , New Storage, New Pump Station, Upgrade Distribution System | **$1,761,644** | **135** | Removed Hardship "H" designation due to expiration of hardship confirmation. Project removed from Annual List due to Hardship Designation change. |
| **17803** | **Cayuga** | AUBURN / Auburn (C) | WTP Improvements., Upgrade Water Treatment Plant, Upgrade Pump Station, Upgrade Distribution System | **$1,360,000** | **130** | Project removed from Annual List based on new information. |
| **17560** | **Sullivan** | THE CALLICOON WATER COMPANY INC / Callicoon Water Co., Inc. | New Surface Water Treatment Rule Compliance Facility, New Storage | **$399,485** | **125** | Project withdrawn by applicant. |
| **17143** | **Saratoga** | SARATOGA GLEN HOLLOW / Saratoga Glen Hollow W.C. | Extend system to serve area with private contaminated wells, consolidate public water supply, eliminate public water supply with past totalcoliform detection. , Extend Distribution System, New System Consolidation | **$1,096,804** | **125** | Project withdrawn by applicant. |
| **16811** | **Steuben** | RIVERSIDE PARK / Carol Naar | New chlorination system., Upgrade Ground Water Source | **$45,735** | **120** | Project withdrawn by applicant. |
| **16876** | **Dutchess** | BRETTVIEW ACRES WATER CO / Brettview Water Co. Inc. | New Surface Water Treatment Rule Compliance Facility | **$40,800** | **115** | Project withdrawn by applicant. |
| **15288** | **Dutchess** | WAPPINGERS FALLS VILLAGE / Wappingers Falls (V) | New wells, filter& iron removal plant, chlorine contact tank, pump station, New Water Treatment Plant, Upgrade Ground Water Source, New Pump Station | **$0** | **105** | Project financing was converted from a Market Rate Financing to a Subsidized Interest Rate financing during previous funding cycle after draft IUP release. |
| **17727** | **Ulster** | KINGSTON (CITY) WATER DISTRICT / Kingston (C) | Upgrade Water Treatment Plant | **$0** | **85** | Project financing was converted from a Market Rate Financing to a Subsidized Interest Rate financing during previous funding cycle after draft IUP release. |
| **17377** | **Chautauqua** | SILVER CREEK VILLAGE / Silver Creek (V) | Upgrade Distribution System | **$0** | **80** | Project financing was converted from a Market Rate Financing to a Subsidized Interest Rate financing during previous funding cycle after draft IUP release. |
| **17911** | **Nassau** | WA OF GREAT NECK NORTH / Water Auth of Great Neck North | VOC treatment at Well #6, Upgrade Water Treatment Plant | **$1,400,000** | **70** | Project withdrawn by applicant. |

| Project | County | System Name/ Borrower | Description | Project Cost | Score | Comments |
|---|---|---|---|---|---|---|
| **17529** | **Jefferson** | TIBBETS POINT WATER DISTRICT / Cape Vincent (T) | Serve area with private contaminated wells, New Surface Water Treatment Rule Compliance Facility, New System Consolidation, New Water District | **$1,758,930** | **1,175** | Revised cost based on new information. |
| **18009** | **Tompkins** | DRYDEN VILLAGE / Dryden (V) | DWSRF Project Number 18107 is recombined back into this project, New Water Treatment Plant, New Ground Water Source, New Transmission, New Storage, Upgrade Distribution System | **$600,000** | **1,155** | Project cost revised based on new information |
| **17976** | **Otsego** | SOUTHSIDE WATER DISTRICT NO. 5 / Oneonta (T) | Southside Water District No. 5. , New Ground Water Source, New Complete System (New System), New Storage, New Distribution System, New Water District | **$0** | **1,130** | Project closed Short Term after the Draft IUP release and prior to the release of the Final IUP. Project cost and score adjusted to reflect short term closing. |
| **17987** | **Otsego** | SOUTHSIDE WATER DISTRICT NO. 6 / Oneonta (T) | Southside Water District No. 6., New Ground Water Source, New Complete System (New System), New Storage, New Distribution System, New Water District | **$0** | **1,130** | Project closed Short Term after the Draft IUP release and prior to the release of the Final IUP. Project cost and score adjusted to reflect short term closing. |
| **18096** | **Jefferson** | ORLEANS WATER IMPROVEMENTS / Orleans (T) | Consolidation of PWS w/ violations and to serve contaminated private wells, Extend Distribution System | **$0** | **1,120** | Project closed Short Term after the Draft IUP release and prior to the release of the Final IUP. Project cost and score adjusted to reflect short term closing. |
| **18161** | **Suffolk** | DERING HARBOR WATER DISTRICT / Dering Harbor (V) | Resiliency and redundancy at Yoco Road well location. new storage tank, strengthening of structure, protection of pumps & emergency generator , | **$0** | **1,045** | Revised score and cost based on short term closing after the release of draft IUP |
| **18150** | **Westchester** | SLEEPY HOLLOW (VILLAGE) / Village of Sleepy Hollow | New Storage and Transmission main to provide for resiliency and redundancy. Project will make additional water capacity available for when the Catskill Aqueduct shuts down for high turbidity storm events, | **$0** | **1,015** | Revised project score due to data input error. Project closed short term prior to release of the draft IUP and score revised to reflect that closing. |
| **18160** | **NY City** | NEW YORK CITY-CATSKILL/DELAWARE SYSTEM / NYCDEP | Provide resiliency during storm events to minimize turbidity around Shaft 18 intake by stabilizing shorelines surrounding Shaft 18., | **$0** | **1,015** | Project financed during previous funding cycle after Draft IUP release. Project cost and score revised to reflect Short Term Financing. |
| **18061** | **Franklin** | TUPPER LAKE V / Tupper Lake (V) | New wells to replace SW source and inadequate DE plant., New Ground Water Source, Upgrade Distribution System | **$5,221,808** | **235** | Revised cost based on new information. |
| **16510** | **Schenectady** | DELANSON VILLAGE WATER WORKS / Delanson (V) | Upper resevoir raw water transmission main, new intake, new controls & meters at filter plant., New Transmission, Extend Distribution System, Upgrade Distribution System | **$5,289,000** | **180** | Removed Hardship "H" designation on due to expiration of hardship confirmation. |
| **18292** | **Herkimer** | VAN HORNESVILLE WATER WORKS / Stark (T) | Van Hornesville WD Phase 2 Water System Improvements., New Surface Water Treatment Rule Compliance Facility, New Ground Water Source, Upgrade Distribution System | **$240,000** | **175** | Revised cost based on new information. |
| **17504** | **Schoharie** | CENTRAL BRIDGE WATER DISTRICT / Central Bridge WD | Upgrade water treatment plant for DBP control and organics removal., Upgrade Water Treatment Plant, Upgrade Distribution System | **$4,000,000** | **160** | Revised cost based on new information. |
| **18261** | **Madison** | SLEEPY HOLLOW SUBDIVISION / Sullivan (T) | New Salt Springs Road Water District and connection to OCWA., New Storage, Extend Distribution System, New Inter-Connection, New Water District | **$5,183,600** | **145** | Revised cost and revised score from 90 to 145 based on new information. |

# I. Project Readiness List

## I. C. Project Readiness List Modifications

| Project | County | System Name/ Borrower | Description | Project Cost | Score | Comments |
|---|---|---|---|---|---|---|
| **18184** | **Essex** | CROWN POINT WD / Crown Point (T) | Replacing wells with organic contamination and replacing mains with severe break history., Upgrade Water Treatment Plant, New Ground Water Source, Upgrade Distribution System | **$1,135,775** | **140** | Revised cost based on new information. |
| **18257** | **Greene** | CAIRO WATER DISTRICT / Cairo (T) | Develop redundant water source., New Ground Water Source, Upgrade Storage, Upgrade Distribution System | **$1,400,000** | **140** | Revised cost based on new information. |
| **17488** | **Westchester** | WESTCHESTER JOINT WATER WORKS / Harrison & Mamaroneck | Phase 1 of Project #18269 . Connection to Shaft 20 of the Delaware Aqueduct; construct two pump stations (43 MGD and 6 MGD) and a 6.5-mile 48-inch diameter transmission main, New Transmission, New Pump Station | **$40,000,000** | **130** | Revised project cost and description based on new information. |
| **18269** | **Westchester** | WESTCHESTER JOINT WATER WORKS / Harrison & Mamaroneck | Phase 2 of 17488, New Transmission, New Pump Station | **$98,064,949** | **130** | Revised project cost based on new information.. |
| **18281** | **Otsego** | WORCESTER WATER DISTRICT NO 2 / Worcester (T) | Well relocation project to address GWUDI wells., New Surface Water Treatment Rule Compliance Facility | **$98,000** | **130** | Revised cost based on new information. |
| **18004** | **Chautauqua** | WESTFIELD VILLAGE / Westfield (V) | Address inadequate source capacity and insuffcient pressure, Upgrade Water Treatment Plant, Upgrade Storage, Upgrade Distribution System | **$3,088,000** | **130** | Revised project description and score based on new information |
| **18185** | **Oswego** | PHOENIX VILLAGE / Phoenix (V) | New Surface Water Treatment Rule Compliance Facility | **$212,439** | **130** | Revised cost based on new information. |
| **17803** | **Cayuga** | AUBURN / Auburn (C) | WTP Improvements., Upgrade Water Treatment Plant, Upgrade Pump Station, Upgrade Distribution System | **$1,360,000** | **130** | Project removed from Annual List based on new information. |
| **18020** | **Lewis** | WATER DISTRICT #1 / Denmark (T) | Serve private contaminated/poor yielding wells., New Storage, Extend Distribution System | **$1,000,000** | **130** | Revised cost based on new information. |
| **18170** | **Westchester** | NORTH CASTLE WD #1 / North Castle (T) | UV Disinfection facility to comply with LT2ESWTR., New Surface Water Treatment Rule Compliance Facility, Upgrade Water Treatment Plant, Upgrade Pump Station | **$582,000** | **125** | Revised cost based on new information. |
| **17668** | **Steuben** | HORNELL CITY / Hornell (C) | Upgrade Water Treatment Plant, Upgrade Ground Water Source, Upgrade Storage | **$3,870,000** | **125** | Revised cost based on new information. |
| **18110** | **Cattaraugus** | CATTARAUGUS VILLAGE / Cattaraugus (V) | Upgrade Other Expenses, Upgrade Ground Water Source, Upgrade Transmission, Upgrade Other (OT) | **$1,440,000** | **125** | Revised cost based on new information. |
| **18214** | **Seneca** | WATERLOO VILLAGE / Waterloo (V) | Upgrade Water Treatment Plant, Upgrade Storage, Upgrade Inter-Connection | **$8,569,000** | **120** | Revised cost and score from 75 to 120 based on new information |

# I. Project Readiness List

## I. C. Project Readiness List Modifications

| Project | County | System Name/ Borrower | Description | Project Cost | Score | Comments |
|---|---|---|---|---|---|---|
| **18338** | **Delaware** | SIDNEY VILLAGE / Sidney (V) | New Ground Water Supply and WTP to Replace Existing Inadequate Wells., Upgrade Ground Water Source, Extend Distribution System, Upgrade Distribution System | **$5,852,683** | **115** | Revised cost based on new information. |
| **18095** | **Oswego** | NORTH SHORE WATER SYSTEM PHASE 2 / Constantia (T) | New Distribution System, New System Consolidation | **$1,889,200** | **115** | Revised cost and removed hardship "H" designation based on new information. |
| **15301** | **Dutchess** | TIVOLI VILLAGE WATER / Tivoli (V) | Upgrade Water Treatment Plant, New Ground Water Source, New Storage, Upgrade Pump Station, Upgrade Distribution System | **$4,733,280** | **110** | Revised cost based on new information. |
| **18250** | **St.Lawrence** | NEWTON FALLS WATER DISTRICT / Clifton (T) | Connection to neighboring system will allow for elimination of a WTP with disinfection by-product issues., New Transmission | **$1,560,000** | **110** | Revised cost based on new information. |
| **17667** | **Tioga** | NEWARK VALLEY VILLAGE / Newark Valley (V) | Upgrade Distribution System | **$4,813,000** | **105** | Revised score from 75 points to 105 points based on new information. |
| **18264** | **Wayne** | NEWARK VILLAGE / Newark (V) | Upgrade Water Treatment Plant, Upgrade Storage | **$5,373,000** | **105** | Revised score from 55 to 105 based on new information |
