EXECUTIVE SUMMARY

Biennial reports are a requirement of the Environmental Protection Agency (EPA) for the Drinking Water State Revolving Loan Program (DWSRF, Program). Nebraska has provided annual reports to EPA in lieu of the biennial report requirement. This annual report is for the State Fiscal Year (SFY) 2018 (July 1, 2017 through June 30, 2018). This report is a combined effort of the Nebraska Department of Environmental Quality (NDEQ, Agency) and the Nebraska Department of Health and Human Services-Division of Public Health (NDHHS-DPH).

The Nebraska Drinking Water State Revolving Loan Fund Annual Report for SFY 2018 describes the state's efforts to meet the goals and objectives of the DWSRF. The projects identified in the Intended Use Plan (IUP), the actual use of funds, and the financial position of the DWSRF are itemized in this report. The Financial Schedules Section along with the notes to the financial schedules is the report focus, with the Program Section serving to provide supplemental information tying back to the IUP. An effort has been made to avoid duplication of the information provided in the program section with the information provided in the financial schedules.

The DWSRF program allocated a total of \$231 million, plus loan forgiveness over \$30 million, to 225 Public Water System (PWS) projects beginning with the program's inception in year 1997 through June 30, 2018. The Federal Fiscal Year (FFY) 2018 EPA capitalization grant has not been awarded, and thus will be discussed in next year's annual report.

I. FINANCIAL SCHEDULES SECTION

BACKGROUND

The Nebraska Department of Environmental Quality (Agency) – Drinking Water State Revolving Fund Program (Program) was established pursuant to the Federal Safe Drinking Water Act of 1996. Neb. Rev. Stat. §§ 71-5314 to 71-5327 created the Drinking Water State Revolving Fund Act. The Federal Safe Drinking Water Act and Nebraska State statutes established the Drinking Water State Revolving Fund Program to provide loans, at reduced interest rates, to finance the construction of publicly and privately owned drinking water facilities. Instead of making grants to communities that pay for a portion of the building of drinking water facilities, the Program provides for low interest loans with some forgiveness to finance the entire cost of qualified projects. The Program must be repaid within 20 years, and all repayments, including interest and principal, must be used for the purposes of the Program. Disadvantaged communities may choose to have up to 30 years to repay all loans.

The Program was capitalized by the EPA by a series of grants starting in 1997. States are required to provide an additional 20 percent of the Federal Capitalization Grant as matching funds in order to receive a federal grant. As of June 30, 2018, the EPA awarded \$182.7 million in capitalization grants to the state, plus \$19.5 million in American Recovery and Reinvestment Act (ARRA) funds. The award of this \$182.7 million required the state to contribute approximately \$36.54 million in matching funds. The state provided appropriations to contribute \$2.33 million of the funds to meet the state's matching requirement. Additional matching funds were obtained through the issuance of long-term revenue bonds or through cash from the Special Reserve Accounts of retired bonds or from transfers out of the Drinking Water Administration Fund.

The Agency's primary activities, with regard to the Program, include the making of loans for facilities, and the management and coordination of the Program. The NDHHS-DPH establishes the funding priorities and the Nebraska Environmental Quality Council (EQC) approves the rules and regulations of the Agency and the Program's IUP.

A. MANAGEMENT'S DISCUSSION AND ANALYSIS (UNAUDITED)

This section of financial report presents a narrative overview and analysis of the financial activities of the Program for the SFY 2018. This analysis has been prepared by management of the Agency and is intended to be read in conjunction with the Program's financial statements and related footnotes, which follow this section.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Program's basic financial statements and include the following:

1) Balance Sheet. The Balance Sheet presents information on all of the Program's assets and liabilities, with the difference between the two reported as net position;

2) Statement of Revenues, Expenses, and Changes in Net Position. The Statement of Revenues, Expenses, and Changes in Net Position presents information showing how the Program's net position changed during the most recent fiscal year.

3) Statement of Cash Flows. The Statement of Cash Flows presents the Program's flows of cash by defined categories. The primary purpose of the Statement of Cash Flows is to provide information about the Program's cash receipts and payments during the year; and

4) Notes of the Financial Statements. The Notes to the Financial Statements are an integral part of the financial statements and provide information that is essential to a full understanding of the data provided in the financial statements.

ANALYSIS OF BALANCES AND TRANSACTIONS - ENTERPRISE FUND

Changes in Net Position

For SFY 2018, the net position of the Program increased by 4.6%. The cash balance increased significantly due to several large loan payoffs, amounting to over \$5.5 million for the fiscal year. Under, Current Liabilities, "Due to Grant Recipients" increased a total of \$154,473 between SFY 2017 (\$66,610) to SFY 2018 (\$221,083) for Loan Forgiveness paid in July/August, 2018.

		NET POSITION		
		2018	2017	% Change
			\$	
Current Assets	\$	115,529,208	109,366,113	5.64%
Non-current Assets		81,207,773	78,725,652	3.2%
Total Assets		196,736,981	188,091,765	4.6%
Current Liabilities		275,747	298,026	-7.5%

Total Liabilities		300,302	315,226	-4.7%
Net Position:				
Net Investment in Capital Assets		251,330	195,027	28.9%
Unrestricted		196,185,349	187,581,512	4.6%
Total Net Position	\$	196,436,679	\$	
	-		188,091,765	4.6%

CHANGES IN NET POSITION

	2018	2017	% Change
Loan Fees Administration	\$ 823,641	\$ 814,175	1.2%
Interest on Loans	1,881,994	1,921,295	-2.1%
Total Operating Revenues	2,705,635	2,735,470	-1.1%
Administration & Set-Asides	2,086,903	2,273,814	-8.2%
Loan Forgiveness	1,990,321	1,976,428	0.7%
Total Operating Expenses	4,077,224	4,250,242	-4.1%
Operating Income (Loss)	(1,371,589)	(1,514,772)	-9.5%
Federal Grants	7,762,197	13,399,738	23.2%
Interest Revenue	2,257,965	2,018,596	11.9%
Bond Expenses	11,567	2,117	100%
Total Non-Operating Revenue (Expense)	10,031,729	15,415,513	34.9%
Change in Net Position	8,660,140	13,900,741	-37.7%
Beginning Net Position July 1	187,776,539	173,875,798	8.0%
Ending Net Position June 30	\$ 196,436,679	\$ 187,776,539	4.6%

Federal funds will vary each year depending on the size of each draw, the timing of each draw, the number of communities applying for loans, and the number of loans successfully processed.

Changes are inherent in the Program and are expected when draws are based on community requests. To more accurately reflect the type of revenue being reported, interest on investing activities has been reclassified from operating revenue to non-operating revenue.

ECONOMIC OUTLOOK

The State has continued to take steps to avert major economic impacts both statewide and within communities. The small rural makeup of the State remains a challenge for communities in funding major capital projects. Declining population bases make it difficult to collect the amount of user fees needed to fund infrastructure requirements.

LOANS AND GRANTS TRACKING SYSTEM SOFTWARE (LGTS)

LGTS is a comprehensive software application developed by Northbridge Environmental, which is designed for Nebraska's State Revolving Fund (SRF) managers and staff to track and manage all aspects of their Clean and Drinking Water SRF programs from project loan application to final repayment, as well as to track all capital contributions, set-aside spending, and bond issuance and repayment.

The software was developed to address the data management needs for all of the steps in the SRF management process, including priority list development, facility location and identification, engineering review and milestone tracking, inspections, contacts, contract approvals and change orders, detailed payment request processing, project spending forecasts, encumbrances, funding draws and transfers, disbursements, amortization schedule creation

and management, billing, repayment processing, fund deposits, and tracking of repaid funds by their original source. The software also contains a general ledger that each state can customize to match existing accounting systems and create trial balances, financial statements, and related financial schedules.

LGTS is based on defined roles that each user is responsible for in the program. Security roles limit function and access abilities based upon the user's authorization for adding, removing, and editing information within the program.

Historical data was extracted from spreadsheets and other data systems to load LGTS with data, test the validity of the data, and ensure that LGTS can be used effectively. This task was handled by a combination of staff efforts to assemble existing data sources and outside help to ensure that the data would be used properly. This process usually yields a dual benefit of having a system with clean data and provides a quality assurance check of the many transactions that have occurred years ago and often by a number of staff members.

Nebraska's SRF programs have implemented the LGTS system. During fiscal year 2014, planning of the implementation phases, business rules, and hardware/software installations occurred. During fiscal years 2015 and 2016, the system was used concurrently with existing systems to create a basis for reliability and consistency. In 2017, the existing internal system was discontinued, and LGTS became the sole system for use within the SRF program alongside the State accounting system. NDEQ has found that LGTS has reduced the occurrence of human error, which in turn increases efficiency and time savings.

Contract costs for the purchase and implementation of the LGTS system have been handled through the existing Northbridge contract with EPA procurement. Therefore, expenditures are withheld as an "in-kind" deduction to the total annual grant, which is awarded to the program each year. Federal EPA staff negotiate, monitor, and manage the Northbridge contract for LGTS.

The agency is capitalizing the costs that the EPA reimburses directly to Northbridge, as well as the cost of staff time utilized for implementation.

Summary of Significant Accounting Policies

A. Basis of Presentation

The accompanying basic financial statements of the Nebraska Department of Environmental Quality (Agency) – Drinking Water State Revolving Fund Program (Program) have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

The basic financial statements have been prepared primarily from accounts maintained by the State Accounting Administrator of the Department of Administrative Services (DAS) and the Trustee – Wells Fargo Bank (Trustee) for the State match bond accounts.

B. Reporting Entity

The Program is established under and governed by the Safe Drinking Water Act of the Federal Government and the Drinking Water State Revolving Fund Act of the State of Nebraska. The Agency is a State agency established under and governed by the laws of the State of Nebraska. As such, the Agency is exempt from State and Federal income taxes. The Program's management has also considered all potential component units for which it is financially accountable and other organizations that are fiscally dependent on the Program or whose relationship with the Program is so significant that exclusion would be misleading or incomplete. The GASB has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body, and (1) the ability of the Agency to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the Agency. The Agency is also considered financially accountable if an organization is fiscally dependent on, and there is potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the Agency, regardless of whether the organization has (1) a separately elected governing board, (2) a governing board appointed by a higher level of government, or (3) a jointly appointed board.

These financial statements present the Program. No component units were identified. The Program is part of the primary government for the State of Nebraska's reporting entity.

C. Fund Structure

The Program's accounts are maintained in accordance with the principles of fund accounting to ensure compliance with limitations and restrictions placed on the use of resources available to it. Under fund accounting, individual funds are established for the purpose of carrying on activities or attaining objectives in accordance with specific regulations, restrictions, or limitations. Each individual fund is a self-balancing set of accounts recording cash and other financial resources, together with liabilities and residual equities or balances, and changes therein. The State accounting system includes the following Program funds, as identified in the Drinking Water State Revolving Fund Act:

- Drinking Water Facilities Funds Federal Funds 48416, and 48418; and Bond Funds 68481, 68482, 68483, 68484, 68485, and 68486.
- Drinking Water Administration Fund Cash Fund 28630

These funds are used to account for revenues and expenses for loans and administrative expenses of the Program.

The activity of these State of Nebraska funds has been combined and reported as an enterprise fund, which under governmental GAAP is a proprietary fund type. This fund type reflects transactions used to account for those operations that are financed and operated in a manner similar to a private business. The accounting for the Program's transactions in this manner is a requirement of the Environmental Protection Agency (EPA), as it and the Agency have decided that the determination of revenues earned, expenses incurred, and/or net income is necessary to demonstrate the success of the Program and to assure the EPA the Program will be available in perpetuity, as intended.

This fund classification differs from the classification used in the State of Nebraska's Comprehensive Annual Financial Report (CAFR). The CAFR classifies the Cash funds, Federal funds, and Bond funds as special revenue funds, as they meet the definition of special revenue funds under GASB Statement 54. In that statement, special revenue funds are defined as funds used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specific purposes.

D. Measurement Focus, Basis of Accounting

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus and basis of accounting. An enterprise fund is accounted for on a flow of economic resources measurement focus. With this measurement focus, all assets and all liabilities associated with the operation of the fund are included on the balance sheet. Enterprise fund operating statements present increases (i.e., revenues) and decreases (i.e., expenses) in total net position.

Enterprise funds utilize the accrual basis of accounting. Under this method, revenues are recorded when earned, and expenses are recorded at the time liabilities are incurred.

E. Cash and Cash Equivalents

Cash and Cash Equivalents – Cash and cash equivalents consist of cash in the State Treasury. This includes cash in bank accounts and petty cash, short-term investments, such as certificates of deposit, repurchase agreements, and U.S. treasury bills. These short-term investments may have original maturities (remaining time to maturity at acquisition) greater than three months; however, cash is available and is considered cash and cash equivalents for reporting purposes. These investments are stated at cost, which at June 30, 2017, approximates market. Banks pledge collateral, as required by law to guarantee State funds held in time and demand deposits.

Cash and cash equivalents are under the control of the State Treasurer or other administrative bodies, as determined by law. All cash deposited with the State Treasurer is initially maintained in a pooled cash account. On a daily basis, the State Treasurer invests cash not needed for current operations with the State's Investment Council, which maintains an operating investment pool for such investments. Interest earned on these investments is allocated to funds based on their percentage of the investment pool.

F. Loans Receivable

The State operates the Program as a direct loan program, whereby loans are made to communities. Loan funds are disbursed to the local agencies as they expend funds for the purposes of the loan. Interest is calculated from the date the funds are advanced. After the final disbursement has been made, the amortization schedule identified in the loan agreement is adjusted for the actual amounts disbursed. The interest rates on loans range from 2.0% to 4.0%,

and the terms on outstanding loans range from 13 to 30 years. Disadvantaged communities may have up to 30 years to repay.

The Program loans are funded from Federal capitalization grants, State match funding, and the Drinking Water State Revolving Fund. The grants are funded, on average, 83.33% from Federal funds and 16.67% from State match funds. Reimbursements to communities are paid 100% from State matching funds until they have been exhausted, and then from Federal capitalization grant funds or Drinking Water State Revolving funds. The Drinking Water State Revolving Fund is financed through principal repayments plus interest earnings becoming available to finance new projects, allowing the funds to "revolve" over time.

The current loans receivable amount was determined using the amount of principal payment due to the Program at June 30, 2018, which is collectible in fiscal year 2019. Loans receivable that were paid in full, prior to their due date, as of August 31, 2018, were included in the current loans receivable balance as opposed to the long-term loans receivable balances.

No provisions were made for uncollectible accounts, as all loans were current, and management believed all loans would be repaid according to the loan terms. There is a provision for the Program to intercept State aid to a community in default of its loan.

G. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at fiscal year-end and revenues and expenses during the reporting period. Actual results could differ from those estimates.

H. Compensated Absences

All permanent employees working for the Program earn sick and annual leave and are allowed to accumulate compensatory leave rather than be paid overtime. Temporary and intermittent employees are not eligible for paid leave. The liability has been calculated using the vesting method, in which leave amounts, for both employees currently eligible to receive termination payments and other employees expected to become eligible in the future to receive such payments upon termination, are included.

Program employees accrue vested annual leave at a variable rate based on years of service. Generally, accrued annual leave cannot exceed 35 days at the end of a calendar year. Employees accrue sick leave at a variable rate based on years of service. In general, accrued sick leave cannot exceed 240 days. There is no maximum limit on the accumulation of sick leave days for employees under certain labor contracts. Sick leave is not vested except upon death or upon reaching the retirement eligibility age of 55 – or a younger age, if the employee meets all criteria necessary to retire under the primary retirement plan covering his/her State employment, at which time the State is liable for 25 percent of the employee's accumulated sick leave. Employees under certain labor contracts can only be paid a maximum of 60 days.

The Program's financial statements recognize the expense and accrued liability when vacation and compensatory leave is earned or when sick leave is expected to be paid as termination payments.

I. Operating Revenues and Expenses

Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the Program's principal ongoing operations. The operating revenues of the Program include loan fees administration and interest on loans, since making

loans is the primary purpose of the Program. The operating expenses of the Program are administration and set-aside expenses and loan forgiveness.

J. Capital Assets

The Program has only one capital asset, the Loans and Grants Tracking System (LGTS) software, and it is recorded at cost. The Agency began the development phase of the LGTS software during the fiscal year ended June 30, 2014, and was completed during the fiscal year ended June 30, 2018. The LGTS software is considered an intangible capital asset, and the Agency follows the capitalization policy set forth by the State of Nebraska for intangible capital assets, which requires capitalization of such assets when the cost of such asset is in excess of \$100,000 and has an expected useful life of greater than one year. The LGTS software has an estimated useful life of seven years. Depreciation/amortization will begin upon completion of the developmental phase and the software being put into production and it will be computed using the straight-line method over the estimated useful life of the asset.

NOTES

1. Due to Grant Recipients

Planning Grants for Preliminary Engineering Reviews are awarded through the Federal Capitalization Grant 15% set-aside funds. The Program awards Planning Grants to communities with populations below 10,000 where the Public Water System is operated by a political subdivision. Available grants are given upon evidence that the eligible Public Water System has entered into a contract with a professional engineer to develop a preliminary engineering report. Planning Grants are intended to provide financial assistance to Public Water Systems for projects seeking funding through the Water Wastewater Advisory Committee common pre-application process. The grant covers 90% of the preliminary engineering report and other eligible costs and will require 10% matching funds from the Public Water System.

Source Water Protection Grants are also awarded through the Federal Capitalization Grant 15% set-aside funds. They are available for proactive projects geared toward protecting Nebraska's drinking water supplies and will address drinking water quality, quantity, security, and/or education. Eligible applicants are political subdivisions that operate a Public Water System serving a population of 10,000 or fewer.

The Program may choose to provide additional subsidization for municipalities in the form of loan forgiveness. Forgiveness funds will be targeted primarily to the highest ranked eligible projects on the Priority Funding Lists, those that address public health needs, or those that have the components to meet Green Project Reserve guidelines. The loan recipient will not be required to repay the portion of the loan principal that has been designated as loan forgiveness under the terms and conditions of the loan contract. Loan forgiveness is considered a grant for purposes of the financial statements, since repayment is not required.

For Planning Grants, Source Water Protection Grants, and Loan Forgiveness awards, once the municipality submits proof of vendor payment to the Agency, it is reimbursed for its project costs by the Program. The Program's financial statements recognized the expense and accrued liability to the Program when the municipality incurred the project expense, which may not be in the same fiscal year as when costs were reimbursed by the Program.

2. Cash in State Treasury and Amounts Held by Trustee

Cash in State Treasury – The Cash in State Treasury, as reported on the balance sheet, is under the control of the Nebraska State Treasurer or other administrative bodies, as determined by law. Investment of all available cash is made by the State Investment Officer on a daily basis, based on total bank balances. These funds are held in the State of Nebraska Operating

Investment Pool (OIP), an internal investment pool. Additional information on the deposits and investments portfolio, including investment policies, risks, and types of investments, can be found in the State of Nebraska's CAFR for the fiscal year ended June 30, 2018. All interest revenue is allocated to the General Fund except allocations required by law to be made to other funds. All funds of the Program were designated for investment during fiscal year 2018. Amounts are allocated on a monthly basis based on average balances of all invested funds.

Amounts Held by Trustee – At June 30, 2018, there were no Program funds held by the Trustee, as all outstanding bonds were paid off.

3. Loans Receivable

As of June 30, 2018, the Program had 111 outstanding community loans that totaled \$86,518,785. The outstanding balances of the 10 communities with the largest loan balances, which represent 44.5% of the total loans, were as follows:

Community	Outstar	nding Balance
Lincoln	\$	12,303,654
Sidney		5,303,047
MUD-Omaha		4,023,583
Auburn		3,702,009
Falls City		3,414,997
Oshkosh		2,739,019
Alliance		2,738,029
Blair		2,506,907
Utica		2,202,163
Grant		2,072,094
TOTAL	\$	41,005,502

4. Capital Assets

The Drinking Water SRF capital assets activity for the year ended June 30, 2018, was:

	Beginning Balance	Additions	Retirements	Ending Balance
Software Development In-Progress Loans and Grants Tracking System (LGTS)	\$ 195,027	<u>\$56,303</u> ,	<u>\$ -</u>	\$ 251,330

5. Bonds Payable

The State has entered into a special financing arrangement with Nebraska Investment Finance Authority (NIFA), an independent instrumentality of the State exercising essential public functions, to provide matching funds for the Program. NIFA issues the bonds, and the proceeds are held by the Trustee until they are needed by the Program for loan purposes.

Short-Term Bonds – The proceeds of short-term revenue bonds are sometimes used by the Agency to provide the 20% match requirements for the Agency's Federal Capitalization Grants. Interest revenue from Program loans is pledged to pay off the bonds. During the fiscal year, the

Program issued a \$1,200,000 Short Term Bond and utilized \$448,400 of administrative cash funds to meet their match requirements for the 2017 DWSRF grant.

6. Non-current Liabilities

Changes in non-current liabilities for the year ended June 30, 2018, were as follows:

	ginning alance	Inc	reases	Decrea	ases	inding alance	Amounts Due Within 1 Year		
Compensated Absences	\$ 18,901	\$	8,083	\$	0	\$ 26,984	\$	2,429	

7. Capital Contributions

Included in the net position is the total amount of capitalization grants drawn from the EPA by the Agency. The following summarizes the EPA capitalization grants awarded and drawn, as well as the remaining balance as of June 30, 2018. The year column relates directly to the grant amount column and represents the fiscal year the grant funds were appropriated by Congress. The amount drawn column is as of June 30, 2018, and may have been drawn over multiple years.

Federal Fiscal Year			
Available	Grant Amount	Amount Drawn	Balance
1997	\$ 12,824,000	\$ 12,824,000	\$ -
1998	7,121,300	7,121,300	-
1999	7,463,800	7,463,800	-
2000	7,757,000	7,757,000	-
2001	7,789,126	7,789,126	-
2002	8,052,500	8,052,500	-
2003	8,004,100	8,004,100	-
2004	8,303,100	8,303,100	-
2005	8,285,500	8,285,500	-
2006	8,229,300	8,229,300	-
2007	8,229,000	8,229,000	-
2008	8,146,000	8,146,000	-
2009 - ARRA	19,500,000	19,500,000	-
2009	8,146,000	8,146,000	-
2010	13,573,000	13,573,000	-
2011	9,418,000	9,418,000	-
2012	8,695,558	8,695,558	-
2013	8,533,907	8,533,907	-
2014	8,845,000	8,845,000	
2015	8,681,560	8,681,560	
2016	8,280,275	8,234,774	45,501
2017	8,312,000	7,149,506	1,162,494
TOTAL	\$ 202,190,026	\$200,982,031	\$ 1,207,995

Not included in the above grant totals are the amounts set aside as in-kind contributions for the Loans and Grants Tracking System (LGTS) software development. The 2012 grant had \$166,535 and the 2015 grant had \$105,440 and the 2016 grant had \$31,725 set aside as in-kind amounts for use by the EPA for the development of the new LGTS software.

The amount of in-kind contributions utilized for the LGTS software during the fiscal year ending June 30, 2018, was \$56,303. The total amount utilized for LGTS as of June 30, 2018, was \$251,330. Additional in-kind contributions were received and capitalized for the Clean Water State Revolving Fund Program which also utilizes the LGTS software.

8. Loan Fees Administration

To meet the long-term administrative needs of the Program, an annual fee of up to 1% is charged against the outstanding principal on loans. These fees are not included in the loan principal. It is calculated on a semi-annual basis and billed when loan principal and interest payments are due. The fee is applied to all loans in accordance with Title 131 Nebraska Administrative Code (NAC) Chapter 8 and the loan agreement.

9. Interest on Fund Balance – State Operating Investment Pool

The reported amount represents the earnings the Program received from idle funds invested by the Nebraska State Treasurer with the State's Investment Council. Interest is credited on approximately the twenty-fifth day of each subsequent month.

10. Operating Expenses

The operating expenses of the Program are classified, for financial reporting purposes, into five categories. There were expenses related to three set-aside activities established under §1452 of the Safe Drinking Water Act. The three set-aside activities are:

- 15% Source Water Assessment Program
- 2% Technical Assistance to Small Systems
- 10% Public Water Supply System

A Memorandum of Understanding was entered into between the Agency and the Nebraska Department of Health and Human Services so that the Agency can carry out oversight and related activities of the Program. The Program provides funding to the Nebraska Department of Health and Human Services with the three set-asides noted above.

All set-asides are required to be federally funded. State match dollars can only be used for the purpose of providing loans to owners of Public Water Supply Systems. Other significant categories of expenses are Loan Forgiveness and Administrative Costs from Fees.

The following is an explanation of these categories:

Administrative Costs from Fees

To meet the long-term administrative needs of the Program, an annual fee of up to 1% is charged against the outstanding principal on loans. This fee is deposited into a separate account and is used for administrative costs of the Program. Revenues from fees can be used to provide the capitalization grant match, loan forgiveness, or planning grants.

15% Source Water Assessment Program

Identified in Federal regulations as local assistance and other State programs, a State may use up to 15% of the capitalization grant amount for specified uses, as follows:

- Provide assistance to a community water system to implement voluntary, incentive-based source water quality protection measures;
- Provide funding to delineate and assess source water protection areas;
- Support the establishment and implementation of wellhead protection programs; and
- Provide funding to a Public Water System to implement technical and/or financial assistance under the capacity development strategy.

2% Technical Assistance to Small Systems

A State may use up to 2% of the grant funds awarded to provide technical assistance to public water systems serving 10,000 people or less. If the State does not use the entire 2% for these activities against a given grant award, it can reserve the excess authority and use it for the same activities in later years. A State may use these funds to support a technical assistance team or to contract with outside organizations to provide technical assistance.

10% Public Water Supply System

A State may use up to 10% of the grant funds awarded to do the following:

- Administer the State Public Water System Supervision program;
- Administer or provide technical assistance through source water protection programs, which includes the Class V portion of the Underground Injection Control Program;
- Develop and implement a capacity development strategy; and
- Develop and implement an operator certification program.

Loan Forgiveness

The total of expenses reported as Loan Forgiveness is the amount of loan principal payments the State subsidized to communities meeting the definition of "disadvantaged" or which the State expects to become disadvantaged as a result of the project. The amount of these subsidies during a particular fiscal year's capitalization grant cannot exceed 50% of the amount of the capitalization grant for that year.

11. State Employees Retirement Plan (Plan)

The single-employer Plan became effective by statute on January 1, 1964. The Public Employees Retirement Board was created in 1971 to administer the Plan. The Plan consists of a defined contribution option and a cash balance benefit. The cash balance benefit is a type of defined benefit plan. Each member employed and participating in the retirement system prior to January 1, 2003, elected either to continue participation in the defined contribution option or to begin participation in the cash balance benefit. The defined contribution option is closed to new entrants. All new members of the Plan on and after January 1, 2003, become members of the cash balance benefit. The benefits and funding policy of the Plan are established and can only be amended by the Nebraska Legislature.

All permanent full-time employees are required to begin participation in the retirement system upon employment. All permanent part-time employees who have attained the age of 18 years may exercise the option to begin participation in the retirement system.

Contribution – Per statute, each member contributes 4.8% of his or her compensation. The Agency matches the member's contribution at a rate of 156%. The employee's and employer's contributions are kept in separate accounts.

The employee's account is fully vested. The employer's account is fully vested after a total of three years of participation in the system, including credit for participation in another Nebraska governmental plan prior to actual contribution to the Plan.

Defined Contribution Option – Upon attainment of age 55, regardless of service, the retirement allowance shall be equal to the sum of the employee and employer account. Members have

several forms of payment available, including withdrawals, deferrals, annuities, or a combination of these.

Cash Balance Benefit – Upon attainment of age 55, regardless of service, the retirement allowance shall be equal to the accumulated employee and employer cash balance accounts, including interest credits, annuitized for payment in the normal form. The normal form of payment is a single-life annuity with five-year certain, payable monthly. Members will have the option to convert their member cash balance account to a monthly annuity with built-in cost-of-living adjustments of 2.5% annually. Also available are additional forms of payment allowed under the Plan, which are actuarially equivalent to the normal form, including the option of lump-sum or partial lump-sum.

For the fiscal year ended June 30, 2018, employees contributed \$8,579, and the Agency contributed \$13,383. A separate plan report is issued and can be obtained from the Nebraska Public Employees Retirement System. This report contains full pension-related disclosures.

The State of Nebraska Comprehensive Annual Financial Report (CAFR) also includes pensionrelated disclosures. The CAFR report is available from the Nebraska Department of Administrative Services – Accounting Division or on the Nebraska Auditor of Public Accounts' website at www.auditors.nebraska.gov.

12. Contingencies and Commitments

Risk Management – The Agency is exposed to various risks of loss related to torts, theft of, damage to, or destruction of assets, errors or omissions, injuries to employees, and natural disasters. The Agency, as part of the primary government for the State, participates in the State's risk management program. DAS is responsible for maintaining the insurance and self-insurance programs for the State. The State typically self-insures for general liability, employee health care, employee indemnification, and workers' compensation. The State has chosen to purchase insurance for the following:

- A. Motor vehicle liability, which is insured for the first \$5,000,000 of exposure per accident with a self-insured retention of \$300,000 per accident. Insurance is also purchased, with various limits and deductibles, for physical damage and uninsured and underinsured motorists. State agencies have the option to purchase coverage for physical damage to vehicles.
- B. Crime coverage, with a limit of \$31,000,000 for each loss, and a \$25,000 self-insured retention per incident subject to specific conditions, limits, and exclusions.
- C. Real and personal property on a blanket basis for losses up to \$250,000,000, with a selfinsured retention of \$200,000 per loss occurrence. Newly acquired properties are covered up to \$10,000,000 for 120 days and, after 120 days, if the property has not been reported, the limit decreases to \$5,000,000. The perils of flood, earthquake, and acts of terrorism have various coverage, sub-limits, and self-insurance. State agencies have the option to purchase building contents and inland marine coverage.

Details of the various insurance coverages are available from DAS – Risk Management Division.

No settlements exceeded commercial insurance coverage in any of the past three fiscal years. Health care insurance is funded in the Insurance Trust Funds through a combination of employee and State contributions. Workers' compensation is funded in the Workers' Compensation Internal Service Fund through assessments on each agency based on total agency payroll and past experience. Tort claims, theft of, damage to, or destruction of assets, errors or omissions, and natural disasters would be funded through the State General Fund or by individual agency assessments, as directed by the Legislature, unless covered by purchased insurance. No amounts for estimated claims have been reported in the Program's financial statements.

Litigation – The potential amount of liability involved in litigation pending against the Agency, if any, could not be determined at this time. However, it is the Agency's opinion that final settlement of those matters should not have an adverse effect on the Agency's ability to administer current programs. Any judgment against the Agency would have to be processed through the State Claims Board and be approved by the Legislature.

PROGRAM INFORMATION SECTION

A. Fund Activities

1. Loan and Investment Status

The fund has a loan portfolio containing \$231,007,604 in total loan allocations, of which \$128,529,565 was repaid; \$86,518,785 is outstanding, leaving \$15,959,254 still to be disbursed. Details on the Fund portfolio of 227 loans are in Attachment 1. The blended interest rate on the State Fiscal Year (SFY) 2017 outstanding loan balance is 2.184%. The result was an overall 2.6 basis point decrease from SFY 2017. The blended rate will decrease again over the next year.

2. Binding Commitments, Loan Assistance and Set-aside Allocations

The DWSRF entered into three binding commitments in order to provide financial assistance to PWS projects totaling \$8,241,301 in the past fiscal year. Of that amount, disadvantaged communities received \$1,435,760 in forgiveness funding. All of the minimum grant conditions for additional subsidization (e.g., principal forgiveness) and the Green Project Reserve (GPR) (e.g., water meters), for all open capitalization grants were met.

Attachment 2 provides information showing the loan agreements entered into during SFY 2018 by quarter and shows the cumulative binding commitment amount since the program initiation. The requirement is to allocate 100% of the capitalization grant and required state match, less set-asides, within one year of receiving the grant payment. The cumulative requirement is \$200,472,512. The DWSRF has reached a cumulative binding commitment amount of initial loan awards of \$289,365,246 or 144.34% of the required amount.

3. Administration (4%) Set-Aside and Cash Fund

The program is now utilizing the Administration cash fund for most of the salaries and associated expenses of personnel administering the DWSRF program and is not presently exercising this set-aside option for staffing. However, funds were reserved from the most recent capitalization grant for implementation of the Loan and Grant Tracking Software (LGTS), a comprehensive software application now fully online, that will be designed specifically for Nebraska's DWSRF to track and manage all aspects of program loans, capital contributions, and bond issuance and repayment.

DWSRF oversight at NDHHS-DPH has included the following activities:

- Reviewed and adopted the priority ranking system.
- Presented the priority ranking system to the Advisory Council on Public Water Supply for their approval.
- Conducted Needs Surveys and solicited applications.
- Developed the prioritized project lists.
- Provided NDEQ with information on potential DWSRF loan applicants.
- Developed the Set-Aside Work Plan.
- Prepared DWSRF Intended Use Plan documents.
- Performed technical reviews of preliminary engineering reports for DWSRF projects.
- Determined compliance of project construction documents with Nebraska / Federal Safe Drinking Water Act requirements for DWSRF projects.
- Attended DWSRF project and other related meetings, as needed.
- Conducted DWSRF-related field inspections to determine compliance of construction with plans and specifications as approved by NDHHS-DPH.

- Provided NDEQ copies of approval letters for the proposed construction and for placement into service upon completion of the DWSRF projects and final inspection by NDHHS-DPH.
- Provided NDEQ with input on FNSI's and Categorical Exclusions.
- Performed NDHHS-DPH capacity development strategy related reviews.
- Completed special EPA / DWSRF workload activities as requested.
- Participated in the EPA and State program audits.
- Reviewed Operation and Maintenance Manuals for DWSRF funded projects.

Funds from the Administration Cash Fund paid salaries and associated expenses of personnel administering the DWSRF program at NDEQ. DWSRF administration in NDEQ has included the following activities:

- Developed program documents and procedures.
- Solicited applications.
- Issued the IUP.
- Conducted a public hearing for the IUP.
- FNSI & Categorical Exclusion issuance.
- Grant application processing.
- Loan application processing.
- Plans and specification reviews for assurances.
- Construction management.
- Match and/or bond procurement.
- Bond redemption.
- Disbursement processing.
- Loan servicing.
- Financial accounting.
- EPA and State project and program audits.
- Financial modeling.
- Attended state and national meetings.

4. Set-Aside Small Systems Technical Assistance (2%)

During SFY 2018 NDHHS-DPH had contracts with one assistance provider:

• Nebraska Rural Water Association (NeRWA)

This organization helped small systems:

- Determine what technical, financial and/or managerial assistance is needed.
- Explore different types of financial assistance available.
- Apply for financial assistance.
- Review management and organization structure and offer alternative methods of operation and management.
- Perform financial and managerial assessments of water systems that are applying for SRF funding or that are deemed to be in need of such an assessment.
- Develop corrective action goals which are based on the findings of technical assessments.
- Provide technical, financial and managerial assistance to PWS identified as needing such assistance.
- NeRWA made 20 contacts each month, with at least 15 on-site and 5 in-office contacts.
- Provide instruction sessions to Board/Council members and Owners of community water systems regarding the technical, managerial, and financial aspects of running a sustainable water system.

5. State Program Management: Capacity Development (10%)

A. Engineering & Field Services and Monitoring & Compliance Staff

This set-aside was used to fund salaries, benefits, and all other related operating expenses (e.g., travel, etc.) for approximately 12 staff employed in Nebraska's Public Water Supply Supervision (PWSS) Program in accordance with the work plan approved under the EPAs PWSS Program grant. The staff positions include Drinking Water Program Specialists in the Monitoring and Compliance program, Water Supply Specialists in the Field Services Program, and Engineers in the Engineering Services Program.

B. Capacity Development

From July 1, 2017 through June 30, 2018, NeRWA, under the technical, financial and managerial contract, made system visits with an average of twenty (20) contacts per month for a total of two-hundred forty-four (244) contacts involving two-hundred twenty-seven (227) PWSs. Included in the contacts are ten (10) board/council training sessions presented by NeRWA.

In SFY 2018, Field Services representatives performed 386 Routine Sanitary Surveys (RSS) and 48 Follow-up surveys. The normal rotation for sanitary surveys is every three years for Community and Non-Transient Non-Community systems and every five years for Transient Non-Community systems. There were 200 Community, 46 Non-Transient, and 140 Transient Non-Community Routine Sanitary Surveys performed. The numbers of deficiencies found are as follows:

<u>Community Systems</u>: Significant: 427 Minor: 146 A total of 573 deficiencies. Average of ~2.9 significant or minor deficiencies per system.

Non-Transient Non-Community Systems (NTNC):Significant: 89Minor: 33A total of 122 deficiencies. Average of ~2.6 significant or minor deficiency per system.

Transient Non-Community Systems:

Significant: 155 Minor: 33 A total of 188 deficiencies. Average of ~1.3 significant or minor deficiencies per system.

The vast majority of these are record keeping related deficiencies. Of the 883 significant and minor deficiencies found in SFY 2018 there are 163 left to still be corrected. This means that for SFY 2018 Nebraska had 81.5% deficiency correction rate. There are 60 PWSs that had a Routine Sanitary Surveys in SFY 2018 that still have at least one outstanding deficiency. Eighty-four percent of the PWSs have fully corrected all deficiencies that were found. With increased attention being paid to sanitary survey deficiencies, we fully expect the deficiency correction number to increase in SFY 2019. Utilizing the Safe Drinking Water Information System (SDWIS) database, the State can effectively compare survey and deficiency data.

The proposed change in strategy still remains, the program will keep track of deficiencies but put more emphasis on getting the number of violations to decrease with a proactive response to systems with problems. PWS are given 120 days to correct significant deficiencies, and 12 months to correct minor deficiencies. Of the 60 PWS with deficiencies still to be corrected, 45 have not exceeded those time frames, and would not be considered in violation. The goal of this strategy is to lower the number of violations so that the water systems in Nebraska can meet compliance standards and achieve long term sustainability.

C. Operator Certification

NDHHS-DPH held ten water operator training courses applicable to various grade levels during SFY 2018. Water operator licenses were issued to 169 individuals. The number issued per license grade is as follows:

Grade I - 9 license Grade II - 13 licenses Grade III - 24 licenses Grade IV - 123 licenses

All PWSs are required to obtain the services of an operator holding a valid license equal to or greater than the classification of the water system. Grade IV is Nebraska's lowest level of license for a person to be able to operate a Community or Non-transient Non-Community PWS. Grade I is the highest.

Grade V water operators are not included in this report. A Grade V is issued to an individual who operates a Transient Non-Community PWS and is not required to be renewed. All other water operator licenses require continuing education for renewal, and require those licenses be renewed every two years.

D. Documentation of 1:1 Match for 10% Set-Aside

With the passage of the Water Infrastructure Improvements for the Nation (WIIN) Act, there is no longer a requirement for this documentation. The entire section will be deleted from the next annual report.

6. Local Assistance and Other State Programs (15%)

A. Land Acquisition for Source Water Protection

Funds potentially available were not used for land acquisition. The funds were primarily used for drinking water facility loans. The present program intent is not to reserve funds for land acquisition under future grants.

B. Source Water Delineation and Assessment

Nebraska's Source Water Assessment Program (SWAP) was submitted to EPA Region VII in February 1999 and approved in October 1999. NDEQ is implementing the EPA approved program in cooperation with the NDHHS-DPH, NeRWA, the Natural Resources Districts, and numerous other stakeholders. All assessments were completed and distributed by August 2003.

Source Water and Wellhead Protection staff is funded with Clean Water Act Section 319 Nonpoint Source Pollution funds and 15% DWSRF set-aside money. NDEQ staff continues to work with public water suppliers to develop protection actions for their drinking water supplies. Staff have updated Wellhead Protection Area maps (or adopted the acceptable work of others) and Watershed Delineation Area maps for Nebraska public water supplies. As of September 6, 2018, a cumulative 116 PWSs have completed state-approved wellhead protection plans.

Beginning with FY 2003, approximately \$200,000 of the 15% DWSRF set-aside had been used annually for Source Water Protection granted projects. This amount was reduced to \$100,000 beginning in FFY 2007 and was increased to \$150,000 in 2018 to accommodate an increase of applications. The communities of Broken Bow, Springfield, Tekamah, and York were selected to receive Source Water Grants totaling \$150,000 from the 2018 Capitalization Grant. Activities that will be funded this year include: developing Drinking Water Protection Management Plans (DWPMP) and implementation of best management practices aimed at reducing groundwater nitrate levels, and public education and outreach.

Unutilized DWSRF 15% set-aside personnel funds were spent on a vadose zone (unsaturated sediment) sampling project. Products of the proposed project include: an information interface for accessing nitrate vadose zone results and sharing information, standardized protocol for collecting and analyzing cores used in measuring nitrate occurrences and transportation potential, and laboratory analysis which would permit identification of nitrate transport and potentially attenuation rates. In addition to the sampling project, groundwater section staff assisted the Wellhead Protection (WHP) program to run the groundwater model to delineate WHP areas and update Nebraska WHP Maps.

C. Planning Grants

The Planning Grant program used DWSRF local assistance set-aside funds to provide financial assistance to eligible municipalities for preliminary engineering reports for small public water supply system improvement projects that will seek funding through the Water Wastewater Advisory Committee (WWAC) Common Pre-application process. This financial assistance is provided to communities to identify capital improvement needs as well as increase their readiness to proceed in accomplishing these improvements.

Planning grants may be provided to PWSs serving 10,000 or fewer people. This includes any city, town, village, sanitary improvement district, natural resources district, or other public body created by or pursuant to state law having jurisdiction over a community PWS. Privately owned PWSs are not eligible for assistance.

Grants are provided for up to 90% of costs for eligible preliminary engineering report services, but cannot exceed \$15,000 per system. Grants for preliminary engineering report services for Regional PWSs remained at \$25,000. Six grant awards were made in SFY 2018 totaling \$90,000, with three to high priority ranked communities planning to address compliance with drinking water standards. In addition, the program awarded three grants as part of a pilot program, wherein non-public health projects that are deemed likely ready to proceed with construction were offered planning grant funds. The purpose of these grants will be to assist in augmenting the ranking system criteria to include funding for non-public health projects on a permanent basis.

Since its inception in SFY 2002, the DWSRF has awarded planning grants to 132 communities for a total of \$1,705,320.

D. Security Grants

Letters were sent to all community PWSs with populations less than 10,000 notifying them of the security grant program in SFY 2018. The maximum grant award was \$10,000, with a 10% match required on all awards. The majority of that funding was awarded last fiscal year resulting in the following types of security improvements being made to public water systems being installed: alarms/Cameras (4), backup power (6), buildings/doors/etc. (4), fencing/lighting (7), mapping (19) for a total of 40 grants and \$314,857 awarded.

E. Capacity Development

NDHHS-DPH continues to use this set-aside to fund one FTE staff. That position administers the Public Water System Capacity Development Program for NDHHS-DPH. The position includes oversight and on-going implementation of the State's Capacity Development strategy, writing and administering contracts that utilize DWSRF 2% set-aside monies, and writing and submitting all necessary reports and other documents required as part of this program. The program

coordinator held 17 presentations involving asset management, capacity development, drought mitigation, and water distribution system history for PWSs.

7. Match Discussion

The ratio for match purposes is initially 1/6 state, 5/6 federal, for an 83.33% ACH draw as a percentage of total disbursement. However, the use of set-asides makes the actual percentage fluctuate. Since set-asides are not matched directly, the draws for set-asides must be matched by a later disbursement on a loan project. As of June 30, 2018 the ACH draw was \$170,159,270 and the match disbursement was \$36,676,181 for an ACH draw as a percentage of grant plus match disbursements ratio of 82.23%. This ratio indicates that the state has overmatched on this requirement.

For SFY 2018, match disbursements have been completed with 100% of the state match drawn first, prior to any request for associated capitalization grant loan funds.

B. GOALS AND ACCOMPLISHMENTS

1. Provisions of the Operating Agreement/Conditions of the Grant

The State of Nebraska has complied with the conditions of the DWSRF Operating Agreement and grant agreement as listed or as described more fully below:

- Establish state instrumentality and authority
- Comply with applicable state laws and procedures
- Review technical, financial, and managerial capacity of assistance recipients
- Establish DWSRF loan account, set-aside account, and DWSRF administration account
- Deposit all funds in appropriate accounts
- Follow state accounting and auditing procedures
- Require DWSRF loan recipient accounting and auditing procedures
- Submit IUP and use all funds in accordance with the plan
- Comply with enforceable requirements of the Act
- Establish capacity development authority (See II.A.6.E)
- Implement/maintain system to minimize risk of waste, fraud, abuse, and corrective action
- Develop and submit project priority ranking system
- Take payments based on payment schedule
- Deposit state matching funds
- Submit biennial report
- Annual audit
- DWNIMS, PBR, and FFATA data entry
- Assure that borrowers have dedicated source of repayment
- Use funds in timely and expeditious manner
- Ensure recipient compliance with applicable federal cross-cutting authorities
- Implement capacity development strategy (See II.A.5.B)
- Implement an operator certification program (See II.A.5.C)
- Conduct environmental reviews as listed below:

Environmental Reviews were conducted on nine PWS projects during SFY 2018. It was determined that no Environmental Impact Statements were necessary; instead Environmental Assessments were prepared and Finding of No Significant Impact Statements were issued for Lindsay, Milford, Pierce and Raven's Nest, and Categorical Exclusions provided for the Blair, Cass County Rural Water District No. 1, O'Neill, Washington County Rural Water District No. 1 and York projects.

FFATA entries were made for Blair, Lindsey, Milford, Ogallala and York for the FFY 17 grant. Several large loans are planned to satisfy the FFATA requirements for the upcoming FFY 18 grant. Also, project signs were provided to all the FFY 17 grant identified projects.

2. Short Term Goals and Accomplishments

Nine short-term goals were described in the SFY 2018 Intended Use Plan. The short-term goals support the implementation of the program. The DWSRF has made significant progress on most of its short-term goals. The DWSRF program continues to work with the systems identified by providing both technical and financial project support. The goals are listed and discussed as follows:

1. Continue to attract customers to the program with low interest rates.

This goal was accomplished across the board for all projects funded in SFY 2018. With the return of market interest rates towards an estimated neutral level, program interest rates for all loans were maintained at 2% during the fiscal year.

2. To commit available loan funds to as many of the highest priority systems as possible.

There were three loans closed during SFY 2018. Of those, one was a high priority status project to address long-term concerns with nitrates.

3. To assist systems which need to upgrade or construct new drinking water projects to attain and maintain compliance with the provisions of the Nebraska Safe Drinking Water Act and the regulations adopted there under.

All loans closed this past fiscal year with the DWSRF met this goal. Descriptions of the individual projects are provided in Attachment 4.

4. To assist systems in meeting required drinking water quality standards. This includes giving priority to systems with compliance deadlines established by the NDHHS-DPH.

Priority points were given to Milford to address nitrate issues.

5. To work with the systems in need of technical, financial, and managerial assistance.

See responses to number 3. Of note, funding was provided to the York for the development of an updated master facilities plan. Further, NDHHS-DPH routinely provides technical, financial, and managerial assistance to PWSs. The NeRWA, as the 2% Team Contractor, provided technical, financial, and managerial assistance to small systems throughout Nebraska.

6. To address critical public health needs identified by the Public Water Supply Program administered by NDHHS-DPH.

Nitrate issues were addressed in the Milford project.

7. To provide at least 15% of the DWSRF capitalization funds for loans to small systems with populations fewer than 10,000.

All systems that closed loans in SFY 2018 with the DWSRF were below 10,000 population.

8. To continue revisions of source water delineations and complete the transition from source water assessments to protection activities, utilizing the source water protection set-aside for granted projects.

NDEQ has drawn or adopted all community and non-community PWS Wellhead Protection Area maps and Watershed Delineation Area maps. Maps are updated and drawn as needed for community PWSs. A relational database is utilized to manage Wellhead and Source Water Protection data.

9. To evaluate whether to amend the ranking system criteria to fund replacement of existing public water system infrastructure.

Numerous factors and results are continuingly being evaluated for any proposed change(s) to the ranking system of projects, which will need to be made for SFY 2020. One aspect that has been observed is communities that have recently completed a wastewater project, for any reason, may be more proactive in replacing aging public water system infrastructure.

3. Long Term Goals and Accomplishments

Ten long-term goals were included in the SFY 2018 Intended Use Plan. The goals are listed and discussed as follows:

1. Manage the DWSRF fund so its revolving nature is assured in perpetuity in order to provide a source of continuing financial assistance to PWSs for future drinking water needs. It is our intent to request EPA capitalization grants and obtain state match in a timely manner, and to allocate match and recycle funds to projects in a timely manner.

In establishing the financial structure of the DWSRF, the program has tried to provide the lowest reasonable interest rate loans for projects that address human health problems. Reflective of recent economic concerns, rates were maintained at 2% across the board this fiscal year. This structure will ensure that the DWSRF will serve as a long-term source of funding by judicious use and management of its assets and by realizing an adequate rate of return with consideration for current inflation rates. Disbursements have been completed with 100% of the state match funds drawn first, prior to any request for associated capitalization grant funds. It is further anticipated that a partial cash match will be made for the next capitalization grant, which would further cement the long-term financial footing of the fund.

2. To survey systems for drinking water infrastructure needs in order for NDHHS-DPH to maintain a database for making program decisions, and to evaluate user charges on a regular basis.

An infrastructure needs survey is continuously updated so that program resources and funds may address the most significant public health and compliance issues facing the eligible PWSs. The survey is started in October and completed by December 31st annually. The program continues to incorporate the most appropriate readiness to proceed criteria to match PWS funding needs in the State. Records of systems user charges are now compiled by the NeRWA and program staff, reviewed periodically for comparison to the program's established affordability criteria, based on median household incomes.

3. To protect the public health by maximizing funding towards high priority projects.

In SFY 2018, one of the three loan agreements was made to proactively mitigate future public health issues. In addition, through the WWAC monthly meetings, eligible projects are discussed by the participating State and Federal agencies and evaluated for the health-related issues being addressed, project alternatives, cost-effectiveness, and long-term solution for water systems. See Section C below for additional details.

4. To promote cost-effective water projects which consider several alternatives and include a cost-effectiveness analysis comparing the appropriateness of the alternatives.

This is accomplished through the program's engineering report requirements in Title 131 and the WWAC process described in the response to number 3 above. Further, the Interagency PER Template developed by the Federal agency leads of Nebraska's water infrastructure funding programs was adopted by the WWAC.

5. To maintain a program that will consider the long-term viability of PWSs.

NDHHS-DPH has had a Capacity Development Strategy program in effect since August 6, 2000, which assists public water systems in acquiring and maintaining technical, managerial, and financial capacity. Also see the Planning Grant program (under the 15% Set-Aside section) which provides funds for planning grant assistance through the DWSRF as a part of the capacity development strategy. This goal is also a major factor being considered in the revisions under discussion for the ranking system of projects.

6. To coordinate with the United States Department of Agriculture-Rural Development and the Nebraska Department of Economic Development-Community Development Block Grant Programs to provide affordable financing for public drinking water needs.

Nebraska's DWSRF program has provided low-interest loans and some forgiveness each year of the program since its inception. With the continued mandatory subsidization requirement of not less than 20% up to 30% with the FFY 2017 and upcoming 2018 capitalization grants, the ability for the program to provide affordable financing continued to increase this past fiscal year. In addition, other agencies' participation in the WWAC include the Nebraska Department of Economic Development, which administers the Community Development Block Grant program, and the USDA-Rural Development, which administers the Business and Community Programs, providing loans and grants to non-profit organizations in rural areas. These programs have provided state and/or federal financial assistance to make drinking water infrastructure projects affordable in the State.

7. To balance the need for fund growth at the rate of inflation experienced in the construction industry versus the desire to provide loans at low interest rates. The fund and loan interest rates and cost of borrowing the state match will be examined annually to evaluate the fund net growth and determine the reasonableness of loan interest rates. Management practices will be reviewed and modified annually to assist in achieving the growth goals.

See response to number 1 above. Projected market and inflation rates are continually monitored, and assessments made to likely events which could impact fund decisions. Further, in maintaining rates at 2%, the program at least matches the U.S. Federal Reserve's long-term goal for inflation.

8. To progress toward incorporating source water protection best management practices into public water supply operations.

NDHHS-DPH conducts routine sanitary surveys of PWSs and NDEQ has implemented a wellhead protection program, both of which assist in incorporating source water management

concepts into the communities' water programs. The NDHHS-DPH priority ranking system prioritizes the projects to allow systems with the greatest public health needs to have first chance at program funding.

C. Funded Program

The Annual Report reflects the results and changes from the SFY 2018 Intended Use Plan approved by the Environmental Quality Council (EQC) on June 17, 2017. More detailed project information for the loans closed in SFY 2018 is provided in Attachment 4, followed by a brief synopsis of the Funding and Planning List communities that closed loans during the fiscal year.

NDHHS-DPH works with all members of the WWAC to identify projects that are potentially ready to be funded and moving forward during the SFY. This approach was helpful for those systems that indicated that they were anticipating moving forward with a project. Below is a summary of the known status for each of the high priority projects for the systems that made contact with the NDHHS-DPH, starting first with the SFY 2018 Funding List communities that chose not to proceed with DWSRF funding assistance.

Funding List Projects

Fairbury, City of – The scope of this project is being finalized, it likely will be funded by the DWSRF next fiscal year.

Giltner, Village of – Chose to privately fund their water main replacement project.

Grand Island, City of – Chose to privately fund their water tower project.

Hastings, City of – Was provided loan assistance through the CWSRF in SFY 2018.

Lincoln, City of – Chose to privately fund their new collector well project.

Milford, City of – Will fund their new well project through the DWSRF in SFY 2018.

Metropolitan Utilities District of Omaha – Chose to privately fund their water treatment plant rehabilitation project.

Ogallala, City of – Will fund their replacement well and mains project through the DWSRF in SFY 2019.

O'Neill, City of – Will fund their replacement water tower project through the DWSRF in SFY 2019.

Plymouth, Village of – Chose to privately fund their water main replacement project.

West Knox Rural Water District – They plan to petition Congress for a direct appropriation for their project. If successful, the DWSRF will provide the match amount in a loan from the program's repaid principal account.

Wolbach, Village of – Has submitted a preliminary engineering report to WWAC to determine a funding source for the storage and meter project, which may be funded by USDA.

Planning List Projects

Alexandria, Village of – Their backup supply well and water main replacement project will be funded by USDA.

Aurora, City of – The City will fund their second replacement well project due to increasing levels of nitrate through the DWSRF in SFY 2019.

Benedict, **Village of** – Their blending supply well to address increasing levels of nitrates will be funded by USDA.

Bradshaw, Village of – Have continued discussions with their engineer to replace the standpipe in the water system.

Bristow, Village of – Is likely developing a replacement water source project due to bacteriological concerns.

Burr, Village of – Chose to privately fund their water meter installation project.

Cedar-Knox RWD – Is studying new water source alternatives to address their Disinfection Byproducts control issues.

Central City, City of – The City will fund their blending and replacement mains project through the DWSRF in SFY 2019.

Edgar, City of – Their interconnection project will likely be funded by USDA to address a Nitrate A.O.

Glenvil, **Village of** – Chose to privately fund their replacement well project.

Lindsay, Village of – The Village will fund their water tower replacement project through the DWSRF in SFY 2019.

Martinsburg, Village of – Is developing is developing a replacement water source project to address a Uranium A.O.

Naponee, Village of – Chose to privately fund their replacement well project.

Peru, City of – Is studying an infrastructure replacement project for its water system.

Pierce, City of – Is planning to construct a replacement water well, which will be funded by the DWSRF in SFY 2019.

Wauneta, Village of – Their replacement water supply wells will be funded by USDA to address their Arsenic A.O.

Wisner, City of – Is planning to construct a replacement water well and water tower, which will be funded by the DWSRF in SFY 2019.

The communities of Cedar Bluffs, Crookston, Jansen, Oxford, Rulo and Syracuse submitted preliminary engineering reports to NDHHS-DPH, for a review for potential funding assistance through the WWAC.

D. Program Changes under Consideration

Changes under consideration include developing ranking criteria to provide forgiveness assistance to small disadvantaged communities planning to replace aged or deteriorated distribution systems. A pilot program to provide planning grants to communities is wrapping up, which would fall under the categories being evaluated. Any proposed changes will be presented in the upcoming SFY 2020 IUP. The program is also considering providing funding for planning loans.

March 9, 2018

Hon. Charlie Janssen Auditor of Public Accounts Lincoln, Nebraska 68509

Dear Mr. Janssen:

Enclosed is our audit report of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program for the year ended June 30, 2017.

The objectives of the audit were to examine organizational structure, report on the financial statements, and evaluate compliance with pertinent State statutes, regulations, and accounting procedures. Our audit included tests of accounting records and internal controls and compliance, as well as other auditing procedures that we determined to be necessary.

Respectfully submitted,

Pat Reding, CPA, CFE Assistant Deputy Auditor

Approved:

1. Jansa

BACKGROUND

The Nebraska Department of Environmental Quality (Agency) – Drinking Water State Revolving Fund Program (Program) was established pursuant to the Federal Safe Drinking Water Act of 1996. The Drinking Water State Revolving Fund Act is set out at Neb. Rev. Stat. §§ 71-5314 to 71-5327 (Reissue 2009, Cum. Supp. 2016, Supp. 2017). The Program has been established pursuant to both the Federal Safe Drinking Water Act and State statutes to provide loans, at reduced interest rates, to finance the construction of publicly and privately owned drinking water facilities. Instead of making grants to communities that pay for a portion of the building of drinking water facilities, the Program provides for low-interest loans with some forgiveness to finance the entire cost of qualified projects. The Program provides a flexible financing source, which can be used for a variety of projects. Loans made by the Program can have terms of repayment between 5 and 20 years, and all repayments, including interest and principal, must be used for the purposes of the Program. Disadvantaged communities may choose to have up to 30 years to repay all loans.

The Program was capitalized by the United States Environmental Protection Agency (EPA) by a series of grants starting in 1997. States are required to provide an additional 20% of the Federal capitalization grant as matching funds in order to receive a Federal grant. As of June 30, 2017, the EPA had awarded \$194 million in capitalization grants to the State, plus \$19.5 million in American Recovery and Reinvestment Act (ARRA) funds. The award of this \$194 million required the State to contribute approximately \$39 million in matching funds. Since the inception of the Program the State has appropriated \$2.33 million to meet the State's matching requirement. Additional matching funds were obtained through the issuance of revenue bonds and the use of Administrative Cash Funds.

The Program is administered by the Agency and the Nebraska Department of Health and Human Services – Division of Public Health. The Agency's primary activities with regard to the Program include the making of loans for facilities and the management and coordination of the Program. The Nebraska Environmental Quality Council approves the rules and regulations of the Agency, the Program's Intended Use Plan, loan interest rates, and revenue bonding amounts. The Nebraska Department of Health and Human Services – Division of Public Health sets the funding priorities.

SUMMARY OF COMMENTS

During our audit of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program, we noted certain matters involving the internal control over financial reporting and other operational matters that are presented here.

- 1. *Financial Statement Errors:* The Agency made errors in preparing its financial statements. Current loans receivable were overstated by \$77,802, and non-current loans receivable were understated by the same amount. The accounts payable accrual entry omitted transactions, totaling \$9,220, affecting multiple financial statement line items. Indirect costs, totaling \$1,655, were not properly accrued, affecting multiple financial statement line items. The compensated absence accrual omitted two employees who worked on the Program, causing Accrued Compensated Absences and operating expenses to be understated by \$2,171.
- 2. *Insufficient Supporting Documentation:* The Agency did not maintain documentation supporting timesheet approval of temporary employees, a batch posted in the State accounting system, review and follow-up procedures for outstanding warrants, or timesheets for one pay period.

More detailed information on the above items is provided hereinafter. It should be noted this report is critical in nature, containing only our comments and recommendations on the areas noted for improvement.

Draft copies of this report were furnished to the Department of Environmental Quality – Drinking Water State Revolving Fund Program to provide its management with an opportunity to review and to respond to the comments and recommendations contained herein. All formal responses received have been incorporated into this report. Responses that indicate corrective action has been taken were not verified at this time, but they will be verified in the next audit.

COMMENTS AND RECOMMENDATIONS

1. <u>Financial Statement Errors</u>

During our review of the Nebraska Department of Environmental Quality (Agency) – Drinking Water State Revolving Fund Program (Program) trial balance and financial statements, we noted the following errors:

- The Agency's split of loans receivable between current and non-current on the Balance Sheet was incorrect. The Agency's procedure is to reflect as current loans receivable any principle payments owed during the upcoming fiscal year, as well as any loans receivable that, as of August 31, 2017, were paid off prior to their due date. However, we noted the Agency received a principle payment in August 2017 that was included twice. As a result, current loans receivable was overstated by \$77,802, and non-current loans receivable was understated by \$77,802.
- When recording the accounts payable accrual for fiscal year 2017, the Agency omitted transactions coded to subprograms for capacity development and source water salaries. Additionally, one transaction coded to a revenue object account was also excluded. This resulted in the following financial statement errors:
 - Accounts Payable & Accrued Liabilities understated by \$9,220.
 - Loan Fees Administration operating revenue overstated by \$1,126.
 - 15% Source Water Assessment Program operating expenses understated by \$8,094.
 - Due from Federal Government understated by \$8,094.
 - Capital Contributions Federal Grants understated by \$8,094.
- The agency did not properly accrue indirect costs of \$1,655 related to the June 26, 2017, through July 9, 2017, pay period. This caused the following errors: 1) Accounts payable was understated by \$1,655; 2) Administrative Costs from Fees were understated by \$1,204; and 3) 15% Source Water Assessment Program was understated by \$451. Finally, Due from Federal Government and Capital Contributions Federal Grants were both understated by \$451.
- Two employees with time coded to the Program were incorrectly excluded from the compensated absence accrual calculation. The employees were on the compensated absence list in the prior year; however, after the Agency went through some reorganization, the employees were wrongly removed from the list. As a result, Accrued Compensated Absences and operating expenses were understated by \$2,171.

The Auditor of Public Accounts (APA) discussed the identified issues with the Agency, and audit adjustments were made to correct errors when proposed by the APA.

A similar finding was noted during the previous audit.

COMMENTS AND RECOMMENDATIONS (Continued)

A good internal control plan and sound accounting practices require procedures to ensure accounting estimates are accurate and complete for proper financial statement presentation. The absence of such procedures increases the risk of materially misstated financial statements.

1. <u>Financial Statement Errors</u> (Concluded)

We recommend the Agency strengthen procedures to ensure accounting entries are proper and complete for accurate financial presentation.

Agency Response: The agency has established a checklist to allow for adequate time to prepare the financials, accrue payroll, and obtain approval from EPA so the proper indirect rate will be used for the corresponding fiscal year.

2. <u>Insufficient Supporting Documentation</u>

During our review of the Nebraska Department of Environmental Quality (Agency) – Drinking Water State Revolving Fund Program (Program) supporting documentation, we noted the following issues:

- Documentation of Agency supervisor approval of temporary employee timesheets was not maintained. Per discussion with the Accounting Clerk, the e-mails containing the approved hours are not kept after being processed.
- Documentation for one batch posted in the State accounting system and selected for testing was unable to be located. The batch was a journal entry changing coding for an earlier reimbursement made to a loan recipient. While the documentation for the reimbursement was observed, documentation for the coding change could not be located.
- Documentation supporting a review and follow-up procedures, if necessary, for outstanding warrants was not available or could not be located by the Agency.
- During payroll testing, one employee had no timecard information in the State accounting system for the pay period September 19, 2016, through October 2, 2016. Upon further review we noted timecard information for all Agency employees was missing from the accounting system for that pay period. Neither the Agency nor the Department of Administrative Services State Accounting could explain the missing records.

Good accounting practices and internal controls require that sufficient documentation be maintained to support transactions. When supporting documentation is not maintained, there is an increased risk of incorrect or fraudulent expenditures.

Neb. Rev. Stat. § 84-1001(1) (Reissue 2014) states the following, in relevant part:

All state officers and heads of departments and their deputies, assistants, and employees, except permanent part-time employees . . . not required to render full-time service, shall render not less than forty hours of labor each week in which a paid holiday may occur.

COMMENTS AND RECOMMENDATIONS (Concluded)

(Concluded)

2. <u>Insufficient Supporting Documentation</u> (Concluded)

Additionally, a good internal control plan requires that hours worked be adequately documented, via timesheets or time logs, etc., and such documentation be kept on file to provide evidence of compliance with § 84-1001(1). Furthermore, a good internal control plan also requires the maintenance of adequate documentation to support that accrued employee sick and vacation leave was actually earned.

We recommend the Agency maintain all supporting documentation for transactions effecting the Program. Additionally, we recommend the Agency review the State accounting system to ensure timecard information is appropriately maintained and documented.

Agency Response: The agency has updated processes to require that temporary employee timesheet approvals be communicated by managers signing an approval form and attaching it to the employee's timesheet. Additional processes we updated by adding a signoff sheet to month end checklists so the outstanding warrants are not missed.

NEBRASKA DEPARTMENT OF ENVIRONMENTAL QUALITY DRINKING WATER STATE REVOLVING FUND PROGRAM

INDEPENDENT AUDITOR'S REPORT

Nebraska Department of Environmental Quality Lincoln, Nebraska

Report on the Financial Statements

We have audited the accompanying financial statements of the business-type activities of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's basic financial statements, as listed in the Table of Contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)

no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to previously present fairly, in all material respects, the respective financial position of the business-type activities of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program, as of June 30, 2017, and the respective changes in financial position and cash flows thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the financial statements of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program are intended to present the balance sheet, the changes in financial position, and cash flows of only that portion of the business-type activities of the State that is attributable to the transactions of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program. They do not purport to, and do not, present fairly the balance sheet of the Nebraska Department of Environmental Quality as of June 30, 2017, the changes in its financial position, or its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Other Matter

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on pages 10 through 13 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, which considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)

Other Reporting Required by Government Auditing Standards and Regulatory Requirements

Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated February 27, 2018, on our consideration of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control over financial reporting and compliance.

Report on Regulatory Requirements

In accordance with the U.S. Office of Management and Budget (OMB) Compliance Supplement, we have also issued our report dated February 27, 2018, on our consideration of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control over compliance and our tests of its compliance with certain provisions of laws, regulations, and grants.

Lincoln, Nebraska February 27, 2018

Philip J. Chan

Philip J. Olsen, CPA, CISA Assistant Deputy Auditor

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section of the Nebraska Department of Environmental Quality (Agency) – Drinking Water State Revolving Fund Program's (Program) financial report presents a narrative overview and analysis of the financial activities of the Program for the fiscal year ended June 30, 2017. This analysis has been prepared by management of the Agency and is intended to be read in conjunction with the Program's financial statements and related footnotes, which follow this section.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Program's basic financial statements. The Program's basic financial statements include the following: 1) Balance Sheet; 2) Statement of Revenues, Expenses, and Changes in Net Position; 3) Statement of Cash Flows; and 4) Notes to the Financial Statements.

The Balance Sheet presents information on all of the Program's assets and liabilities, with the difference between the two reported as net position. The Statement of Revenues, Expenses, and Changes in Net Position presents information showing how the Program's net position changed during the most recent fiscal year.

The Statement of Cash Flows presents the Program's flows of cash by defined categories. The primary purpose of the Statement of Cash Flows is to provide information about the Program's cash receipts and payments during the year.

The Notes to the Financial Statements are an integral part of the financial statements and provide information that is essential to a full understanding of the data provided in the financial statements.

ANALYSIS OF BALANCES AND TRANSACTIONS – ENTERPRISE FUND

Changes in Net Position

For the fiscal year ended June 30, 2017, the net position of the Program increased by 8.0% or \$13,900,741. This occurred because the EPA requested that awarded Federal Grant funds be drawn on a first-in, first-out basis in fiscal year 2016 and fiscal year 2017, which resulted in \$13.4 million in draws. If the Program had not obliged, the Program would have given up the capitalization grant.

Changes in Net Investment in Capital Assets

The fiscal year over year comparison represents the accumulated amount invested in the development of the Loan and Grant Tracking System (LGTS). In fiscal year 2016, the Program invested \$68,036 in LGTS. In fiscal year 2017 an additional \$29,440 was invested in LGTS software development.

Total Non-Operating Revenue (Expense)	15,415,513	12,561,641	22.7%
Change in Net Position	13,900,741	11,077,670	25.5%
Beginning Net Position July 1	173,875,798	162,798,128	6.8%
Ending Net Position June 30	\$ 187,776,539	\$ 173,875,798	8.0%

Federal funds will vary each year depending on the size of each draw, the timing of each draw, the number of communities applying for loans, and the number of loans successfully processed. Changes are inherent in the Program and are expected when draws are based on community requests.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)

ECONOMIC OUTLOOK

The State has continued to take steps to avert major economic impacts both statewide and within communities. The small rural makeup of the State remains a challenge for communities in funding major capital projects. Declining population bases make it difficult to collect the amount of user fees needed to fund infrastructure requirements.

DEBT ADMINISTRATION

Short-Term Debt

The Program had debt activity during the fiscal year that was short-term in nature resulting from a bond issue. The issue was for \$665,000, which was repaid and retired within the same fiscal year.

LOANS AND GRANTS TRACKING SYSTEM SOFTWARE (LGTS)

LGTS is a comprehensive software application developed by Northbridge Environmental, which is designed for Nebraska's State Revolving Fund (SRF) managers and staff to track and manage all aspects of their Clean and Drinking Water SRF programs from project loan application to final repayment, as well as to track all capital contributions, set-aside spending, and bond issuance and repayment.

The software was developed to address the data management needs for all of the steps in the SRF management process, including priority list development, facility location and identification, engineering review and milestone tracking, inspections, contacts, contract approvals and change orders, detailed payment request processing, project spending forecasts, encumbrances, funding draws and transfers, disbursements, amortization schedule creation and management, billing, repayment processing, fund deposits, and tracking of repaid funds by their original source. The software also contains a general ledger that each state can customize to match existing accounting systems and create trial balances, financial statements, and related financial schedules.

MANAGEMENT'S DISCUSSION AND ANALYSIS (Continued)

LGTS has built-in role based security that requires users to log in each time they open the Program. This security system is based on defined roles that each user is playing in the Program. Security roles limit users to performing certain functions.

Historical data is extracted from spreadsheets or other data systems to load LGTS with data, test the validity of the data, and ensure that LGTS can be used effectively. This task is handled by a combination of staff efforts to assemble existing data sources and outside help to ensure that the data is used properly. This process usually yields a dual benefit of having a system with clean data and provides a quality assurance check of the many transactions that have occurred years ago and often by a number of staff members.

Nebraska's State Revolving Fund programs have begun implementation of the LGTS system. During fiscal year 2014, planning of the implementation phases, business rules, and hardware/software installations occurred. During fiscal year 2015 through 2017, the system was used concurrently with existing systems, to create a basis for reliability and consistency. Once dependable, reconciled results will be established, the existing internal system will be discontinued, and LGTS will become the sole system for use within the SRF Program alongside the State Accounting system.

Contract costs for the purchase and implementation of the LGTS system have been handled through the existing Northbridge contract with the Federal Environmental Protection Agency (EPA) procurement. Therefore, expenditures are withheld as an "in-kind" deduction to the total annual grant, which is awarded to the Program each year. The Federal EPA staff negotiate, monitor, and manage the Northbridge contract for LGTS.

The Agency is capitalizing the costs that the EPA reimburses directly to Northbridge, as well as the cost of staff time utilized for implementation

NOTES TO THE FINANCIAL STATEMENTS

For the Fiscal Year Ended June 30, 2017

1. <u>Summary of Significant Accounting Policies</u>

A. Basis of Presentation

The accompanying basic financial statements of the Nebraska Department of Environmental Quality (Agency) – Drinking Water State Revolving Fund Program (Program) have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles.

The basic financial statements have been prepared primarily from accounts maintained by the State Accounting Administrator of the Department of Administrative Services (DAS) and the Trustee – Wells Fargo Bank (Trustee) for the State match bond accounts.

B. Reporting Entity

The Program is established under and governed by the Safe Drinking Water Act of the Federal Government and the Drinking Water State Revolving Fund Act of the State of Nebraska. The Agency is a State agency established under and governed by the laws of the State of Nebraska. As such, the Agency is exempt from State and Federal income taxes. The Program's management has also considered all potential component units for which it is financially accountable and other organizations that are fiscally dependent on the Program or whose relationship with the Program is so significant that exclusion would be misleading or incomplete. The Governmental Accounting Standards Board (GASB) has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization's governing body, and (1) the ability of the Agency to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the Agency. The Agency is also considered financially accountable if an organization is fiscally dependent on, and there is potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the Agency, regardless of whether the organization has (1) a separately elected governing board, (2) a governing board appointed by a higher level of government, or (3) a jointly appointed board.

These financial statements present the Program. No component units were identified. The Program is part of the primary government for the State of Nebraska's reporting entity.

C. Fund Structure

The Program's accounts are maintained in accordance with the principles of fund accounting to ensure compliance with limitations and restrictions placed on the use of resources available to it. Under fund accounting, individual funds are established for the purpose of carrying on activities or attaining objectives in accordance with specific

NOTES TO THE FINANCIAL STATEMENTS (Continued)

1. <u>Summary of Significant Accounting Policies</u> (Continued)

regulations, restrictions, or limitations. Each individual fund is a self-balancing set of accounts recording cash and other financial resources, together with liabilities and residual equities or balances, and changes therein. The State accounting system includes the following Program funds, as identified in the Drinking Water State Revolving Fund Act:

- Drinking Water Facilities Funds Federal Funds 48416 and 48418; and Repaid Principle and Bond Funds 68481, 68482, 68483, 68484, and 68485.
- Drinking Water Administration Fund Cash Fund 28630

These funds are used to account for revenues and expenses for loans and administrative expenses of the Program.

The activity of these State of Nebraska funds has been combined and reported as an enterprise fund, which under governmental GAAP is a proprietary fund type. This fund type reflects transactions used to account for those operations that are financed and operated in a manner similar to a private business. The accounting for the Program's transactions in this manner is a requirement of the Environmental Protection Agency (EPA), as it and the Agency have decided that the determination of revenues earned, expenses incurred, and/or net income is necessary to demonstrate the success of the Program and to assure the EPA the Program will be available in perpetuity, as intended.

This fund classification differs from the classification used in the State of Nebraska's Comprehensive Annual Financial Report (CAFR). The CAFR classifies the Cash funds, Federal funds, and Bond funds as special revenue funds, as they meet the definition of special revenue funds under GASB Statement 54. In that statement, special revenue funds are defined as funds used to account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specific purposes.

D. Measurement Focus, Basis of Accounting

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus and basis of accounting. An enterprise fund is accounted for on a flow of economic resources measurement focus. With this measurement focus, all assets and all liabilities associated with the operation of the fund are included on the balance sheet. Enterprise fund operating statements present increases (i.e., revenues) and decreases (i.e., expenses) in total net position.

Enterprise funds utilize the accrual basis of accounting. Under this method, revenues are recorded when earned, and expenses are recorded at the time liabilities are incurred.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

1. <u>Summary of Significant Accounting Policies</u> (Continued)

E. Cash and Cash Equivalents

Cash and Cash Equivalents – Cash and cash equivalents consist of cash in the State Treasury. This includes cash in bank accounts and petty cash, short-term investments, such as certificates of deposit, repurchase agreements, and U.S. treasury bills. These short-term investments have original maturities (remaining time to maturity at acquisition) of three months or less. These investments are stated at cost, which at June 30, 2017, approximates fair value due to their short-term nature. Banks pledge collateral, as required by law to guarantee State funds held in time and demand deposits.

Cash and cash equivalents are under the control of the State Treasurer or other administrative bodies, as determined by law. All cash deposited with the State Treasurer is initially maintained in a pooled cash account. On a daily basis, the State Treasurer invests cash not needed for current operations with the State's Investment Council, which maintains an operating investment pool for such investments. Interest earned on these investments is allocated to funds based on their percentage of the investment pool.

F. Loans Receivable

The State operates the Program as a direct loan program, whereby loans are made to communities. Loan funds are disbursed to the local agencies as they expend funds for the purposes of the loan. Interest is calculated from the date the funds are advanced. After the final disbursement has been made, the amortization schedule identified in the loan agreement is adjusted for the actual amounts disbursed. The interest rates on loans range from 2.0% to 4.0%, and the terms on outstanding loans range from 9.5 to 30 years. Disadvantaged communities may have up to 30 years to repay.

The Program loans are funded from Federal capitalization grants, State match funding, and the Drinking Water State Revolving Fund. The grants are funded, on average, 83.33% from Federal funds and 16.67% from State match funds. Reimbursements to communities are paid 100% from State matching funds until they have been exhausted, and then from Federal capitalization grant funds or Drinking Water State Revolving funds. The Drinking Water State Revolving Fund is financed through principal repayments plus interest earnings becoming available to finance new projects, allowing the funds to "revolve" over time.

The current loans receivable amount was determined using the amount of principal payment due to the Program at June 30, 2017, which is collectible in fiscal year 2018. Loans receivable that were paid in full, prior to their due date, as of August 31, 2017, were included in the current loans receivable balance as opposed to the long-term loans receivable balances.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

1. <u>Summary of Significant Accounting Policies</u> (Continued)

No provisions were made for uncollectible accounts, as all loans were current, and management believed all loans would be repaid according to the loan terms. There is a provision for the Program to intercept State aid to a community in default of its loan.

G. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at fiscal year end and revenues and expenses during the reporting period. Actual results could differ from those estimates.

H. Compensated Absences

All permanent employees working for the Program earn sick and annual leave and are allowed to accumulate compensatory leave rather than be paid overtime. Temporary and intermittent employees are not eligible for paid leave. The liability has been calculated using the vesting method, in which leave amounts, for both employees currently eligible to receive termination payments and other employees expected to become eligible in the future to receive such payments upon termination, are included.

Program employees accrue vested annual leave at a variable rate based on years of service. Generally, accrued annual leave cannot exceed 35 days at the end of a calendar year. Employees accrue sick leave at a variable rate based on years of service. In general, accrued sick leave cannot exceed 240 days. There is no maximum limit on the accumulation of sick leave days for employees under certain labor contracts. Sick leave is not vested except upon death or upon reaching the retirement eligibility age of 55 - or a younger age, if the employee meets all criteria necessary to retire under the primary retirement plan covering his/her State employment, at which time the State is liable for 25 percent of the employee's accumulated sick leave. Employees under certain labor contracts can only be paid a maximum of 60 days.

The Program's financial statements recognize the expense and accrued liability when vacation and compensatory leave is earned or when sick leave is expected to be paid as termination payments.

I. Due to Grant Recipients

Planning Grants for Preliminary Engineering Reviews are awarded through the Federal Capitalization Grant 15% set-aside funds. The Program awards Planning Grants to communities with populations below 10,000 where the Public Water System is operated by a political subdivision. Available grants are given upon evidence that the eligible Public

NOTES TO THE FINANCIAL STATEMENTS (Continued)

1. <u>Summary of Significant Accounting Policies</u> (Continued)

Water System has entered into a contract with a professional engineer to develop a preliminary engineering report. Planning Grants are intended to provide financial assistance to Public Water Systems for projects seeking funding through the Water Wastewater Advisory Committee common pre-application process. The grant covers 90% of the preliminary engineering report and other eligible costs and will require 10% matching funds from the Public Water System.

Source Water Protection Grants are also awarded through the Federal Capitalization Grant 15% set-aside funds. They are available for proactive projects geared toward protecting Nebraska's drinking water supplies and will address drinking water quality, quantity, security, and/or education. Eligible applicants are political subdivisions that operate a Public Water System serving a population of 10,000 or fewer.

The Program may choose to provide additional subsidization for municipalities in the form of loan forgiveness. Forgiveness funds will be targeted primarily to the highest ranked eligible projects on the Priority Funding Lists, those that address public health needs, or are needed to address critical capacity development concerns. The loan recipient will not be required to repay the portion of the loan principal that has been designated as loan forgiveness under the terms and conditions of the loan contract. Loan forgiveness is considered a grant for purposes of the financial statements, since repayment is not required.

For Planning Grants, Source Water Protection Grants, and Loan Forgiveness awards, once the municipality submits proof of vendor payment to the Agency, it is reimbursed for its project costs by the Program. The Program's financial statements recognized the expense and accrued liability to the Program when the municipality incurred the project expense, which may not be in the same fiscal year as when costs were reimbursed by the Program.

J. Operating Revenues and Expenses

Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the Program's principal ongoing operations. The operating revenues of the Program include loan fees administration and interest on loans, since making loans is the primary purpose of the Program. The operating expenses of the Program are administration and set-aside expenses and loan forgiveness.

K. Capital Assets

The Program has only one capital asset, the Loans and Grants Tracking System (LGTS) software, and it is recorded at cost. The Agency began the development phase of the LGTS software during the fiscal year ended June 30, 2014, and is anticipating this phase to be completed during the fiscal year ended June 30, 2018. The LGTS software is considered

NOTES TO THE FINANCIAL STATEMENTS (Continued)

an intangible capital asset, and the Agency follows the capitalization policy set forth by the

1. <u>Summary of Significant Accounting Policies</u> (Concluded)

State of Nebraska for intangible capital assets, which requires capitalization of such assets when the cost of such asset is in excess of \$100,000 and has an expected useful life of greater than one year. The LGTS software has an estimated useful life of seven years. Depreciation/amortization will begin upon completion of the developmental phase and the software being put into production, and it will be computed using the straight-line method over the estimated useful life of the asset.

2. <u>Cash in State Treasury</u>

The Cash in State Treasury, as reported on the balance sheet, is under the control of the Nebraska State Treasurer or other administrative bodies, as determined by law. Investment of all available cash is made by the State Investment Officer on a daily basis, based on total bank balances. These funds are held in the State of Nebraska Operating Investment Pool (OIP), an internal investment pool. Additional information on the deposits and investments portfolio, including investment policies, risks, and types of investments, can be found in the State of Nebraska's CAFR for the fiscal year ended June 30, 2017. All interest revenue is allocated to the General Fund except allocations required by law to be made to other funds. All funds of the Program were designated for investment during fiscal year 2017. Amounts are allocated on a monthly basis based on average balances of all invested funds.

3. Loans Receivable

As of June 30, 2017, the Program had 124 outstanding community loans that totaled \$83,470,606. The outstanding balances of the 10 communities with the largest loan balances, which represent 50.2% of the total loans, were as follows:

Community	Outstan	ding Balance
Lincoln	\$	12,936,098
Sidney		5,924,476
MUD – Omaha		4,292,138
Auburn		3,826,399
Falls City		3,434,830
Alliance		2,930,313
Blair		2,551,099
Ogallala		2,117,687
Utica		2,011,470
Waverly		1,880,040
TOTAL	\$	41,904,550

NOTES TO THE FINANCIAL STATEMENTS (Continued)

4. <u>Capital Assets</u>

The Drinking Water SRF capital assets activity for the year ended June 30, 2017, was:

	Beginning Balance As Restated		Additions		Retirements		Ending Balance	
Software Development In-Progress								
Loans and Grants Tracking System (LGTS)	\$	165,587	\$	29,440	\$	-	\$	195,027

5. <u>Bonds Payable</u>

The State has entered into a special financing arrangement with the Nebraska Investment Finance Authority (NIFA), an independent instrumentality of the State exercising essential public functions, to provide matching funds for the Program. NIFA issues bonds, and the proceeds are held by the Trustee until they are needed by the Program for Loan Purposes.

The proceeds of short-term revenue bonds are used by the Agency to provide the 20% match requirements for the Agency's Federal Capitalization Grants. Interest revenue from Program loans was pledged to pay off the bonds. During the fiscal year, the Program utilized \$1,000,000 of administrative cash funds and issued and retired Series 2016 short-term revenue bonds to meet their match requirements for the 2017 DWSRF grant. Bonds Payable activity for fiscal year 2017 on the short-term bond was as follows:

	Beginning Balance	Additions	Retirements	Ending Balance
Bonds Payable	\$ -	\$ 665,000	\$ 665,000	\$ -

6. <u>Non-current Liabilities</u>

Changes in non-current liabilities for the year ended June 30, 2017, were as follows:

Amounto

	reases	Ending alance	Due Within One Year						
Compensated Absences	\$	19,349	\$	-	\$	448	\$ 18,901	\$	1,701

7. <u>Capital Contributions</u>

Included in the net position is the total amount of capitalization grants drawn from the EPA by the Agency. The following summarizes the EPA capitalization grants awarded and drawn, as well as the remaining balance as of June 30, 2017. The year column relates directly to the grant amount column and represents the fiscal year the grant funds were appropriated by Congress. The amount drawn column is as of June 30, 2017, and may have been drawn over multiple years.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

7. <u>Capital Contributions</u> (Concluded)

Federal Fiscal					
Year Available	Grant Amount	Amount Drawn	Balance		
1997	\$ 12,824,000	\$ 12,824,000	\$ -		
1998	7,121,300	7,121,300	-		
1999	7,463,800	7,463,800	-

2009	8,146,000	8,146,000	-		
2010	13,573,000	13,573,000	-		
2011	9,418,000	9,418,000	-		
2012	8,695,558	8,695,558	-		
2013	8,533,907	8,533,907	-		
2014	8,845,000	8,845,000	-		
2015	8,681,560	8,610,271	71,289		
2016	8,280,275	7,593,714	686,561		
2017	8,312,000	-	8,312,000		
TOTAL	\$ 202,190,026	\$ 193,120,176	\$ 9,069,850		

Not included in the above grant totals are the amounts set aside as in-kind contributions for the Loans and Grants Tracking System (LGTS) software development. The 2012 grant had \$166,535, the 2015 grant had \$105,440, and the 2016 grant had \$31,725 set aside as in-kind amounts for use by the EPA for the development of the new LGTS software.

The amount of in-kind contributions utilized for the LGTS software during the fiscal year ending June 30, 2017, was \$29,440. The total amount utilized for LGTS as of June 30, 2017, was \$195,027. Additional in-kind contributions were received and capitalized for the Clean Water State Revolving Fund Program, which also utilizes the LGTS software.

8. <u>Loan Fees Administration</u>

To meet the long-term administrative needs of the Program, an annual fee of up to 1% is charged against the outstanding principal on loans. This fee is not included in the loan principal. It is calculated on a semi-annual basis and billed when the loan principal and

NOTES TO THE FINANCIAL STATEMENTS (Continued)

interest payments are due. The fee is applied to all loans in accordance with Title 131 Nebraska Administrative Code (NAC) Chapter 8 and the loan agreement.

9. <u>Interest on Fund Balance – State Operating Investment Pool</u>

The reported amount represents the earnings the Program received from idle funds invested by the Nebraska State Treasurer with the State's Investment Council. Interest is credited on approximately the twenty-fifth day of each subsequent month.

10. **Operating Expenses**

The operating expenses of the Program are classified, for financial reporting purposes, into five categories. There were expenses related to three set-aside activities established under § 1452 of the Safe Drinking Water Act. The three set-aside activities are the following:

- 15% Source Water Assessment Program
- 2% Technical Assistance to Small Systems
- 10% Public Water Supply System

A Memorandum of Understanding was entered into between the Agency and the Nebraska Department of Health and Human Services so that the Agency can carry out oversight and related activities of the Program. The Program provides funding to the Nebraska Department of Health and Human Services with the three set-asides noted above.

All set-asides are required to be Federally funded. State match dollars can only be used for the purpose of providing loans to owners of Public Water Supply Systems. Other significant categories of expenses are Loan Forgiveness and Administrative Costs from Fees.

The following is an explanation of these categories:

Administrative Costs from Fees

To meet the long-term administrative needs of the Program, an annual fee of up to 1% is charged against the outstanding principal on loans. This fee is deposited into a separate account and is used for administrative costs of the Program. Revenues from fees can be used to provide the capitalization grant match, loan forgiveness, or planning grants. 15% Source Water Assessment Program

Identified in Federal regulations as local assistance and other State programs, a State may use up to 15% of the capitalization grant amount for specified uses, as follows:

• Provide assistance to a community water system to implement voluntary, incentivebased source water quality protection measures;

NOTES TO THE FINANCIAL STATEMENTS (Continued)

• Provide funding to delineate and assess source water protection areas;

10. <u>Operating Expenses</u> (Concluded)

- Support the establishment and implementation of wellhead protection programs; and
- Provide funding to a Public Water System to implement technical and/or financial assistance under the capacity development strategy.

2% Technical Assistance to Small Systems

A State may use up to 2% of the grant funds awarded to provide technical assistance to public water systems serving 10,000 people or less. If the State does not use the entire 2% for these activities against a given grant award, it can reserve the excess authority and use it for the same activities in later years. A State may use these funds to support a technical assistance team or to contract with outside organizations to provide technical assistance.

10% Public Water Supply System

A State may use up to 10% of the grant funds awarded to do the following:

- Administer the State Public Water System Supervision program;
- Administer or provide technical assistance through source water protection programs, which includes the Class V portion of the Underground Injection Control Program;
- Develop and implement a capacity development strategy; and
- Develop and implement an operator certification program.

Loan Forgiveness

The total of expenses reported as Loan Forgiveness is the amount of loan principal payments the State subsidized to communities meeting the definition of "disadvantaged" or which the State expects to become disadvantaged as a result of the project. The amount of these subsidies during a particular fiscal year's capitalization grant cannot exceed 30% of the amount of the capitalization grant for that year.

11. <u>State Employees Retirement Plan (Plan)</u>

The single-employer Plan became effective by statute on January 1, 1964. The Public Employees Retirement Board was created in 1971 to administer the Plan. The Plan consists of a defined contribution option and a cash balance benefit. The cash balance benefit is a

NOTES TO THE FINANCIAL STATEMENTS (Continued)

type of defined benefit plan. Each member employed and participating in the retirement

11. <u>State Employees Retirement Plan (Plan)</u> (Concluded)

system prior to January 1, 2003, elected either to continue participation in the defined contribution option or to begin participation in the cash balance benefit. The defined contribution option is closed to new entrants. All new members of the Plan on and after January 1, 2003, become members of the cash balance benefit. The benefits and funding policy of the Plan are established and can only be amended by the Nebraska Legislature.

All permanent full-time employees are required to begin participation in the retirement system upon employment. All permanent part-time employees who have attained the age of 18 years may exercise the option to begin participation in the retirement system.

Contribution – Per statute, each member contributes 4.8% of his or her compensation. The Agency matches the member's contribution at a rate of 156%. The employee's and employer's contributions are kept in separate accounts.

The employee's account is fully vested. The employer's account is fully vested after a total of three years of participation in the system, including credit for participation in another Nebraska governmental plan prior to actual contribution to the Plan.

Defined Contribution Option – Upon attainment of age 55, regardless of service, the retirement allowance will be equal to the sum of the employee and employer account. Members have several forms of payment available, including withdrawals, deferrals, annuities, or a combination of these.

Cash Balance Benefit – Upon attainment of age 55, regardless of service, the retirement allowance will be equal to the accumulated employee and employer cash balance accounts, including interest credits, annuitized for payment in the normal form. The normal form of payment is a single-life annuity with five-year certain, payable monthly. Members will have the option to convert their member cash balance account to a monthly annuity with built-in cost-of-living adjustments of 2.5% annually. Also available are additional forms of payment allowed under the Plan, which are actuarially equivalent to the normal form, including the option of lump-sum or partial lump-sum.

For the fiscal year ended June 30, 2017, employees contributed \$11,449, and the Agency contributed \$17,861. A separate plan report is issued and can be obtained from the Nebraska Public Employees Retirement System. This report contains full pension-related disclosures.

The State of Nebraska Comprehensive Annual Financial Report (CAFR) also includes pension-related disclosures. The CAFR report is available from the Nebraska Department

NOTES TO THE FINANCIAL STATEMENTS (Continued)

of Administrative Services – Accounting Division or on the Nebraska Auditor of Public Accounts' website at www.auditors.nebraska.gov.

12. <u>Contingencies and Commitments</u>

Risk Management – The Agency is exposed to various risks of loss related to torts, theft of, damage to, or destruction of assets, errors or omissions, injuries to employees, and natural disasters. The Agency, as part of the primary government for the State, participates in the State's risk management program. DAS is responsible for maintaining the insurance and self-insurance programs for the State. The State generally self-insures for general liability, employee health care, employee indemnification, and workers' compensation. The State has chosen to purchase insurance for the following:

- A. Motor vehicle liability with vehicular pursuit, which is insured for the first \$5,000,000 of exposure per accident with a self-insured retention of \$300,000 and \$300,000 corridor retention. Motor vehicle liability is insured for \$1,000,000 with a self-insured retention of \$200,000, and with excess coverage of \$400,000,000. Insurance is also purchased, with various limits and deductibles, for physical damage and uninsured and underinsured motorists. State agencies have the option to purchase coverage for physical damage to vehicles. There is a \$5,000 deductible for this coverage.
- B. Life insurance for eligible employees.
- C. Crime coverage, with a limit of \$31,000,000 for each loss, and a \$25,000 selfinsured retention per incident subject to specific conditions, limits, and exclusions.
- D. Real and personal property on a blanket basis for losses up to \$401,000,000, with a self-insured retention of \$200,000 per loss occurrence. Newly acquired properties are covered up to \$10,000,000 for 120 days, and after 120 days, if the property has not been reported, the limit decreases to \$5,000,000. The perils of flood, earthquake, and acts of terrorism have various coverage, sub-limits, and self-insurance. State agencies have the option to purchase building contents and inland marine coverage.

Details of the various insurance coverages are available from DAS – Risk Management Division.

No settlements exceeded commercial insurance coverage in any of the past three fiscal years. Health care insurance is funded in the Insurance Trust Funds through a combination of employee and State contributions. Workers' compensation is funded in the Workers' Compensation Internal Service Fund through assessments on each agency based on total agency payroll and past experience. Tort claims, theft of, damage to, or destruction of assets, errors or omissions, and natural disasters would be funded through the State General

NOTES TO THE FINANCIAL STATEMENTS (Concluded)

Fund or by individual agency assessments, as directed by the Legislature, unless covered by purchased insurance. No amounts for estimated claims have been reported in the Program's financial statements.

12. <u>Contingencies and Commitments</u> (Concluded)

Litigation – The potential amount of liability involved in litigation pending against the Agency, if any, could not be determined at this time. However, it is the Agency's opinion that final settlement of those matters should not have an adverse effect on the Agency's ability to administer current programs. Any judgment against the Agency would have to be processed through the State Claims Board and be approved by the Legislature.

NEBRASKA AUDITOR OF PUBLIC ACCOUNTS

Charlie Janssen State Auditor

Charlie.Janssen@nebraska.gov

PO Box 98917 State Capitol, Suite 2303 Lincoln, Nebraska 68509 402-471-2111, FAX 402-471-3301 www.auditors.nebraska.gov

NEBRASKA DEPARTMENT OF ENVIRONMENTAL QUALITY DRINKING WATER STATE REVOLVING FUND PROGRAM REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Independent Auditor's Report

Nebraska Department of Environmental Quality Lincoln, Nebraska

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the business-type activities of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program, as of and for the year ended June 30, 2017, and the related notes to the financial statements, which collectively comprise the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's basic financial statements, and have issued our report thereon dated February 27, 2018.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control. Accordingly, we do not express an opinion on the effectiveness of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and

corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Additional items

We noted certain additional items that we reported to management of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program in the Comments Section of this report as Comment Number 1 (Financial Statement Errors) and Comment Number 2 (Lack of Supporting Documentation).

Nebraska Department of Environmental Quality's Response to Findings

The Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's response to the findings identified in our audit are described in the Comments Section of the report. The Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's response was not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it. Where no response is indicated, the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program declined to respond.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Lincoln, Nebraska February 27, 2018

Philip J. Olsen, CPA, CISA Assistant Deputy Auditor

NEBRASKA AUDITOR OF PUBLIC ACCOUNTS

Charlie Janssen State Auditor

Charlie.Janssen@nebraska.gov

PO Box 98917 State Capitol, Suite 2303 Lincoln, Nebraska 68509 402-471-2111, FAX 402-471-3301 www.auditors.nebraska.gov

NEBRASKA DEPARTMENT OF ENVIRONMENTAL QUALITY DRINKING WATER STATE REVOLVING FUND PROGRAM REPORT ON COMPLIANCE AND ON INTERNAL CONTROL OVER COMPLIANCE WITH REQUIREMENTS APPLICABLE TO THE NEBRASKA DEPARTMENT OF ENVIRONMENTAL QUALITY – DRINKING WATER STATE REVOLVING FUND PROGRAM IN ACCORDANCE WITH THE OMB COMPLIANCE SUPPLEMENT

INDEPENDENT AUDITOR'S REPORT

Nebraska Department of Environmental Quality Lincoln, Nebraska

Report on Compliance for the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program

We have audited the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program for the year ended June 30, 2017.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of

Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program occurred. An audit includes examining, on a test basis, evidence about the Nebraska Department of Environmental Quality – Drinking Fund Program's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program. However, our audit does not provide a legal determination of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's compliance.

Opinion on the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program

In our opinion, the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program for the year ended June 30, 2017.

Report on Internal Control Over Compliance

Management of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control over compliance with the types of requirements that could have a direct and material effect on the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Nebraska Department of Environmental Quality – Drinking Water State Revolving Fund Program's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a Federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a Federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a

combination of deficiencies, in internal control over compliance with a type of compliance requirement of a Federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

ATTACHMENT 4 - PROJECT INFORMATION FOR SFY 2018 LOANS									
PWSProjectSystemName		Project Description	Public Health Impact Description	Comments					
Blair, City of	South Pump Station and 16th Avenue Main Replacement	The project will replace the South Pump Station, which lacks capacity to meet the current user demand, and to replace approximately 3,000 feet of water main along 16th Street, which is nearly 90 years old and has had multiple leaks in recent years.	N/A	The infrastructure investment in a replacement booster station and water mains is in line with the stated goals of the U.S. Environmental Protection Agency's Drinking Water Infrastructure Sustainability Policy.					
Milford, City of	New Well with Transmission Main, Well Upgrades and Distribution System Improvements	In July 2015, the City's Engineer completed a preliminary engineering report that evaluated the siting of a new well with transmission main. The PWS consists of six municipal wells, a 300,000 gallon water storage tower, an 112,000 gallon ground tank with a booster pump, and a distribution system. The report recommended that the City construct a third deeper low nitrate well, to ensure that the City can adequately maintain a blended supply below the standard of 10 mg/L. Lastly, several distribution system improvements were identified which will also be constructed, and upgrades to existing system wells to improve the efficiency of the system operation.	Within the past several years, three of the wells tested above the drinking water standard for Nitrates at monitored concentrations of 12.5, 13.0 and 16.9 mg/L, and a fourth well had an elevated level of 8.83 mg/L. The supplies from each of the wells is blended with the remaining two system wells, which are screened at greater depths, have lower pumping capacities, elevated levels of iron and manganese, and are nearing 20 years of operating age. The new blending well will ensure the City's supply remains below the Nitrate drinking water standard.						
York, City of	Lincoln Avenue Water Main Replacement	The project is needed to replace 6,000 feet of water main along Lincoln Avenue, which is over 100 years old, deteriorating and as such, leaks are now becoming more frequent. The replacement main will run through the main commercial center of the City, and the line is being reasonably upsized to 12 inches in diameter. York may also be updating their Master Water Facilities Plan with the assistance.	N/A	The infrastructure investment in a replacing this significantly aged deteriorating water main is in line with the stated goals of the U.S. Environmental Protection Agency's Drinking Water Infrastructure Sustainability Policy.
