## Foreword

The New York State (“State”) Environmental Facilities Corporation (“EFC”), with its partner the State Department of Environmental Conservation (“DEC”), is responsible for the operation and administration of the State’s Clean Water State Revolving Fund (the “CWSRF”). The CWSRF allows EFC to provide interest-free or low-interest rate financing and grants to support a variety of eligible water quality improvement projects, including point source projects, nonpoint source projects and national estuary projects. EFC similarly operates and administers the State’s Drinking Water State Revolving Fund (the “DWSRF”), with its partner the State Department of Health (DOH), to finance drinking water infrastructure projects.

The federal Environmental Protection Agency (“EPA”) annually provides a grant (the “Capitalization Grant”) to the State to further capitalize the CWSRF and DWSRF programs. EFC uses this federal money, along with the required State match funds equal to 20%, to make loans and provide financial assistance for approved projects. As borrowers repay their loans, repayments of loan principal and interest earnings are recycled back into both the CWSRF and DWSRF programs to finance new projects and allow the funds to “revolve” over time. In addition, EFC issues bonds to increase the capital available to fund projects in the CWSRF and DWSRF programs. EFC is able to use CWSRF and DWSRF assets for security and repayment of its bonds.

Since the inception of the CWSRF program in 1990, EFC has provided more than \$17.2 billion in low-cost financing from the CWSRF to protect water quality. To improve drinking water in the State, EFC has provided more than \$4.4 billion in low-cost financing for drinking water projects since the DWSRF began in 1996.

The demand for EFC’s financial assistance is higher than ever, in part due to the renewed focus on water infrastructure issues, and because of the State Water Infrastructure Improvement Act of 2017 (“WIIA”). The enacted State budget for State Fiscal Year 2017-18 made available \$225 million for the third offering of WIIA grants to help fund critical wastewater and drinking water system improvements. To date, WIIA grants have been awarded to 290 projects in support of nearly \$1.9 billion in infrastructure investment. For federal fiscal year (“FFY”) 2018, EFC expects to close over \$1 billion of total project financings for the CWSRF and DWSRF programs.

EFC anticipates that the demand for financing will continue to exceed the amount of financial assistance that EFC can provide each year. This CWSRF Intended Use Plan (“IUP”), which covers FFY 2018, identifies clean water infrastructure projects that would require over \$4.1 billion in funding. EFC anticipates that it will be able to provide zero-percent interest rate or low-cost financing for approximately \$903 million of projects costs, which comprises approximately 25% of the identified demand. Other projects may receive market-rate financing, which is typically at a more favorable rate than a borrower could obtain independent of EFC financing.

In order to determine the type of financing that a borrower may receive, its project must first be listed on the IUP. Projects are ranked using the scoring criteria prescribed in State regulation, which are generally based on how critical a project is to protecting or improving water quality.

EFC provides an array of financial assistance options that make “one-stop shopping” possible for all phases of clean water infrastructure projects. EFC can finance the full project cost, including planning, design and construction, with a short-term financing. EFC may offer affordable long-term financing to the borrower when the project’s final costs have been determined. Section 5.1 of this IUP discusses these financing options in greater detail.

For FFY 2018, EFC is using updated median household income (MHI), population, and poverty data.

The IUP establishes EFC’s annual work flow and the parameters for financing eligible CWSRF projects. The table below summarizes important program dates for the upcoming FFY.

October 1, 2017	Effective Date of the 2018 IUP
March 1, 2018	Income survey deadline if financing during FFY 2018
June 29, 2018	Financing applications are due for all projects
July 2018	Draft FFY 2019 IUP issued
Late August 2018	Comments on Draft FFY 2019 IUP are due New project listing deadline for the FFY 2019 IUP
September 30, 2018	End of the 2018 IUP year

## 1. Introduction

The federal Water Pollution Control Act (“Clean Water Act”) requires the State to prepare a plan identifying the intended uses of the funds in the CWSRF and describing how those uses support the goals of the CWSRF. The State prepares an IUP annually, providing for public review and comment, before submitting it to the EPA. The EPA must receive the IUP before it awards the Capitalization Grant to the State’s CWSRF.

This IUP is divided into major topics to provide fundamental information to readers about which projects are eligible for CWSRF financing, how the CWSRF works, the type of financial assistance available through the CWSRF, and the sources and uses of the CWSRF’s funds. This IUP also provides links throughout the body of the document to a listing of IUP resources on [EFC’s website \(<https://www.efc.ny.gov/2018-cw-iup>\)](https://www.efc.ny.gov/2018-cw-iup).

## 2. Eligible Projects

EFC provides CWSRF financial assistance for the planning, design and construction of the following types of eligible projects:

- a. Municipally-owned treatment works projects, including:
  - New, expanded or rehabilitated wastewater treatment plants;
  - Sludge treatment and disposal facilities including biosolids reuse;
  - Collector, trunk and interceptor sewers;
  - Sewer rehabilitation and infiltration/inflow correction;
  - Landfill leachate collection, storage and treatment;
  - Sewers and treatment capacity for industrial wastewater (including storage, recycling or reclamation); and
  - Combined sewer overflow (“CSO”) and sanitary sewer overflow (“SSO”) abatement.
- b. Stormwater/Non-Point Source (“NPS”) projects. These projects may be publicly or privately owned, and must be consistent with New York State’s NPS Management Plan:
  - Green infrastructure projects that manage stormwater, such as constructed wetlands, bioretention, porous pavement, and green roofs;
  - Waterbody restoration including stream bank stabilization and drainage erosion and sediment control;
  - Restoration of riparian vegetation, wetlands and other water bodies;
  - Environmentally innovative projects that demonstrate new and/or innovative approaches to delivering services or managing water resources;
  - Capping and closure of municipal solid waste landfills, landfill reclamation, and landfill gas collection and control systems for existing and new landfills; and

- Measures to manage, reduce, treat, or recapture stormwater or subsurface drainage water.
- c. Municipal and non-municipal projects that support and implement EPA-approved National Estuary Conservation and Management Plans for the New York-New Jersey Harbor, Peconic Bay, and Long Island Sound Estuaries.
- d. Construction, repair, or replacement of municipal and non-municipal, decentralized wastewater treatment systems that treat municipal wastewater or domestic sewage.

[EFC's website](#) provides more information about the types of projects that are eligible for CWSRF financial assistance. If additional information is required, applicants may contact EFC to discuss their proposed water quality projects and their potential eligibility.

### 3. Project Priority Lists - Evaluation and Scoring

EFC scores each project pursuing CWSRF financial assistance using a project priority score system. Each project is categorized based on the applicant's population and whether the applicant is a non-municipal entity. A project's rank relative to other projects in its category determines the type of financial assistance available for the project.

EFC determines the interest rate for which each eligible project qualifies, by:

- Compiling a list of the eligible projects for applicants that have expressed an intent to move forward with CWSRF financing in the coming year to determine the Annual Project Priority List;
- Ranking the projects within each category on the Annual Project Priority List based on project score;
- Comparing the list to the amount of funds EFC can commit to projects for the year; and
- Establishing the "Subsidy Line" in each category to determine which projects are eligible for subsidized interest rates in the FFY covered by the IUP (the "IUP Period").
- Determining which projects are eligible for hardship financing.

This evaluation and scoring process is described in more detail in the following Sections 3.1 through 3.4.

#### 3.1. Multi-year List and Annual List

The IUP contains two lists of eligible projects:

1. The Multi-Year Project Priority List (the "Multi-Year List"), included as Appendix A, identifies all projects for which applicants have expressed an interest in receiving CWSRF financial assistance. The Multi-Year List identifies projects alphabetically by applicant name and indicates whether a project is also included on the Annual List, which category it is in, and the project score.

2. The Annual Project Priority List (the “Annual List”), included as Appendix B, identifies projects that EFC may provide financial assistance to in the IUP Period. The Annual List is a subset of the Multi-Year List. The Annual List is divided into the project categories described in Section 3.3; it provides the applicant’s name, project description, estimated project cost, State Pollutant Discharge Elimination System (“SPDES”) permit number, if applicable, and project score. The projects within each project category are ranked in descending order of score. A project may receive financial assistance in the IUP Period only if it is on the Annual List.

See Section 4 for information about adding a project to these lists.

### 3.2. Project Score System

EFC scores CWSRF eligible projects in Categories A, B, C, D, and E using the criteria stated in 6 NYCRR § 649.13. Projects that improve and restore water quality generally receive the highest scores; projects that protect water quality are given secondary priority.

EFC scores these projects based on:

1. the existing conditions that cause the water quality problem;
2. the value of the resource that will be improved or protected based on the classification of the receiving water;
3. the severity of impairment to the desired usage of the affected water;
4. the degree of improvement to the desired usage likely to result;
5. consistency with an approved management plan;
6. an obligation or mandate for the project; and
7. the financial impact of the project and economic need of the applicant.

Projects in Category G use a separate scoring system.

A project’s placement on the Annual List determines the likelihood that the project will be eligible for subsidized financing.

To show projects that may receive reduced-interest, also known as subsidized, financing, a line (the “Subsidy Line”) is drawn in Categories A, B, and C on the Annual List. Projects above the Subsidy Line are eligible for subsidized financing during the IUP Period. Projects below the Subsidy Line are not eligible for subsidized financing in the IUP Period but may receive market-rate financing. See Section 5 for more information about the types of financial assistance available from EFC.

EFC may commit financing to a large project in phases or segments over several years. EFC does this by adding 1000 bonus points to the original project score for all project phases when EFC closes a subsidized short-term financing for the project. With these bonus points, subsequent phases continue to be eligible to receive subsidized financing. When one phase of a project closes a long-term subsidized financing, EFC adds an additional 1000 points to the project score of any remaining phases to ensure financial resources will be available for long-term subsidized financing for all phases of the project. With any phased project, all phases of the project must be defined within one engineering report and the environmental review must be inclusive of all phases of the project.

### 3.3. Project Categories

The Annual List is divided into six categories and projects are listed within those categories in descending score order, with the exception of Category G. Projects are generally placed in categories based on whether the applicant is a municipality or not, then by the population of the municipality. Categories A, B, C, and D are each comprised of municipal projects. Category E is for non-municipal projects. Categories A, B and C are determined solely on municipal population, using population data from the 2015 American Community Survey's five-year estimates. Category D is for municipal projects that meet the criteria established in the Hardship Financing and Grant Eligibility Policy ("Hardship Policy"; see Section 5.1). Category G is for Green Innovation Grant Program and Integrated Solutions Construction projects that meet EPA's Green Project Reserve criteria (see Section 6.7).

The categories are established in 6 NYCRR § 649.3, as follows:

CATEGORY	DESCRIPTION
A.	Municipalities where population is identified as 3,500 or less.
B.	Municipalities where population is identified as being 3,501 through 2,000,000.
C.	Municipalities where population is identified as being more than 2,000,000.
D.	Municipal projects for which the municipality has received a written confirmation for a reduced interest rate financing in accordance with the Hardship Policy.
E.	Non-municipally owned projects.
G.	Green Innovation Grant Program and Integrated Solutions Construction projects that meet EPA's Green Project Reserve criteria.

### 3.4. Project Bypass

EFC may bypass a project on the Annual List if EFC determines the project is not ready to close financial assistance during the IUP Period. Examples of when a project is not ready include:

1. the applicant fails to submit an acceptable financing application by EFC's June 29<sup>th</sup> project application due date;
2. the project is delayed or withdrawn by the applicant; or
3. the applicant fails to submit critical items that are required to close a financing.

EFC may re-allocate any bypassed funds to other projects, some of which may be ranked with a lower score on the Annual List. If EFC bypasses a project, financial assistance will be first offered to those communities in Category D with an acceptable financing application before the funds are used to finance projects in any other category. If EFC bypasses a project, the project may be considered for financing in a subsequent IUP Period.

## 4. Project Listing and Project Updates

To list a project on the IUP, an applicant must submit initial project information through EFC's Project Listing and Update System (PLUS) (<https://plus.efc.ny.gov/PLUS/>), including contact information, a general description of the project's scope, a budget, and a project schedule. Applicants can also upload documents such as engineering reports, consent orders, or project descriptions. EFC recommends that applicants submit all available project information at the time of the project listing so that EFC may develop the most accurate project score and ranking. EFC includes projects on the Multi-Year List based on the submission of this initial information.

For a project to be included on the Annual List, the applicant must also submit an approvable engineering report and a Smart Growth Assessment Form to EFC.

The engineering report must conform to the Engineering Report Outline available on [EFC's website](#). The report must be prepared by an engineer licensed to practice in New York State. The report must identify and assess the water quality problem, recommend a solution, and include a cost estimate and construction schedule. EFC will not require previously submitted reports to be rewritten, but an amendment may be required to address all items included in the Outline.

All CWSRF projects are subject to the State Smart Growth Public Infrastructure Policy Act of 2010 (the "Act") and must submit to EFC a Smart Growth Assessment Form. EFC uses this form to determine whether a project meets the Act's smart growth criteria, and to establish a justification if it does not. The Smart Growth Assessment Form and guidance are available on [EFC's website](#).

EFC accepts new project listings on a continuous basis, but applicants must submit their project information through PLUS by May 1 to have their projects listed in the Draft IUP each year, and by the end of the public comment period for the Draft IUP to have their projects listed in the Final IUP.

To ensure that the Annual List remains current and contains projects that applicants desire to finance in the current IUP Period, EFC requires applicants to update their project information annually, using PLUS. If an applicant did not update project information by the end of the public comment period for the Draft IUP, the applicant's project is not identified on the Annual List in the Final IUP, and is not eligible for CWSRF financial assistance during the 2018 IUP Period. If an applicant did not update its project information using PLUS for two consecutive years, EFC designated the project inactive and it no longer appears in the IUP.

## 5. Financing Terms and Financial Assistance Options

### 5.1. Financial Assistance Options

EFC works with applicants to identify the appropriate financial assistance option or options for a project, and EFC financing packages may include one or more of the funding options as outlined in Table A below.

EFC's website presents additional information about each financing option. The construction schedule of the project and its ranking (project score) are key considerations in determining the appropriate term and type of assistance that may be offered. Short-term financing is typically offered for projects that require cash flow and/or reimbursement funds for planning, design, and early stages of construction. Long-term financings are often used to convert existing short-term financings to long-term debt, refinance/refund external debt and/or fund projects that do not qualify for short-term financing.

Municipalities with fewer than 300,000 residents may also qualify for interest-free financing for their projects. Further, certain of these municipalities may also qualify for additional subsidy in the form of a grant or principal forgiveness. The Hardship Policy has been revised and is available on [EFC's website](#). For FFY 2018, EFC is using data from the 2015 American Community Survey 5-year data, published by the US Census Bureau. In addition, the Hardship Policy now includes regionally adjusted MHI thresholds for hardship eligibility. A hardship subsidy line has been added to the Annual List. Projects that may be considered for hardship are identified on the Annual List with a notation.

EFC sends hardship eligibility letters notifying municipalities that they are eligible for interest-free financing. Letters sent in the 2018 IUP period will include a finance application due date of June 29, 2019 and a required finance close date of December 1, 2020. Hardship eligibility will expire if the municipality does not submit an acceptable finance application by June 29, 2019 and close a hardship financing before December 1, 2020.

Table A - Financing Options

FINANCING OPTION	RATE	AMOUNT	QUALIFICATIONS	FEES	NOTES
<b>SHORT-TERM</b>					
<b>SHORT-TERM INTEREST-FREE (STIFF)</b>	0%	The lesser of:  50% of eligible project costs  or  50% the Estimated Amount on the IUP	Project IUP score must be above the Subsidy Line	None	May not be used to prefinance grants.  Land Acquisition is limited to \$15 million or 1/2 of the Estimated Amount on the IUP, whichever is less.
<b>SHORT-TERM MARKET-RATE (SMRF)</b>	MMD AAA Market Rate 1-year rate plus EFC cost of funds	1. Finance costs not funded with STIFF.  2. Finance 100% of eligible project costs up to the IUP amount.  3. Prefinance anticipated third-party grant funds	Project IUP score below the subsidy line or not offered subsidy	None	SMRF Funds are subject to availability.  EFC will not process applications for SMRF with priority scores below 10 points unless reachable for subsidized financing.
<b>SHORT AND LONG TERM</b>					
<b>HARDSHIP</b>	0% interest  Some applicants may qualify for grant funds	Finance up to \$20 million of eligible project costs with interest free funding	Applicants must be eligible for Hardship financing	None	Restrictions apply, see Hardship Policy.
<b>INNOVATIVE PROJECTS</b>	0%	Finance 100% of eligible project costs up to \$3 million for up to 20 years	Project must be determined to be an innovative project by EFC	None	Funding for one Innovative Project remains available.

FINANCING OPTION	RATE	AMOUNT	QUALIFICATIONS	FEES	NOTES
<b>LONG-TERM</b>					
<b>LONG-TERM MARKET RATE</b>	AAAaaa borrowing rates	Finance 100% of eligible project costs or the Estimated Amount on the IUP	Project IUP score below the subsidy line or not offered subsidy	1.0% Direct Expense  State Bond Issuance Charge	<p>Long-Term Market Rate financings will be funded as leveraged financings at the applicable market rate.</p> <p>Projects closed with a Long-Term Market Rate financing will remain eligible to compete for subsidized funding for up to 5 years from the long-term closing date. These projects will remain on the Annual PPL during this period.</p> <p>Note: Annual Administrative Fee would apply if converted to subsidized funding.</p>
<b>SUBSIDIZED LONG-TERM LEVERAGED</b>	AAAaaa borrowing rates plus 50% subsidized interest rate	Finance 100% of eligible project costs or the Estimated Amount on the IUP	Project IUP score must be above the Subsidy Line	1.0% Direct Expense  State Bond Issuance Charge  0.25% Annual Administrative Fee (calculated on outstanding balance)	

FINANCING OPTION	RATE	AMOUNT	QUALIFICATIONS	FEES	NOTES
<b>LONG-TERM CONTINUED</b>					
LONG-TERM DIRECT	AAA/aaa borrowing rates	Finance 100% of eligible project costs or the Estimated Amount on the IUP	Only available in cases where it is not feasible or efficient to include the financing in a bond sale.	0.25% Annual Administrative Fee (calculated on outstanding balance)	
<b>OTHER FINANCIAL ASSISTANCE PROGRAMS</b>					
BOND GUARANTEE	Access to financing at preferred interest rates	Determined Per Transaction	Subject to EFC Evaluation and Determination.	Determined Per Transaction	Up to thirty years.
GREEN INNOVATION GRANT PROGRAM (GIGP)	Grant	40% to 90% of eligible planning, design and construction costs	Projects that use unique storm water infrastructure design and construct new green technologies.  Projects must meet EPA Green Project Reserve criteria.	None	Utilize the Governor's Consolidated Funding Application (CFA) to apply.  Minimum \$8 million available in FFY 2018.  All recipients are responsible for providing a minimum local match of 10% from non-federal funds.
INTEGRATED SOLUTIONS CONSTRUCTION GRANT (ISC)	Grant	50% of eligible Green Infrastructure Construction costs	Grant must be incorporated in combination with a base SRF financing.	SRF financing fees apply to non-grant portion of financing	\$8 million available in FFY 2018.
NYSDEC/NYSEFC ENGINEERING PLANNING GRANT PROGRAM (EPG)	Grant	Up to \$100,000 for planning costs	Engineering reports resulting from this program must adhere to the Engineering Report Outline.	None	Utilize the Governor's CFA to apply.  \$3 million available in FFY 2018.

## 5.2. Applications for Financial Assistance

To be considered for CWSRF financial assistance this IUP Period, an applicant's project must be listed on the Annual List. Applications are due to EFC by June 29, 2018.

An acceptable financing application includes:

1. documentation that the required environmental review has been completed (guidance is available on [EFC's website](#));
2. a municipal applicant's bond resolution authorizing the municipality to issue debt for the project, and to incur project costs. Issuance of debt for the project should be authorized by non-municipal applicants as well;
3. if applicable, documentation that a special improvement district has been established or expanded, or that the maximum amount to be expended for such district has been increased, and that approval has been obtained from the Office of the State Comptroller (OSC), as needed (this may only be applicable to towns and counties); and
4. an executed engineering agreement for planning services, if those services are expected to be financed with the project. An application for financing may be considered acceptable without an executed engineering agreement for planning services, but those costs will not be eligible for financing.

All financing applications submitted to EFC between October 1, 2017 and the June 29, 2018 application due date and deemed acceptable will remain qualified for financial assistance through December 2, 2019. Applications that were submitted prior to October 1, 2015 that have not been updated are considered inactive and will not be processed by EFC.

EFC recommends that applicants for financial assistance:

- access the most current version of the application forms on the [EFC's website](#) and consult the guidance materials;
- contact EFC as early as possible in the application preparation process to ensure the proper documents are collected and forms are completed. Please call 518-402-6924 for assistance; and
- submit the application and all supporting materials well in advance of when funds are needed to the following address:

Public Finance Division  
NYS Environmental Facilities Corporation  
625 Broadway – 7<sup>th</sup> Floor  
Albany, NY 12207-2997

### 5.3. Programmatic Requirements

A recipient of CWSRF financial assistance and its contractors must comply with certain federal and State regulatory requirements, including:

- American Iron and Steel;
- Davis-Bacon and Related Acts federal wage rates;
- Equal Employment Opportunity; and
- Minority and Women Business Enterprise (MWBE) participation.

EFC's SRF bid packet, available on [EFC's website](#), provides EFC's recipients and their contractors with required contract and subcontract language, forms, and guidance.

## 6. EFC Compliance with EPA Program Requirements (Assurances and Specific Proposals)

40 CFR § 35.3150 requires the State to provide assurances for the CWSRF program's compliance with certain federal requirements. The State's assurances are embodied in the Operating Agreement, as of May 28, 2017, between the DEC and the EPA (the "Operating Agreement"), which provides for the organization and administration of the State's CWSRF. The Federal Assistance ID Number is CS-360001 and CFDA number is 66.458.

### 6.1. Binding Commitments

The State will make binding commitments through execution of Project Finance Agreements with CWSRF recipients in a total amount equal to 120% of each Capitalization Grant payment within one year after receipt of the payment. If the State commits more than the required 120%, the EPA will recognize the cumulative value of the binding commitments, and the excess balance may be banked towards the binding commitment requirements of subsequent years.

### 6.2. Timely Use of Funds

The State will expend all funds in the CWSRF in an expeditious and timely manner.

### 6.3. Compliance with Federal Requirements (Equivalency Projects)

The amount of money in the CWSRF equal to the funds "directly made available" by the Capitalization Grant are considered federal funds, or federal financial assistance. Accordingly, treatment works projects with project costs totaling an amount equal to the Capitalization Grant must meet various federal regulatory requirements. These projects are considered "equivalency projects." EFC identifies on the Annual List the projects that may be used to meet this requirement.

## 6.4. Environmental Review

Potential environmental impacts must be considered for projects receiving CWSRF financial assistance, in accordance with the State Environmental Review Process. This applies for all treatment works construction projects (Clean Water Act § 212), including NPS pollution control projects (Clean Water Act § 319) and estuary protection projects (Clean Water Act § 320) that are also treatment works projects.

## 6.5. State Match Funds and Anticipated Cash Draw Ratio

For FFY 2018, New York State will use State General Fund appropriations to provide a 20% match to funds provided by the federal Capitalization Grant. The State will be using a cash draw ratio of 83.33% federal funds and 16.67% state funds. State match funds will be deposited in the CWSRF at the same time as Capitalization Grant funds are deposited in the CWSRF.

## 6.6 Transfer of Funds Between SRF Programs

In order to give states flexibility to address their greatest public health and water quality priorities, the Safe Drinking Water Act (SDWA) Amendments of 1996 offered states the flexibility to meet the funding needs for drinking water and wastewater facilities by transferring funds from one SRF program to the other (Section 302 of Public Law 104-182). The SDWA Amendments authorized the transfer of up to 33 percent of the DWSRF Capitalization Grant amount to the CWSRF, or an equivalent amount of the CWSRF Capitalization Grant amount to the DWSRF program. While the authority expired on September 30, 2001, Congress extended this provision in EPA's FFY 2002, 2003, 2004, 2005 and 2006 budgets. Transfers from the CWSRF to the DWSRF were made for FFYs 1997 through 2001, totaling \$82,443,933. Transfers between the CWSRF and the DWSRF programs may be made again, if Congress approves such transfers. Any funds transferred during this IUP Period will be returned using program funds within this IUP Period. Therefore, there will be no effect on the Subsidy Line of either the CWSRF program or the DWSRF program.

## 6.7. Green Project Reserve (GPR)

As authorized in annual federal appropriations, EFC must use a portion of the Capitalization Grant to finance projects or aspects of projects that meet the EPA's Green Project Reserve ("GPR") requirement. GPR projects must be eligible for CWSRF financing and:

1. address stormwater and wet weather issues through the use of green infrastructure;
2. promote energy efficiency;
3. promote water efficiency; or
4. use innovative approaches to managing water resources.

EFC encourages projects to incorporate all four categories of GPR into their CWSRF projects.

The FFY 2017 CWSRF Capitalization grant GPR requirement is \$14,634,300. EFC intends to use a portion of the additional subsidization authorized from the FFY 2017 Capitalization Grant to fund a ninth round of the Green Innovation Grant Program (GIGP) and a second round of the Integrated Solutions Construction (ISC) program to help meet the GPR requirement. The GIGP program focuses CWSRF additional subsidization towards innovative stormwater projects that meet the most recent (2012) EPA GPR Guidance. The remainder of the requirement will be met with CWSRF projects funded from Categories A, B, C, and D that construct GPR practices. The final list of projects used to meet the GPR requirement and their GPR allocations will be presented in CWSRF Annual Reports.

GPR requirements for FFY 2018, if any, were unknown when this Final IUP was prepared.

## 7. Allocation, Sources and Uses of Funds

### 7.1. Sources and Uses

Table B identifies the estimated sources of funds for FFY 2018 and their uses.

Table B – Sources and Uses of Subsidized Financing

## Sources and Uses of Subsidized Financing

### Estimated Sources of Funds for Federal Fiscal Year 2018

Remaining Resources on October 1, 2017	\$270,905,335
Capitalization Grant from EPA	100,000,000
State Match for Capitalization Grant	20,000,000
Additional Subsidy from 2017 Capitalization Grant	14,634,300
Repayments 10/1/17 – 9/30/18	517,300,958
Investment Returns	137,788,575
<b>Total</b>	<b>\$1,060,629,167</b>

### Proposed Uses of Funds During Federal Fiscal Year 2018

Projects in Category A, B & C (Funds for Long-Term Leveraged or Short-Term Financings)	\$288,620,318
Projects in Category A and B with Acceptable Applications in 2017	37,253,255
Projects in Category D	208,867,665
Additional Subsidy for Category D	16,287,898
Projects in Category E	5,431,000
Additional Subsidy for Category G - Green Innovation Grant Program (GIGP)	6,050,194
Additional Subsidy for Category G - Integrated Solutions Construction (ISC) Grant	14,181,950
Subtotal - Amount for Projects	\$576,692,280
 Bond Debt Service	 481,424,887
Program Administration	2,512,000
Subtotal	\$483,936,887
 <b>Total</b>	 <b>\$1,060,629,167</b>

## 7.2. Allocation of Funds

To fund short-term direct and long-term direct financings this IUP Period, EFC will use:

- the Capitalization Grant and the State match;
- repayments on financings;
- recycled funds; and
- returns on investments.

EFC's leveraged long-term financings (subsidized and market-rate) will be funded with Corporation bond proceeds and/or other available proceeds under the revolving funds.

EFC expects to allocate as much as \$640 million to new financings in FFY 2018. This amount includes funds allocated to projects in the 2017 IUP that will not close a financing in FFY 2017.

When EFC prepared this Final IUP, Congress had not yet enacted the budget for FFY 2018. The 2018 IUP assumes the 2018 Capitalization Grant to the State will be \$100 million. The enacted 2018 federal budget may differ significantly.

The following table identifies the allocation of project dollars for FFY 2018.

Table C – Allocation of Project Dollars

<b>Allocation of Project Dollars</b>				Potential Loans and Grants
Category Subtotal (Annual List)	Category Subtotal/ Total List (%)	Funds (\$)	Total: \$	Potential Loans and Grants (\$)
Category A 376,854,275	11.32%	32,671,820	32,671,820	65,343,640
Category B 1,081,497,746	32.48%	93,743,879	93,743,879	187,487,758
Category C 1,870,920,617	56.20%	162,204,619	162,204,619	324,409,238
Category D		225,155,563	225,155,563	225,155,563
Projects in Category A and B with Acceptable Applications in 2017		37,253,255	37,253,255	74,506,511
Category E		5,431,000	5,431,000	5,431,000
Category G Green Innovation Grant Program - FFY 2017		6,050,194	6,050,194	6,050,194
Category G Integrated Solutions Construction Grant		14,181,950	14,181,950	14,181,950
	Total:	<b>576,692,280</b>	<b>576,692,280</b>	<b>902,565,854</b>

### 7.3. Use of Administrative Funds

EFC uses a portion of the Capitalization Grant to fund certain administrative expenses. EFC intends to use an amount equal to 0.05% of the equity in the CWSRF for this purpose.

EFC charges its long-term non-hardship borrowers an annual administrative fee. EFC holds the administrative fees in accounts outside the CWSRF. The fees cover administrative expenses that exceed costs recovered from the Capitalization Grant. Administrative fees are also intended to support program expenses in the event the federal government discontinues or reduces its financial support to the CWSRF program.

In addition to covering administration expenses, administrative fees are available to EFC to fund certain water quality activities. EFC anticipates the following uses of administrative fees during FFY 2018: \$3 million for CWSRF Engineering Planning Grants; \$5 million for Hunts Point; up to \$1 million for an asset management pilot program in cooperation with DEC; \$200,000 for the Excelsior Conservation Corps; \$1.5 million for the Center for Clean Water Technology; \$2.3 million for the NYS Department of Transportation; and up to \$6 million for additional water quality purposes.

As of October 2017, EFC estimates it will receive approximately \$15.3 million from administrative fees in FFY 2018, consisting of \$0.4 million in program income earned during the grant period, \$8.4 million in program income earned after the grant period, and \$6.5 million in non-program income.

## 8. Amendments and Modification

EFC may amend this IUP to reflect significant project or program modifications during the IUP year. Significant modifications to the IUP include changes in funding levels or program requirements. EFC will make such amendments only after publication of a notice in the Environmental Notice Bulletin (ENB) and opportunity for public comment. EFC will post any draft amendments on [EFC's website](#) during the public review and comment period, and will publish final amendments on [EFC's website](#).

EFC may make minor modifications to the IUP after publication of a notice in the Environmental Notice Bulletin (ENB) and opportunity for public comment. Minor modifications to the IUP include changes that would not affect the overall funding levels or priorities, such as transferring projects on the Multi-Year List to the Annual List or adding new projects to the Annual List for market-rate financing. The Final IUP will be revised to reflect minor modifications after the opportunity for public comment is ended.

In situations where proposed changes to the Annual List could jeopardize access to subsidized financing to a small number of projects, rather than processing an amendment, EFC will communicate with each of the affected communities to solicit comments or concerns.

EFC maintains the current Annual List on [EFC's website](#).

## 9. Program Goals

The State has the following short-term goals for the CWSRF in FFY 2018:

1. Commit FFY 2018 funds to projects that are in construction, ready to proceed with construction, or otherwise positioned to have funds disbursed quickly and steadily and advance both the environmental and economic goals of the State and the CWSRF to fund the highest priority water quality improvements as soon as needs arise.
2. Administer the CWSRF in conjunction with State grant programs in a manner that encourages communities to advance water quality projects to construction.
3. Encourage the incorporation of green infrastructure practices into traditional, gray infrastructure projects.
4. Ensure consideration of the State's smart growth criteria when evaluating projects.
5. Work with Storm Mitigation Loan Program ("SMLP") recipients to move projects forward expeditiously. SMLP recipients were funded from the Disaster Relief Appropriations Act, 2013 (DRAA).

6. Incorporate sea level rise projections and the related regulations and guidance into EFC's programs in accordance with the NYS Community Risk and Resiliency Act.
7. Continue to improve the public's access to information on EFC's website.

The State has the following long-term goals for the CWSRF program:

1. Provide reduced interest rate financings and grants that encourage the repair, replacement, and upgrade of existing infrastructure and the construction of new point source, nonpoint source and estuary projects in order to improve, maintain, or protect water quality.
2. Administer the CWSRF in a manner that will ensure its revolving nature in perpetuity, including managing the funds to expand financial resources and benefits, and assisting applicants in developing sustainable projects and systems.
3. Provide financial assistance for projects that will protect groundwater, consistent with DEC's goal to prevent pollution and protect the State's groundwaters as a source of potable water supply.
4. Help recipients achieve and maintain compliance with Federal and State water quality standards and enforceable requirements of the Clean Water Act for the protection and enhancement of New York's water resources.
5. Promote the innovative use of Green Infrastructure to effectively manage stormwater.
6. Assist municipalities in the development of consistent engineering and feasibility reports.
7. Using knowledge gained from the Asset Management Pilot Program, encourage communities to develop asset management plans for their water quality assets.
8. Identify meaningful opportunities for participation by minority- and women-owned business enterprises in projects that are supported with CWSRF financial assistance.

## 10. Public Comment

The comment period of the Draft 2018 IUP was August 23, 2017 until October 10, 2017. A notice regarding the availability of the Draft IUP and a request for comments was published in the Environmental Notice Bulletin (ENB) and in the State Register on August 23, 2017. Email notices were sent to applicants with projects on the IUP and other interested persons. EFC also made the Draft IUP available on [EFC's website](#).

EFC hosted a webinar on Wednesday, September 20, 2017 to present an overview of the Draft 2018 IUP. The State held a public hearing on the Draft 2018 CWSRF IUP and the Draft 2018

DWSRF IUP on September 26, 2017 at the William K. Sanford Town Library, Loudonville, NY. No oral statements were made and no written statements were submitted on the Draft CWSRF IUP during the formal hearing.

During the public comment period, several applicants provided EFC with new project listing forms and updated information for projects in the Draft IUP. The project priority lists have been updated as necessary to address these submissions. No other comments were received during the comment period.

## EFC Website Resources

The following resources are available on EFC's website at <https://www.efc.ny.gov/2018-cw-iup>:

Application for Financing

Bid Packet

Engineering Report Outline

Environmental Review Requirements

Hardship Policy

Intended Use Plan

Project Listing and Update System (PLUS)

Smart Growth Assessment Form and Guidance

Table of Abbreviations Used in Project Descriptions  
and Project Numbering System

BRNFLD	A project for which a municipality has applied for Clean Water/Clean Air Bond Act assistance under the Brownfields Program
COMP	Composting or co-composting STP sludge, where municipality has not applied for DEC Title 7 assistance
COMP (TITLE 7)	Composting or co-composting STP sludge, where municipality has applied for DEC Title 7 assistance
COLL	Collector/Sanitary Sewers
CSO	Combined Sewer Overflow (control, treatment or conveyance)
DW	Drinking Water
EST	Estuary
EXP	Expansion or increase in capacity
FM	Force Main
I/I CORR	Infiltration and Inflow Correction
IMP	Improvement
INT	Interceptor Sewer
GIGP	Green Innovation Grant Program
LAND ACQ	Land Acquisition
LF-CAP (TITLE 3)	Closure or Capping of an inactive hazardous waste landfill, where municipality has applied for DEC Title 3 assistance
LF-CAP (TITLE 5)	Closure or Capping of a solid waste landfill, where municipality has applied for DEC Title 5 assistance
LF-CAP (MSW)	Closure or Capping of a solid waste landfill, where municipality has not applied for DEC Title 5 assistance
LF-GAS	Landfill Gas collection and control systems up to the point of sale of the gas as a fuel or conversion to energy
LF-RECLAIM	Landfill closure by Reclamation of site
LF-LCH	Landfill Leachate collection, storage and treatment
MOD	Modification
NPS	Nonpoint Source
NPS (319 Land)	Nonpoint Source Land Acquisition (CWA Section 319)

NPS (320 Land)	Nonpoint Source Land Acquisition (CWA Section 320)
ORF	Overflow Retention Facility
OS	Outfall Sewer
OWS	Onsite Wastewater System
PS	Pump Station
REBUILD	Major repairs and replacement of worn out facilities
REF	Refinance
REHAB	Rehabilitation
RELIEF SEW	Relief Sewer
REMED	Remediation of contamination from leaking petroleum storage tanks or other municipal facilities
REPL	Replacement
SALT-STOR	Deicing materials storage facility
SAWS	Small Alternative Waste Systems
SEP	Separation
SEW	Sewer
SSO	Sanitary Sewer Overflow (control, treatment or conveyance)
STMSEW	Storm Sewer
STMW	Stormwater
STP	Sewage Treatment Plant/Wastewater Treatment Plant
UP	Upgrading the treatment process level
WTP	Water Treatment Plant

CWSRF Project Number System (ex: C4-5863-01-00):

- “C” designates a CWSRF project.
- “4” designates the DEC Region.
- “5863” is the current base number.
- “01” is the current 2-digit project number.
- “00” is the current phase or cost increase number.
