Criteria to Determine Disadvantaged Community Eligibility

Disadvantaged Community / Disadvantaged Community - Small/Rural - The determination will be based on information received by the initial PIF deadline or with a PIF subsequent submitted after the initial deadline. An eligible disadvantaged community consists of all of the following:

- 1) The service area of an eligible applicant, the service area of a community that is located outside the entity's service area, or a portion within the entity's service area if the proposed project is providing new service to existing residents in unserved areas; and
- 2) meets the following affordability criteria:
 - (a) Has an Annual Median Household Income (AMHI) that is no more than 75 percent of the state median household income using an acceptable source of socioeconomic data, and
 - (b) the Household Cost Factor (HCF) that considers income, unemployment rates, and population trends must be greater than or equal to 1 percent if only water or sewer service is provided or greater than or equal to 2 percent if both water and sewer service are provided.
