- Appendix D:** Set-Aside Activity
- Appendix E:** Funds Available to the DWRF Loan Program
- Appendix F:** Administrative Fee Account

Introduction to the Drinking Water Revolving Fund

Colorado's Drinking Water Revolving Fund (DWRF) provides financial assistance to government agencies and private, non-profit public water systems. These projects aim to:

- Construct water projects intended to improve public and environmental health.
- Help entities comply with the federal Safe Drinking Water Act.
- Invest in Colorado's water infrastructure.

Colorado Senate Bill 95-083 established the DWRF as an enduring and viable fund. The legislation states that the fund shall be maintained and available in perpetuity to provide financial assistance in accordance with the federal Safe Drinking Water Act. The program is sustained through reloan funds, administrative fees, EPA annual appropriations (through capitalization grants to the state each year) and interest earnings.

Partner agencies

Three partner agencies operate the DWRF: the Colorado Department of Public Health and Environment's Water Quality Control Division; the Colorado Water Resources and Power Development Authority; and the Colorado Department of Local Affairs (DOLA). These agencies administer the DWRF with common goals approved and supported by the Water Quality Control Commission and the authority board of directors.

Agency responsibilities		
Division	Authority	DOLA
• Primary agency. • Administers program. • Provides technical review and advising. • Manages fund set-asides. • Reports to the federal government.	• Provides financial structure. • Manages budgets and investments. • Disburses funds. • Reports to federal and state governments. • Provides a state match. • Monitors loan portfolio.	• Conducts financial capacity assessments. • Provides financial and managerial assistance to systems. • Coordinates funding collaboration. • Conducts program outreach.

Drinking Water Revolving Fund mission

- ❖ Provide low-cost, affordable financing to Colorado's drinking water systems to address the state's priority drinking water-related public health, water quality, and drinking water infrastructure needs.
- ❖ Actively target and allocate resources to projects and initiatives that result in significant public health and environmental benefits while building and maintaining a perpetual, self-sustaining revolving loan fund program.
- ❖ Manage the fund in a manner that provides benefits for current and future generations.

The agencies also partner with the Colorado Water Conservation Board, USDA Rural Development, the Colorado Rural Water Association, the Rural Community Assistance Corporation, and other agencies to collaborate on financing when appropriate.

Intended Use Plan

EPA's capitalization grant agreement requires an annual intended use plan (IUP). The IUP provides the framework to use funds, finance drinking water infrastructure, and support related program activities during the 2026 calendar year.

2026 Short-Term Goals

- Provide outreach, technical, and financial assistance to public water systems that pose a risk to public health due to exceedances of drinking water health-based standards or other substandard infrastructure conditions. The DWRF focuses on systems that are either in or under consideration for enforcement action and those that exceed health-based standards for radionuclides.
- Address drinking water system health issues including lead, the federal unregulated contaminant monitoring rule, nitrates, and other emerging issues such as per- and polyfluoroalkyl substances (PFAS).
- Market and encourage drinking water systems to participate in the Drinking Water Excellence Program by offering grants and/or other incentives.
- Review the effectiveness of the priority scoring model (Attachment I) and the use of additional subsidies.
- Review the disadvantaged community criteria annually to ensure they include Colorado's disproportionately impacted communities as defined by the General Assembly.

Long-Term Goals

Colorado's long-term program goals include: public health protection, program sustainability and integrity, and support for the division's strategic goals. Additional long-term goals include:

- Strengthening funding coordination efforts.
- Conducting training to build financial and managerial capacity of public drinking water systems across the state.
- Providing affordable financial assistance to eligible applicants while maintaining a perpetual revolving loan program.

Project Eligibility

Priority projects address public health risks, disadvantaged communities, and compliance with the Safe Drinking Water Act.

Eligible project examples

Address present and future Safe Drinking Water Act requirements.

Replace aging infrastructure.

Replace lead service lines.

Restructure and consolidate water supplies to rectify contamination issues or to assist systems unable to maintain and ensure Safe Drinking Water Act compliance for financial or managerial reasons.

Purchase a portion of another system's capacity to cost effectively rectify a Safe Drinking Water Act compliance issue.

Acquire water rights for public health protection or resiliency/redundancy that applies to existing populations and is not intended to serve future growth.

Planning, including required environmental assessment reports, design and construction costs associated with eligible projects.

Acquiring land.**

Dams/rehabilitation of dams and reservoirs/rehabilitation of reservoirs owned by the public water system for drinking water supply. The project must support public health objectives of the Safe Drinking Water Act and cannot be for growth.

Ineligible project examples

Drinking water monitoring costs.

Operation and maintenance costs.

Projects primarily for fire protection.

Projects for systems in significant noncompliance under the Safe Drinking Water Act, unless funding will ensure compliance.

Projects primarily intended to serve future growth.

*Water utilities distributing or supplying 2,000 acre-feet or more of water per year must have an approved and updated water conservation plan as defined by Section 37-60-126, CRS. The Colorado Water Conservation Board provides approval.

**Land must be integral to the project and must be from a willing seller. The cost of complying with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (the Uniform Act) is an eligible cost.

Project Lists

Appendix A: DWRF 2026 project eligibility list

This appendix contains information on all projects for which an entity/public water system completed an eligibility survey in 2025. The DWRF releases the survey annually to potential borrowers to capture 20-year capital improvement needs. Appendix A includes the name of the public water system, a description of the project, the population, the estimated cost of the project, and the type of project. Borrowers can add, modify, and remove projects on Appendix A by completing an eligibility survey in June of each year.

Appendix B: DWRF 2026 base and IIJA project priority/fundable list

Appendix B includes an inventory of projects that:

- Have started the DWRF application process and may receive a loan in 2026.
- Have recently received a loan from the base DWRF or Infrastructure, Investment and Jobs Act (IIJA).
- May receive emerging contaminant or lead service line removal funding from IIJA.

This appendix includes an estimated project cost or approved loan amount, project description, preliminary disadvantaged community status, preliminary source of funding (base or IIJA), and associated loan term and interest rate.

Projects in Appendix B have been assigned preliminary priority points. Preliminary priority points may reflect partial scoring and are subject to change. Additionally, the priority rank does not necessarily correspond to the order of funding. Bypassing the order on the list is based on readiness to proceed by projects that complete all required steps according to DWRF procedures to submit an approvable loan application. See the Prioritization Procedures section for details. Additionally, emergency procedures may receive priority funding. See the Emergency Procedures section for details.

The division maintains an updated copy of Appendix B on the [grants and loans web page](#).

Criteria, Methods, and Evaluation for Distribution

Application procedures

The DWRF accepts loan applications throughout the year. Application deadlines correspond to an upcoming authority board meeting during which the loan will be considered. Before applying, applicants should coordinate with their division project manager to understand pre-application requirements and choose an appropriate deadline.

Direct loans are requests of \$3 million or less, while leveraged loans are requests greater than \$3 million, unless otherwise approved by the authority board.

Prioritization procedures

Attachment I: Drinking Water Revolving Fund Priority Scoring Model

The [priority scoring model](#) is used to determine project priority scoring.

- The DWRF will provide projects a preliminary priority score at pre-qualification review and a final score at the project needs assessment (PNA) approval.
- The score determined at PNA approval is valid for up to 12 months.
- If an applicant submits a loan application after the 12-month deadline, the applicant or their project manager may request rescoring ahead of the intended loan application date.
- The DWRF committee may adjust the timing of issuing preliminary and final priority scoring and the timeframe for validity of the final scoring if needed.
- The final priority scoring will determine when a project may submit a loan application.

Projects that score at or above the priority point threshold as listed below may apply at any loan cycle during the year (at both “open” and “limited” cycles as shown in the schedule below). Projects that score below the threshold may only apply at the “open” cycles, unless they meet the following exceptions:

- Applicants that meet requirements as a disadvantaged community under the DWRF base program automatically score at or above the priority point threshold and may apply at any loan application deadline.
- Applicants that request only IIJA lead service line funding and/or only IIJA emerging contaminants funding may apply at any loan application deadline if an applicant requests base plus IIJA funds, the project must score at or above the priority point threshold.

The 2026 DWRF priority point threshold is 110 points.

2026 application schedule

Application deadline	Deadline type	Loan type	Authority meeting
January 5	Open	Leveraged**	March
February 5	Open	Direct	April
April 5	Limited*	Direct	June
June 5	Limited*	Leveraged**	August
August 5	Limited*	Direct	October
October 5	Limited*	Direct	December
November 5	Limited*	Direct	January

*Limited to projects that score at or above the priority point threshold or meet exceptions as described above.

**Leveraged loans are generally funded twice per year (spring and fall). January 5 is the last application date to submit for spring bond issue funding, and June 5 is the last application date to submit for fall bond issue funding.

Scoring for applications in progress

Following commission approval of this IUP in fall 2025, the DWRF will apply the priority point scoring model for 2026 to all projects in the application process.

- Final priority point scoring will be issued to projects that have received PNA approval; otherwise, preliminary scoring will be provided.
- Throughout the year, the authority board may review and adjust the priority point threshold and number of open and limited cycles to account for changes in funding capacity and program demand.
- If funding requests exceed the available funds at any loan application deadline, further prioritization may be required.
 - Further prioritization will consist of re-scoring all projects in a given cycle according to the priority scoring model, based on all current benchmarks.

Preliminary or final scoring provided at pre-qualification or PNA stages will not impact this scoring. In the event two or more applications tie based on priority scoring:

- The agencies will use the highest total affordability score to break the tie.
- If a tie remains, the agencies will use the total score for drinking water quality & public health.
- If further tiebreakers are required, the remaining categories of the priority scoring model will be used systematically until the tie is broken.

Loan applicants that do not receive funding due to their rank may be considered at the next applicable loan application date at the applicant's request.

Loan approvals

- All loan approvals are valid for 18 months from the authority board approval date.
- Prioritized and approved loans that do not execute their loan within 18 months will be reprioritized upon the next application deadline as necessary and will require new board approval.
- If an applicant applies for supplemental funding, and the division determines the project is a necessary continuation of the originally proposed project, the entity may receive the same interest rate as the initial loan or the prevailing interest rate, whichever is lower.
 - This provision is subject to authority board approval, and the board may review and establish a time limit from the initial loan to when a supplemental loan application will remain under the same terms as the initial loan.

Allocation of loan proceeds

The division and authority board set processes and procedures for the DWRF. The authority board determines the appropriate use of loan proceeds with input from the DWRF committee. The fund uses proceeds from loans, EPA capitalization grants, and administration fees to benefit communities through planning grants, design and engineering grants, principal forgiveness, disadvantaged community loans, direct loans, and leveraged loans.

2026 capitalization grant requirements

For federal fiscal year 2026 and consistent with the 2025 appropriations language, the following requirements apply to each state receiving DWRF capitalization grants. However, these may be subject to change based on new requirements.

- Additional subsidy.
- Davis-Bacon and related acts.
- American iron and steel requirements.
- Debarment and suspension.
- Disadvantaged Business Enterprise Program.
- Williams-Steiger Occupational Safety and Health Act.
- Archeological and Historic Preservation Act.
- Environmental review - compliance with the state environmental review process.
- Signage.
- Build America, Buy America Act.

Additional subsidy

The 2025 DWRf capitalization grant appropriation requires at least 26%, but no more than 49%, of funds to be used by the state to provide additional subsidies to eligible recipients. The same requirement is assumed for 2026. The authority board determines the additional subsidy amount based on the capitalization grant conditions, guidance from the EPA, and alignment with program needs. Colorado provides additional subsidies to eligible disadvantaged communities in the form of loan principal forgiveness. Amounts available will vary, and at times may not be available. Refer to the [Disadvantaged Communities Loan](#) section.

Colorado issues a portion of the additional subsidy for the design and engineering phase (see [Design and Engineering Grants section](#)). This provides an opportunity to assist disadvantaged communities with design and engineering costs and to better prepare projects to move quickly to construction.

Loan principal forgiveness may be awarded at the loan approval phase for additional project costs, such as construction. The guidelines for issuing loan principal forgiveness at loan approval generally include:

- The amount of principal forgiveness awarded will be made during the loan approval phase and will occur throughout the year until all funds have been allocated.
- The authority board approves the amount of additional subsidy within the required EPA percentage range under the capitalization grant.
- The amount of loan principal forgiveness determined at loan approval is based on the required loan amount, excluding any awarded grants or other funding. Final loan principal forgiveness amounts are subject to review and approval by the authority board.
- The amount of loan principal forgiveness will not count toward the direct loan limit.
- Based on the availability of funds and program demands, the authority board may establish a “not-to-exceed” amount per project as low as zero, or award additional amounts based on evaluation of financial need. “Not-to-exceed” amounts may differ between base program disadvantaged communities and IIJA-eligible projects (refer to [Attachment V](#)) as determined by the authority board.
- Funds are available for Category 1 and 2 disadvantaged community loans.
- Loan principal forgiveness per project will be limited by the priority scoring model and the application of additional subsidization requirements [Attachment I](#) and [II](#)).
- The loan principal forgiveness amount may be reduced if the loan amount is reduced after approval.

- Any remaining funds from 2025 will be distributed in the following calendar year.
- Private non-profits are not eligible for principal forgiveness/additional subsidy.

If funds are unallocated from 2026, the agencies will issue funds to disadvantaged communities per the 2027 Drinking Water Revolving Fund Intended Use Plan.

Davis-Bacon and related acts

The requirements of Section 1450(e) of the Safe Drinking Water Act (42 U.S.C. 300j-9(e)) regarding prevailing wage rates apply to the construction of treatment works carried out in whole or in part with assistance made available by a state revolving loan fund as authorized by Section 1452 of the Safe Drinking Water Act (42 U.S.C. 300j (12)).

American iron and steel

The capitalization grant requires implementation of the Safe Drinking Water Act, Section 1452 (a)(4) by requiring that all iron and steel products used for the construction, alteration, maintenance, or repair of a public water system are produced in the United States. This requirement applies to projects carried out in whole or in part with assistance made available by a state revolving fund loan.

Debarment and suspension

Recipients of EPA financial assistance agreements must not be presently debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from covered transactions by any federal department or agency. The borrower must also ensure that any consultants, prime contractors, subcontractors, vendors, suppliers and manufacturers meet the requirements and are not excluded from covered transactions by any federal agency (as identified through the [System for Award Management](#)). The specific requirements with regards to debarment and suspension, including verification through the System for Award Management, are outlined in the EPA General Terms and Conditions for the capitalization grant.

Disadvantaged Business Enterprise Program

The goal of the Disadvantaged Business Enterprise Program is to ensure there is equal opportunity in the award of federally assisted contracts. Recipients of EPA financial assistance agreements are required to seek and are encouraged to use small, minority-owned, women-owned, or disadvantaged businesses for project procurement. This requirement applies to equivalency-designated projects.

Williams-Steiger Occupational Safety and Health Act

Recipients of EPA financial assistance agreements are required to ensure that all contractors working on project construction are subject to the provisions of the Williams-Steiger Occupational Safety and Health Act of 1970.

Archeological and Historic Preservation Act

Recipients of EPA financial assistance agreements are required to ensure that archeological discoveries, or discoveries of cultural significance, are protected through appropriate procedures.

Environmental review - compliance with the National Environmental Policy Act

All proposed actions funded by the DWRF undergo an environmental review process to assess compliance with the National Environmental Policy Act and state environmental review process. The state, borrower, engineer, contractor and subcontractor have a duty to cooperate fully with federal and local governments,

and all other concerned public and private organizations, to use all practical means and measures, including financial and technical assistance, and to create and maintain conditions under which people and nature can exist in productive harmony, and to promote the general welfare of the public.

Signage

The EPA capitalization grant requires equivalency designated projects to comply with DWRF signage guidance to enhance public awareness of EPA assistance agreements in Colorado. IIJA-funded projects may also be subject to signage requirements.

Build America, Buy America Act

Title IX of the IIJA created the Build America, Buy America (BABA) Act for federal financial assistance programs for infrastructure, including the DWRF. BABA requires that all iron, steel, and manufactured products used in a project are produced in the United States and that all construction materials are manufactured in the United States. This requirement applies to projects carried out in whole or in part with assistance made available by a state revolving fund loan and applies to equivalency-designated projects.

Clean Air Act and the Federal Water Pollution Control Act

Recipients of EPA financial assistance agreements are required to ensure that they are in compliance with both the Clean Air Act and the Federal Water Pollution Control Act or the awarded funds remedy the violations and bring the facility back into compliance.

Uniform Relocation Assistance and Real Property Acquisition Policies Act

The EPA capitalization grant requires equivalency designated projects to comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act to ensure fair and equitable treatment of persons who are displaced from their homes, farms, or businesses to make way for federal or federally assisted projects. The Act also requires agencies to reimburse individuals for actual and reasonable expenses incident to relocation, such as moving costs, direct loss of tangible personal property associated with moving or discontinuing a business, and expenses involved in searching for a replacement home or business site.

Green Project Reserve

Historically, the capitalization grant agreement required the DWRF to direct a portion of the capitalization grant toward projects that address green infrastructure, water efficiency, energy efficiency or other environmentally innovative activities. The 2025 capitalization grant does not require Green Project Reserve; therefore, the incentive will not be offered at this time. If the 2026 capitalization grants require Green Project Reserve, the authority board will establish terms and conditions at that time.

Capitalization grants and reloan funds

The DWRF executes loans funded with any available sources, grant or reloan. Loans will not be designated solely as grant or reloan funds. The DWRF disburses funds based on whichever funds are available and needed at the time of the draws.

Miscellaneous

The EPA capitalization grant may be allocated to any or all projects based on the amount of available funds and/or at the direction of EPA. Equivalency requires that all federal funding requirements are applied to a given number of projects that total to a funding amount equivalent to that of the capitalization grant received by EPA. The capitalization grant allows equivalency projects to be designated by the DWRF.

The application for the capitalization grant includes a proposed payment schedule using federal fiscal year 2025 funds. The payment schedule identifies the anticipated amount of EPA automated clearinghouse (“ACH”, an electronic funds transfer between two bank accounts over the ACH network) withdrawal from the capitalization grant and state dollars to be deposited into the fund.

The Colorado DWRf will provide the necessary assurance and certifications as part of the capitalization grant agreement and operating agreement between Colorado and EPA. The Colorado DWRf agrees to maintain compliance with the EPA Drinking Water State Revolving Fund regulations, general EPA grant regulations, and all applicable federal cross-cutting requirements.

In accordance with federal statutes, states are authorized to provide loans at or below-market interest rates, including interest-free loans, at terms not to exceed the lesser of the following: 30 years or the project useful life (as determined by the state). The authority board can determine the interest rate and loan terms of the DWRf at its discretion.

The DWRf agencies input project data into the EPA SRF Data System to report key project characteristics and milestone information on a quarterly basis.

Infrastructure Investment and Jobs Act (IIJA)

The federal government passed the IIJA on Nov. 15, 2021, providing additional funding to the DWRf for federal fiscal years 2022-2026. The state reviewed the federal infrastructure funding that was approved for the DWRf and developed an addendum to the 2022 DWRf IUP to describe the funding requirements and distribution methods. The addendum was submitted for public comment and approved by the commission on June 14, 2022. The addendum has been incorporated into this IUP as Attachment V and updated for funds distribution in 2026.

Disadvantaged Communities Loans

Disadvantaged communities (DAC) are defined as having a population of 10,000 or less and meeting certain primary or a combination of primary and secondary factors. Government agencies determined to be disadvantaged are eligible for a reduced interest rate, design and engineering grants, and/or additional subsidy if available. Private non-profits determined to meet disadvantaged community criteria are eligible for a reduced interest rate and planning grants, but are not eligible for design and engineering grants or loan principal forgiveness/additional subsidy.

Communities are evaluated for disadvantaged community status after submitting the PNA and again at the time of loan application. The primary and secondary factors used for determination are described below. Communities that did not qualify at the PNA submittal may qualify at loan application or other appropriate times, as determined by the DWRf committee. The DWRf agencies review disadvantaged community criteria, benchmarks, and affordability annually to assess efficacy, as well as adjust benchmark thresholds based on the current statewide demographic data.

Primary and secondary factors

Primary factors	Benchmark
P1 Community median household income (MHI)	Reliable MHI less than or equal to 80% of the state MHI.
P2 Community median home value (MHV)	Reliable MHV Less than 80% of the state MHV.
P3 County 24-month unemployment ate or county 10-year change in jobs	Unemployment rate greater than state rate plus 1% or loss in total jobs over a 10-year period.
S1 County median household income (MHI)	Reliable MHI less than or equal to 80% of the state MHI.
S2 10-year change in population	The community has lost population over a 10-year period.
S3 Assessed value/household	The community's total assessed value is less than the median Colorado municipality.
S4 Current & projected system debt per tap to MHV	Current and projected system debt per tap to MHV is greater than that of the median Colorado municipality.
S5 System full-cost per tap to MHI or required revenue per tap to MHI	Full cost is greater than the median Colorado municipality or required revenue is greater than the median Colorado municipality.

For details on factor data sources, reliability, and definitions, see the [Colorado SRF DAC Data Glossary](#).

Eligibility scenarios

Scenario	Primary factors	Results	Secondary factors	Results
1 (P1) MHI and	(P2) MHV or (P3) Unemployment/ Jobs	DAC eligible	Unnecessary	DAC eligible
2 (P1) MHI Only	Neither (P2) MHV or (P3) Unemployment/ Jobs	Test secondary	Meet at least two of five	DAC eligible
3 (P1) Unreliable MHI but	Both (P2) MHV and (P3) Unemployment/ Jobs	Test secondary	Meet at least two of five	DAC eligible

Disadvantaged communities are classified as either Category 1 or Category 2. If a community meets any one of the three scenarios above, the community is a Category 1. If, at the time of loan application review, a community’s “current and projected system debt to MHV” and “required revenue per tap to MHI” are greater than 80% of municipalities, then the applicant will be recommended to be a Category 2. The table below illustrates the loan terms and interest rate for each respective category.

Categories

DAC	Qualify	Loan amount	Loan rates*
Category 1	Meet one of the 3 scenarios.	Up to \$3 million loan principal per project.	Current interest rate is 2.50% for a 20-year term and 2.75% for a 30-year term.*
Category 2	Meet one of the 3 scenarios and both Proposed System Debt to MHV and Required Revenue per Tap to MHI to exceed the municipal 80th percentile for each factor.	Up to \$3 million loan principal per project.	Current interest rate is 1.50% for a 20-year term and 1.75% for a 30-year term.*

*The authority board typically determines interest rates on or before December 31 each year for the upcoming calendar year; however, rates are subject to change throughout the year.

Business case

In the event that a community’s primary or secondary factor data does not represent recent, significant economic distress, or a scenario is marginally disqualifying, a business case may be presented to the authority board for an eligibility determination. The business case should be coordinated with the project team and be based on the factors the community has determined as not reflective of the community’s current socioeconomic or projected fiscal condition. A business case may be conducted after submission of an acceptable PNA.

Eligibility period

An eligibility determination is valid for 12 months from the date of the PNA review letter or other date, as determined by the DWRf committee. Status will be redetermined if the applicant does not submit a complete loan application within 12 months.

All projects are evaluated by the DWRf team at the time of the loan application to determine if they meet the criteria for Category 1 or Category 2 disadvantaged community status. Applicants who were qualified as a disadvantaged community at the PNA will retain (or can improve) their status at the time of loan

application, as long as the application has been submitted within 12 months, as described in the eligibility determination section.

If a disadvantaged community applies for supplemental funding and the division determines the project a necessary continuation of the originally proposed project, the entity will continue to qualify as a disadvantaged community at the same category as the initial loan and will receive the original loan term, and either the same disadvantaged community interest rate as the initial loan, or the prevailing disadvantaged community interest rate, whichever is lower. This provision is subject to the authority board's approval, and the board may review and establish a time limit from the initial loan to when a supplemental loan application will remain under the same disadvantaged community determination and loan terms as the initial loan.

Planning and conversion planning grants

The intent of the planning grant is to assist applicants with the costs of complying with DWRf requirements such as PNAs, environmental assessments, energy audits, and the legal and accounting fees that may be associated with the formation of a government entity. Planning grants are only intended to assist disadvantaged communities that expect to come through the program and each disadvantaged community can only receive one planning grant of up to \$10,000 per project. The authority board may review and adjust the maximum planning grant amount if necessary.

A conversion planning grant may be provided to assist with the costs of converting a privately owned for-profit or non-profit system into a governmental entity, such as a special, or a local, or public improvement district or a water authority, for the purposes of financing an eligible project through the DWRf, as well as the costs of complying with program requirements described above. An entity cannot receive both a planning grant and a conversion planning grant, and only one conversion planning grant of up to \$25,000 may be awarded per disadvantaged community.

Entities that meet the disadvantaged community criteria and have the project on the current year's IUP (Appendix A - Project Eligibility List) are eligible. Entities that meet the disadvantaged community criteria but are not listed in Appendix A - Project Eligibility List will be required to list the project on the subsequent year's project eligibility list to be considered. Planning grant requests are included as part of the pre-qualification process and are required to have a pre-qualification meeting with DWRf staff. Currently, both government agencies and private non-profits are eligible for planning grants. Business cases, as defined in the IUP, will not be used for determining planning grant eligibility.

Planning grant invoices are paid at an 80:20 ratio to meet a 20% match requirement. Planning grant terms are no longer than one year, unless otherwise approved by the authority board or its executive director.

Design and engineering grants

Additional subsidies and IIJA principal forgiveness for the federal fiscal year 2026 will be used to fund design and engineering activities for disadvantaged communities. A project, as approved in the PNA, may be eligible for up to a \$300,000 design and engineering grant. The authority board may review and adjust the maximum design and engineering grant amount if necessary. The amount of the grant is determined by actual design and engineering fees relative to total project costs.

Entities that meet the disadvantaged community criteria with the project on the current year DWRf IUP (Appendix A - Project Eligibility List) are eligible for design and engineering grants. The applicant must

submit a PNA and an environmental determination checklist to begin grant eligibility and consideration. Private non-profits are not eligible for design and engineering grants. If the demand for design and engineering grants is greater than the capacity of funds set aside for the grants, the DWRF may prioritize the issuance of design and engineering grants based on the applicant population. Applicants with a population of 5,000 or less will be prioritized over applicants with a population greater than 5,000 until all funds have been allocated.

Design and engineering grant invoices are paid at an 80:20 ratio to meet a 20% match requirement. The 20% match portion shall be reimbursed upon execution of the project's DWRF loan. Design and engineering grants are only intended to assist entities that expect to come through the DWRF for loan funding. The design and engineering grants have an 18-month expiration unless otherwise approved by the authority board or its executive director.

Special Projects

The division supports:

- Online project management and project tracking system for DWRF projects.
- Enhancing the Drinking Water Excellence Program.

Emergency Procedures

The commission may amend Appendix A: DWRF 2026 Project Eligibility List and Appendix B: DWRF 2026 Base and IIJA Project Priority/Fundable List at any time throughout the year to include projects that are determined to be emergency projects needed to prevent or address threats to public health. In cases where the commission determines amendments will result in substantial changes to Appendix A or Appendix B, the commission will provide public notice and an opportunity for comment on the proposed inclusions.

Small Systems Funding Goal

To the extent there are a sufficient number of eligible projects, the state will use at least 15% of monies credited to the fund account on an annual basis to provide loan assistance to systems serving 10,000 or fewer people. The division anticipates that up to 64 small systems with populations less than 10,000 are eligible for funding in 2026, for a total of up to \$386,010,877 in project costs. To further the small system-funding goal in 2026, planning grants are available to assist small public water systems. Design and engineering grants are also available to assist small governmental public water systems. Small systems are subject to eligibility requirements for planning grants and design and engineering grants as discussed above.

Financial Status

As of June 30, 2025, the agencies have awarded:

- 99 base DWRF non-disadvantaged community direct loans totaling \$114,987,900.
- 27 DWRF IIJA supplemental direct loans totaling \$264,961,956.
- 56 DWRF leveraged loans totaling \$629,734,910.
- 192 base program disadvantaged community loans totaling \$131,536,036 were administered, or are currently being administered, by the state (not including ARRA, IIJA, PNP, or DAC leveraged loans).

- 5 DWRF private non-profit public water system direct loans totaling \$8,500,432
- In addition, as of Dec. 31, 2011, the state administered 24 American Recovery and Reinvestment Act loans, including principal forgiveness totaling \$32,290,880.
- The total loan amount for the 403 loans is \$1,182,012,113.

The state is required to match the total amount of the federal grant with a 20% contribution of state funds. The funds available are displayed in Appendix E: Funds Available to the DWRF Loan Program.

Direct loans

The DWRF issues low interest, low cost direct loans. Direct loans are designed for smaller projects, or for amounts under \$3 million, unless otherwise approved by the authority board. Direct loans in excess of \$3 million may be offered based on approval by the authority board. The direct loan sources are capitalization grant funds and/or reloan funds.

Leveraged loans

Leveraged loans are designed primarily for investment-grade borrowers with projects over \$3 million. This type of loan is used as security for bonds that are sold to increase the DWRF's loan capacity. The loan source comes from capitalization grant funds, state match funds, and bond proceeds. In 2015, the DWRF started issuing leveraged loans using a cash flow fund concept to further enhance the leveraging capabilities and liquidity of the fund. In the future, leveraged loan structures may use the cash flow or reserve fund model based on the authority board's decisions and current economic conditions. From July 1, 2017 through June 30, 2025, the leveraged loan interest rate was 70-85% of the market rate including the administrative fee of up to 1.50%. The authority board approved a subsidy range of 70% to 85%; therefore, the leverage loan subsidy can vary within this range. The authority board may review and adjust the subsidy range and administrative fee during the year if needed. The market rate of bonds is determined on the day of sale as the all-in bond yield, or all costs considered, of the AAA-rated drinking water revenue bonds or state revolving fund bonds sold by the authority. The authority board determines the interest rate for direct loans and the interest rate subsidy for leveraged loans. The authority board may also adjust the leveraged loan subsidy and establish a minimum interest rate floor for leveraged loans based on market conditions to maintain adequate administrative fees.

Administrative fees

Administrative fee income is deposited into an account separate from the fund and is used for the agencies' staffing and operations expenses. Administrative fee income will continue to partially fund planning grants in 2026. Administrative fee income, as available, is used to reimburse the authority for state match funds deposited to the fund. The DWRF reserves the right to accrue an administrative fee on all loans if it is determined that additional funds are needed to cover administrative costs and/or repay the state match provided by the authority. The authority board will establish the administrative fee percentage. Up to \$1 million of Water Pollution Control Revolving Fund (WPCRF) administrative fees collected from loans may be transferred to the DWRF to pay for DWRF administrative costs.

Administrative fees received from DWRF loans for 2025 are estimated at \$8,111,226. These funds are used for direct program costs, including but not limited to: legal fees, accounting fees, trustee fees, other consultant fees, labor and overhead allocations of the authority, division and DOLA. Total costs for

administration of the fund are estimated at \$8,290,000 and exclude any state match repayment. A portion of the state match may be paid from DWRF set-aside grant monies. Appendix F: Administrative Fee Account consists of a table showing the administrative fee account activity since inception.

Need vs. capacity

Each year, the DWRF compares the eligibility list needs against the loan capacity of the fund. Current needs exceed \$26 billion. Continued leveraging assists more communities on the project eligibility list (Appendix A: DWRF 2024 Project Eligibility List) to achieve compliance with the Safe Drinking Water Act. To date, the leveraged loan rates have been in the range of 1.28% to 4.60%. Although no interest income on the grant funds and state match funds accrues to the fund from leveraged loans, the perpetual nature of the fund remains in place. For more detail, please see Attachment III: Estimated DWRF Loan Capacity for 2026.

Future funding levels

Through June 30, 2025, the state received a total of \$735,977,600 in federal capitalization grants (including the \$6,666,667 transfer back to the WPCRF in 2003, and also including all re-allotments and the transfers from WPCRF IIJA EC to DWRF IIJA EC of \$747,000 and \$1,701,000 in 2022 and 2023, respectively). Of this amount, \$152,266,393 was set aside for non-loan activities. A history of loans issued is available in Appendix C: Loan Summary Report. The state expects to receive but is unable to anticipate the amount and funding levels of the federal fiscal year 2026 capitalization grant. For appendices and table purposes, the 2025 amounts were assumed for 2026. The 2025 DWRF capitalization grant award is expected in late 2025. The DWRF estimates a schedule for the signing of binding commitments (loan agreements) to be within three years from the receipt of the capitalization grant.

New projects

Appendix B: DWRF 2026 Base and IIJA Project Priority / Fundable List includes 23 additional projects that completed a preliminary eligibility assessment in 2025 (through August 2025). These 23 projects identified project costs of \$144,467,150. Based on the 2026 eligibility survey responses, 15 new projects were added to Appendix A, DWRF 2026 Project Eligibility List, in the amount of \$82,717,000.

Proportionality

The State of Colorado meets the proportionality regulations as required by the EPA.

Transfer Activities

As authorized by Congress, Section 302 of the Safe Drinking Water Act authorizes a state to transfer up to 33% of the capitalization grant (in a fiscal year) from one revolving fund to the other, i.e. from the DWRF to the WPCRF and vice-versa. In turn, 33% of the cumulative capitalization grants for federal fiscal years 1997-2025 (total DWRF grants at \$470,898,400) may be reserved from the DWRF and transferred to the WPCRF and vice versa. For more details, refer to the table in Attachment IV: Net Funds Available for Transfer, which itemizes the amount of net monies available for transfer between the two funds.

Based on the commission and governor approval, a transfer of no more than \$10 million may be made in 2026. If a transfer is pursued, a stakeholder group will be notified of the state's intent to transfer funds. The exact amount of the transfer will be determined based on the demands of the two revolving funds. None of the transferred funds will be used for administrative purposes. With the statutory language approved by the

Colorado General Assembly in 2002, transfers can be made from one account to the other with appropriate approvals.

Given the low level of remaining grant monies in the fund, it is unlikely that the agencies will transfer grant funds from the DWRF in 2026. However, if a transfer is pursued, it is estimated that a transfer of \$5 - \$10 million to or from either fund would reduce the level of that program by an additional \$1 - \$2.5 million per year over the next 20 years. The DWRF set-asides would not be affected, and the remainder of the allocation would be deposited into the revolving fund.

Cross-Collateralization Activities

Beginning in the calendar year 1999, the two revolving funds cross-collateralized or pledged monies on deposits in one fund act as additional security for bonds secured by monies on deposits in the other fund. The agencies used this mechanism for both funds in 1999 and, as a result, all three bond rating agencies upgraded the rating for both programs to AAA. This upgrade translates to lower interest rates, and therefore, more savings for the borrowers of both programs. These savings continue today.

Operator Certification

The 1996 amendments to the federal Safe Drinking Water Act required the states to develop certification programs for operators of water treatment plants and distribution systems. House Bill 00-1431, adopted by the Colorado General Assembly, revised the existing Colorado operators certification program, in part, to meet the new federal requirements. In accordance with revised state statute, the division and the Water and Wastewater Facility Operators Certification Board developed a program to implement federal requirements. HB20-1215 reauthorized the water and wastewater operator certification program through 2031. The EPA approved the program. More detail on the program is available on the [facility operator certification web page](#).

Private Nonprofit Public Water Systems

In May 2015, Gov. Hickenlooper signed Senate Bill 15-121 that amended the authority's statute to allow private, non-profit public water systems, with projects listed on the DWRF eligibility list, to receive financial assistance. The authority board approved the funding parameters and eligibility for private nonprofit public water systems. These systems are considered the same as government agencies, with some exceptions as outlined in this IUP. Similar to government agencies, private, non-profit public water system projects are evaluated by the state revolving fund team on a case-by-case basis and may require additional covenants and conditions to ensure the success of projects and the perpetuity of the DWRF.

As of June 30, 2025, non-Arkansas Valley Conduit (AVC) private nonprofit public water systems are limited to a combined annual lending limit, as set and determined by the authority board as needed. PNPs that will be connected into the AVC will be exempt from the maximum annual lending dollar amount limit of PNP loans per year. This exception applies only to those projects that enhance or benefit the AVC. Non-AVC private nonprofit public water systems are also subject to a maximum individual loan limit, as set and determined

by the authority board as needed. Private nonprofit public water system borrowers are subject to an upfront administrative fee of 1% of the total loan request. The administrative fee is set and determined by the authority board and may be changed, as needed. In addition, private nonprofit borrowers will have higher interest rates than standard loan rate tiers, including DAC tiers, that will be reviewed and discussed by the authority board semiannually, and more often, if necessary. This lending program and its requirements are reviewed no less than annually by the authority board.

Set-Aside Activities

Colorado may set-aside up to 31% of the capitalization grant for non-project, or set-aside activities that are necessary to accomplish the requirements of the Safe Drinking Water Act. The division develops and submits work plans to EPA describing activities to be accomplished with the DWRF. The authority provides the 20% state match to receive the federal capitalization grant. Since the federal fiscal year 2002 grant, the 20% match for the set-aside portion comes from the loan administrative fee account.

The division is responsible for determining the amount of funds necessary under each set-aside and meeting the obligations of the Safe Drinking Water Act. The financial status of the set-asides are summarized in Appendix D: Set-Aside Activity. The administration of the 2025 set-aside funds are listed below. The division reviews set-aside budgets and spending on a regular basis in order to minimize any unliquidated obligations (ULOs), and to use set-aside funds within three years of receiving them.

The federal fiscal year 2025 capitalization grant amount is estimated at \$19,105,000. A description of each set-aside and the funding earmarked is detailed below. Due to cuts to the DWRF capitalization grants, administration & technical assistance, small system training & technical assistance, state program management, and local assistance & other state programs will be subsidized by IIJA DWRF supplemental funding. This will preserve the DWRF base program funds. The activities described below for the base program will be funded through the IIJA supplemental funding

Federal fiscal year 2026 Colorado set aside request summary

Administration & technical assistance	4%	\$0
Small system training and technical assistance	2%	\$0
State program management	10%	\$0
Local assistance and other state programs	15%	\$0
<i>*Capacity development</i>	10%	
<i>*Wellhead protection</i>	5%	
Total		\$0

*included in Local Assistance and Other State Program percentages.

Administration and technical assistance (4%)

Federal fiscal year 2026 - Not taking set-asides, activities funded by IIJA set-asides as needed

This supports ongoing administration of the DWRF and may also support technical assistance to public water systems (established if Colorado opts to submit an EPA-approved technical assistance work plan). Colorado

intends to take the full set-aside if needed whether or not a technical assistance work plan is submitted and approved.

Use of funds and expected accomplishments

The Water Quality Control Division uses funds to cover administrative and technical assistance expenses related to projects and activities authorized under the Safe Drinking Water Act, including the provision of technical assistance to public water systems as identified in the EPA-approved work plan. A technical assistance workplan, if one is developed, may include but is not limited to the following activities and outputs:

- Collaborate with EPA-supported technical assistance contractors regarding project development to help drinking water systems meet the requirements to obtain funding through the DWRF.
- Collaborate and coordinate with other funding providers throughout the state to address project affordability.
- Coordinate with the Safe Drinking Water Program's efforts regarding technical review, inspections, compliance, and enforcement to ensure that funding is directed to the identified issues of concern.
- Partner with drinking water technical assistance providers, associations and other non-profit organizations to apply resources to assist systems of concern.

Small system training and technical assistance (2%)

Federal fiscal year 2026 - Not taking set-asides, activities funded by IIJA set-asides as needed

This supports ongoing training and technical assistance to small systems serving fewer than 10,000 people established in the EPA-approved work plan focusing on the capacity development strategy.

Use of funds and expected accomplishments

Funds are used to provide technical assistance and training programs for small systems including but not limited to the following:

- Provide one-on-one water system training and technical assistance to small systems.
- Identify training needs (i.e. topics, locations, audience) using tools such as compliance and sanitary survey trends, operator test results, and the operator training framework.
- Coordinate training delivery with training partners.
- Create and provide basic operator training throughout the state.
- Identify and reach out to systems that would benefit from assistance and identify their capacity needs using a variety of tools (e.g. compliance and sanitary survey data, newly discovered systems).
- Prioritize systems to assist based on threat to public health, number impacted, and other factors.
- Coordinate assistance efforts with training partners.
- Track assistance efforts and system improvements made as a result of coaching.

- Conduct program support tasks associated with drinking water contaminants of emerging concern.
- Maintain staff support related to training and assistance activities for small systems, including grant and contract management when activities are performed by a third-party.

State program management (10%)

Federal fiscal year 2026 - Not taking set-asides, activities funded by IIJA set-asides as needed

This supports administration of the state Public Water System Supervision program established in the EPA-approved state program management work plan.

Use of funds and expected accomplishments

A portion of this set-aside will be used to support staff to accomplish Safe Drinking Water Program requirements including:

- Data management system upgrades and maintenance.
- Improved system communication resulting in compliance progress and attainment.
- Effective program oversight, compliance assurance, enforcement, rule adoption, regulatory development, public water system assistance and capacity development.
- Staffing for engineering, compliance assurance, compliance assistance, rule management, data management, enforcement, administration, sampling, source water protection support, sanitary surveys, program management, contract oversight, early rule implementation, training and technical assistance, and for implementing a capacity development strategy.
- Computer acquisition and employee expenses including furniture, vehicles, operational costs and indirect costs.

Local assistance and other state programs (15%)

Federal fiscal year 2026 - Not taking set-asides, activities funded by IIJA set asides as needed

This supports assistance for five activities: capacity development, wellhead protection, source water assessment and protection (SWAP) activities, SWAP land acquisition, and SWAP program implementation. Colorado intends to take the full set-aside based on the final capitalization grant award (15% from the capitalization grant). However, no more than 10% may be allocated for any single activity.

Capacity development (10%)

Federal fiscal year 2026 - Not taking set-asides, activities funded by IIJA set-asides as needed

This activity is to assist new and existing systems to achieve and maintain technical, managerial and financial capacity as well as to support SWAP activities.

Use of funds and expected accomplishments

- Implement the Safe Drinking Water Program capacity development strategy.

- Support and maintain a SWAP program to provide the public with information about their drinking water and create a way for communities to get involved with protecting drinking water quality.
- Provide continued one-on-one water system training and technical assistance.
- Use system self-reported data and information, as well as the list of enforcement actions and input from compliance staff, to proactively identify trends that suggest a system might lack technical, managerial, or financial capacity and prioritize assistance efforts.
- Support and enhance the efforts of the Safe Drinking Water Program to monitor water system compliance via water quality laws and regulations to detect non-compliance and respond to violations quickly, fairly and consistently to limit the risk of harm to public health and the environment.
- Support and enhance the Safe Drinking Water Program's efforts to conduct sanitary surveys of public water systems, review public water system designs for conformance with design criteria, prepare and distribute technical assistance materials, and track system compliance with follow-up requirements.
- Collaborate with division staff to leverage and focus resources on systems with issues that are indicative of a lack of capacity. This may include, but is not limited to, disinfection, disinfection byproduct, and/or radionuclide issues.
- Partner with drinking water technical assistance providers, associations, and other non-profit organizations to apply resources to assist systems of concern.
- Support collaboration among all drinking water systems, assist smaller systems in understanding their problems and potential solutions. Use performance-based approaches to develop training.
- Support and enhance the Safe Drinking Water Program's efforts to promote treatment process optimization and provide training and recognition for surface water treatment facilities in Colorado.
- Support and provide comprehensive cooperation in inspections, enforcement, compliance assistance, and technical assistance coaching where possible; conserve resources where practical.
- Provide technical expertise and assistance to local watershed initiatives, local governments, and community and non-community drinking water systems in obtaining technical and financial assistance to develop, implement, and ensure the long-term success of source water protection plans.
- Conduct technical, managerial and financial capacity reviews for all new water systems and water systems applying for DWRP loans to ensure these systems will operate into the future with fewer difficulties, be financially secure, and be managed with the best interests of the water users in mind.
- Enhance communication and collaboration with the Colorado operator certification program to ensure that available training services meet operator training needs and professional

development goals. Identify and overcome barriers associated with cross-program work planning and coordination.

- Continue to foster partnerships through Colorado's water/wastewater agency response network and national incident management system initiative to promote security and all-hazards preparedness throughout the state's drinking water community.
- Maintain staff support related to the above activities, including grant and contract management when activities are performed by a third party.

Wellhead protection program (5%)

Federal fiscal year 2026 - Not taking set-asides, activities funded by IIJA set-asides as needed

This activity is to delineate and assess source water areas for groundwater systems, produce new wellhead protection/source water protection assessment reports as necessary, and support development and implementation of local source water protection plans.

Use of funds and expected accomplishments

- Complete new and/or revised groundwater source water delineations.
- Enhanced groundwater susceptibility assessments to improve compliance.
- Improved groundwater protection plans to minimize source contamination.
- Enhanced wellhead protection/source water assessment and protection data management.
- Enhanced community information and education.
- Improved data compilation and reporting.
- Financial and technical assistance to facilitate source water protection plans and address emerging contaminant issues.
- Coordinate and perform community and non-community groundwater sanitary surveys.
- Perform drinking water design reviews and/or level 2 assessments with consideration of source water protection.
- Provide technical assistance to public water systems concerning source water protection issues and how they may relate to proper water system operations.
- Compile and report the national source water protection measures to the EPA via the Performance Accountability Report (PAR).

Public Review and Comment

On September 12, 2025, the commission published this intended use plan. The commission approved the plan, the 2026 DWRF project eligibility lists (Appendix A), and the project priority/fundable lists (Appendix B) at an administrative action hearing on October 14, 2025. The intended use plan was made available for public comment one month prior to the administrative action hearing. The commission posted the plan on

its website and accepted comments via email. The commission did not receive any written comments during the public comment period on the 2026 DWRF IUP.

During the annual project eligibility list survey process, the division contacted government agencies and private nonprofit entities to identify potential projects for the 2026 Drinking Water Revolving Fund Intended Use Plan. Each year, the division will update the plan to include additional DWRF projects and other appropriate changes. The division will continually seek public review and comment for the proposed list of eligible projects, and the IUP will be brought to the commission for annual approval.

Attachment I: Drinking Water Revolving Fund Priority Scoring Model

Drinking Water Quality and Public Health	Points
The project addresses a documented waterborne disease outbreak associated with the system within the last 24 months.	35
Project corrects or prevents violations of MCLs (primary standards) ¹ .	(points may be scored in multiple categories)
	30
• Nitrate, nitrite, TCR.	25
• Total trihalomethanes, total haloacetic acids.	20
• Arsenic, selenium.	15
• Other regulated contaminants.	
Project corrects or prevents exceedances of MCLs for radionuclides.	35
Project corrects inadequate treatment techniques that are unable to satisfy the requirements for:	
• Surface water.	
• GWUDI.	20
• Groundwater.	(for one or more)
Project corrects exceedances of secondary drinking water standards.	10
The system has inadequate supply to meet all current domestic water supply demands. (The system must provide records of water usage to substantiate that supply is inadequate.)	25
Project will correct or prevent:	(points not additive, scored only in one category)
• Inadequate distribution due to system deterioration (e.g., experiencing multiple line breakages).	20
• Inadequate distribution due to chronic low pressure.	15
• Inadequate storage.	10
• Demand exceeding design capacity.	5
The project incorporates fluoridation.	10
Affordability*	Points

Median Household Income (MHI) of the service area.

• <50% of state MHI	35
• From 50% to 80% of state MHI.	20
• From 81% to 100% of state MHI.	5
• >100% of state MHI.	0

Affordability Continued	Points
-------------------------	--------

User Fees (current water rate per tap compared to MHI):

• Rates are >1.62%	45
• Rates from 1.14% to 1.62%	25
• Rates are <1.14%	0

OR

User Fees for a combined water & sewer fund (current combined rates per tap compared to MHI)

• Rates are >2.98%	
• Rates from 2.12% to 2.98%	45
• Rates are <2.12%	25
	0

Water debt per tap compared to MHV

• Debt is >0.75%	45
• Debt from 0.25% to 0.75%	25
• Debt is <0.25%	0

OR

Water & sewer debt (for combined systems) per tap compared to MHV:

• Debt is >1.49%	45
• Debt from 0.64% to 1.49%	25
• Debt is <0.64%	0

Population served criteria:

• <500	
• From 500 to 999	35
• From 1,000 to 1,999	25
• From 2,000 to 4,999	20
• From 5,000 to 10,000	15
• >10,000	5

Assessed Value/Household	0
• Assessed Value per household is <\$12,721	
• Assessed Value per household from \$12,721 to \$24,308	35
• Assessed Value per household from \$24,308 to \$46,143	20
• Assessed Value per household is greater than \$46,143	10
	0
*Affordability criteria are based on the most current available disadvantaged community benchmarks.	

CPDWR Compliance	Points (points not additive, scored only in one category)
The project addresses an enforcement action by a regulatory agency and the facility is currently in violation of CPDWRs.	30
The project addresses a facility's voluntary efforts to resolve a possible violation and will mitigate the issuance of a consent order, notice of violation or other enforcement action.	20
The project is designed to maintain CPDWR compliance, meet new requirements, or address contaminants included in the priority list submitted by the division to the commission for which standards may be considered.	15
The system is currently meeting all CPDWRs.	10
Source Protection and Conservation	Points
Project addresses vulnerability to potential pollution by conditions identified in an approved source water protection area assessment:	
• Point source discharge within a delineated area.	15
• Areas impacted by agricultural chemical use or run-off.	(for one or more)
• Area subject to oil/gas/mineral operations.	
• Unprotected watershed area.	
The project establishes a protective zone to address potential pollution as a result of wildfires in burn scar areas.	10
Utility rate structure currently in place:	(points not additive, scored only in one category)
	15
• Increasing block rates.	10
• Seasonal rates.	0
• Uniform.	

The project will implement water metering, leak detection and/or other water conservation and efficiency infrastructure applications at a minimum of 20% of total project costs.	10
Sustainability and Resiliency*	Points
Project seeks to:	
• Correct compliance issues, water quality problems, and/or water supply problems through physical consolidation and regionalization of water systems.	10
• Correct and/or improve security of the water system.	10
• Incorporate beneficial uses of water treatment plant sludge and/or alternative concentrate management options in an approved Beneficial Use Plan. ²	10
Project promotes sustainable utilities and/or communities through a utility management plan that:	
• Secures a replacement fund for the rehabilitation and replacement of aging and deteriorating infrastructure as needed.	5
• Provides sufficient revenues to meet O&M and capital needs.	5
• Demonstrates that the facility has maintained licensed/certified operators, adequate staffing to properly operate and maintain the facility and will continue to do so.	5
• Incorporates a fix-it-first planning methodology.	5
Readiness to Proceed	Points
Project has secured one or more of the following:	
• Plans and specifications approved.	10
Project has funding secured by multiple assistance provider	10

¹ This accommodates repeat violations and provides indicators for both chronic and acute health hazards

² The Hazardous Materials and Waste Management Division is the agency responsible for implementing the Regulations Pertaining to the Beneficial Use of Water Treatment Sludge and Fees applicable to the Beneficial Use of Sludges pursuant to 5CCR1003-7.

Attachment II: Application of Additional Subsidization

Additional Subsidization	
Additional subsidization points (Affordability Score + Water Quality & Public Health +CWPDR Compliance)	Maximum Percent of Loan Principal as Principal Forgiveness*
≥170 points or addresses a highest priority Water Quality & Public Health project**	80% principal forgiveness
140-170 points	60% principal forgiveness
100-139 points	40% principal forgiveness
<100 points	20% principal forgiveness

*No one project can receive more than 50% of the total amount of funds that have been allocated for additional subsidization for that fiscal year. For example, if Colorado has allocated \$2 million for FY2024 to be provided as additional subsidization, no project can receive more than \$1 million in principal forgiveness. The additional subsidy is in addition to design/engineering grants. The authority board may review and adjust the maximum percent of loan principal forgiveness if needed to meet program financial requirements.

**Highest priority projects are a single category from the Water Quality & Public Health section of the priority scoring table that score ≥ 30 pts. These are projects that address Waterborne Disease outbreaks (35 pts), Nitrate/Nitrite or TCR (30 pts), and Radionuclides (35 pts).

Attachment III: Estimated Loan Capacity for 2026

Estimated Loan Capacity for 2026		
DWRF capitalization grants (to be used for loans)	This cell is intentionally blank	\$583,711,207
DWRF capitalization grant obligated for loans	<i>as of 6/30/2025</i>	\$515,436,641
Total capitalization grant funds available to be obligated for new loans	<i>as of 6/30/2025</i>	\$68,274,566
Estimated 2026 Capitalization Grant - project funds only*	This cell is intentionally blank	\$10,000,000
Estimated 2026 IJJA Supp. Capitalization Grant - project funds only*	This cell is intentionally blank	\$33,000,000
Estimated 2025 IJJA Lead Capitalization Grant - project funds only*	This cell is intentionally blank	\$35,000,000
Estimated 2026 IJJA Lead Capitalization Grant - project funds only*	This cell is intentionally blank	\$35,000,000
less: transfer to WPCRF in 2025	This cell is intentionally blank	\$0
Total grant funds available to obligate for future loans		\$184,274,566
Reloan funds available for future loans in reloan account	<i>as of 6/30/2025</i>	\$95,915,817
plus: de-allocation of reserves and transfer to reloan	<i>on 9/1/2025</i>	\$20,443,114
plus: de-allocation of reserves and transfer to reloan	<i>on 9/1/2026</i>	\$21,054,127
Total reloan funds available		\$137,413,059
Total grant plus reloan funds		\$318,687,625
less: Open pool loans remaining balance	<i>as of 6/30/2025</i>	\$183,239,819

less: Open pool loans approved but not executed	This cell is intentionally blank	\$8,000,000
Total funds available		\$127,447,806
Leveraged Loans x 1.3	This cell is intentionally blank	\$165,682,147
2026 DWRF Loan Capacity Estimate		\$165,682,147

*The 2025 DWRF Capitalization Grant award is expected in late 2025. These numbers reflect the expected 2025 grant awards and estimated 2026 grant awards.

Attachment IV: Net Funds Available for Transfer

Year	Transaction	Banked Transfer Ceiling	Transferred from WPCRF to DWRF	Transferred from DWRF to WPCRF	WPCRF Funds Available for Transfer	DWRF Funds Available for Transfer
1997	CG Award	\$5.6	N/A	N/A	\$5.6*	\$5.6*

Attachment V: Addendum to the 2026 DWRF Intended Use Plan Infrastructure Investment and Jobs Act

The Infrastructure Investment and Jobs Act (IIJA), was signed into law on November 15, 2021. The IIJA invests more than \$50 billion over the next five years in EPA water infrastructure programs including the DWRF. Colorado's 2025 allotment from the IIJA for the DWRF program totals approximately \$76 million and the 2026 allotment is assumed to be the same for the purposes of this IUP.

This attachment describes the DWRF program requirements to distribute DWRF IIJA funding in 2026, and for the distribution of IIJA funds in 2026. The existing (base) 2026 DWRF program remains in place and any changes to the base program or requirements are outlined in this attachment.

The IIJA funding will be issued through the DWRF in three categories: 1) DWRF IIJA General Supplemental Funding, 2) DWRF IIJA Emerging Contaminants Funding, and 3) DWRF IIJA Lead Service Line Funding. The IUP amendments and the IIJA funding categories are described below.

IIJA Funding Categories and Use of Funds

DWRF IIJA general supplemental funding

The IIJA is anticipated to include a general supplemental funding allotment for FFY 2026 to Colorado of \$43.62 million (estimated based on the 2025 DWRF IIJA General Supplemental award) for the DWRF. The existing DWRF as described in this IUP applies to this funding category and includes the following:

Eligibility

- Eligible entities and projects for this funding must be eligible under the existing DWRF program.
- All eligible projects for this allotment must be listed on the existing Appendix A Drinking Water Revolving Fund 2026 Project Eligibility List.

Requirements

- Application, prioritization, and approval for funding will be the same as the existing DWRF.
- State match is 20% of the total amount of the capitalization grant in fiscal year 2026. The authority has historically provided the state match to receive the federal capitalization grant; however, the state legislature may also provide the matching funds to meet the requirement.
- 49% of the capitalization grant amount may be issued as additional subsidization in the form of principal forgiveness and/or grants. The authority board of directors may direct additional subsidization from the DWRF IIJA supplemental funding to Design and Engineering grants as described in the base program ([see Design and Engineering Grants](#)) as needed in order to subsidize the cuts to the base DWRF program. Additional subsidization may be provided to eligible entities that meet the DWRF IIJA Principal Forgiveness Eligibility Criteria, as confirmed by the authority board.
- The authority board of directors may establish a maximum award amount, which may include a maximum number of times an entity can access funding from this category, based on program demand, and loan interest rate and terms will be determined by the board based on market conditions. In times of high demand, maximum award amounts for principal forgiveness may be as low as \$0.

- Distribution of funding:
 - Applicants with eligible projects meeting the DWRF IIJA principal forgiveness eligibility criteria may qualify to receive IIJA funds at a flat loan/principal forgiveness combination. Applicants with project costs exceeding a maximum award amount, if one is established by the authority board, or exceeding available funds, may receive funds for the remaining project costs through the base program. Additionally, applicants meeting the base program DAC criteria may be eligible for additional principal forgiveness from the base program if funds are available. Private non-profits are not eligible for IIJA principal forgiveness/additional subsidy.

Set-aside activities for DWRF IIJA general supplemental funding

Similar to the DWRF base (existing) program, Colorado may set aside up to 31% of the capitalization grant for non-project, or set-aside activities that are necessary to accomplish the requirements of the Safe Drinking Water Act. Work plans are developed and submitted to EPA describing activities to be accomplished with the fund.

In 2025, the DWRF base program capitalization grant was reduced (12% cut from 2021), which is the appropriation the Safe Drinking Water Program relies on to operate the program. Therefore, if the 2026 base program grant is also reduced, a portion of the set-asides from this IIJA funding will be used to supplement program needs. It is the division's responsibility to determine the amount of funds necessary under each set-aside and to meet the obligations of the Safe Drinking Water Act.

The 2025 IIJA DWRF appropriation was \$43,616,000 and the 2026 appropriation is assumed to be the same for set-aside amounts below. Additionally, if the 2026 DWRF base program capitalization grant award is reduced similar to 2025, the division intends to subsidize the base program set-asides with IIJA set-asides as detailed below. The division may adjust the amounts estimated below for set-asides at the time of application, but reserves the full amount allowed (as indicated by the percentages in the headings) for each set aside if needed in this Intended Use Plan.

Administration and technical assistance set-aside (4%)

2026 IIJA funding - requested amount \$1,654,447

This is to support ongoing administration of the fund and may also support technical assistance to public water systems (established if Colorado opts to submit an EPA-approved technical assistance work plan). Colorado estimates taking the required amount to supplement any cuts to the base capitalization grant as needed (the original 2021 base capitalization grant amount was \$21,735,000), and will reserve any remaining amount depending on the availability of match funds and the identified needs as the IIJA program is implemented.

Use of funds and expected accomplishments

Funds are used to cover administrative and technical assistance expenses related to projects and activities authorized under the Safe Drinking Water Act, including the provision of technical assistance to public water systems as identified in the EPA-approved work plan. This set-aside will support administration of the funding including but not limited to project management and review of all project submittals throughout the life cycle of a project. This includes the improvement and development of comprehensive program project management software as needed by the program to maintain effective oversight of all SRF requirements

related to the loan and project. Use of these funds for comprehensive program project management software is eligible as the software supports all program projects inclusive projects funded by the base DWRP and IIJA supplemental funding. A technical assistance work plan if one is developed may include but is not limited the following activities and outputs:

- Collaborate with EPA-supported technical assistance contractors regarding project development to assist drinking water systems in meeting the requirements for obtaining funding through the SRF.
- Collaborate and coordinate with other funding providers throughout the state to address project affordability.
- Coordinate with the efforts of the Safe Drinking Water Program regarding technical review, inspections, compliance, and enforcement to ensure that funding is directed to the identified issues of concern.
- Partner with drinking water technical assistance providers, associations, and other non-profit organizations to apply resources to assist systems of concern.

Small system training and technical assistance (2%)

2026 IIJA funding - requested amount \$675,000

This is to support ongoing training and technical assistance to small systems serving less than 10,000 people established in the EPA-approved work plan focusing on the capacity development strategy. Colorado estimates taking the required amount to supplement any cuts to the base capitalization grant as needed (the original 2021 base capitalization grant amount was \$21,735,000), and will reserve any remaining amount depending on the availability of match funds and the identified needs as the IIJA program is implemented.

Use of funds and expected accomplishments

Funds are used to provide technical assistance and training programs for small systems including but not limited to the following:

- Provide one-on-one water system training and technical assistance to small systems.
- Identify training needs (i.e. topics, locations, audience) using a variety of tools which include compliance and sanitary survey trends, operator test results, and the operator training framework.
- Coordinate training delivery with training partners.
- Create and provide basic operator training throughout the state.
- Identify and reach out to systems that would benefit from assistance and identify their capacity needs using a variety of tools (e.g. compliance and sanitary survey data, newly discovered systems).
- Prioritize systems to assist based on threat to public health, number impacted, and other factors.
- Coordinate assistance efforts with training partners.
- Track assistance efforts and system improvements made as a result of coaching.

- Program support tasks associated with drinking water contaminants of emerging concern.
- Maintain staff support related to training and assistance activities for small systems, including grant and contract management when activities are performed by a third party.

State program management (10%)

2026 IIJA funding - requested amount \$2,800,000

This is to cover the administration of the state Public Water System Supervision (PWSS) program established in the EPA-approved state program management work plan. Colorado estimates taking the required amount to supplement any cuts to the base capitalization grant as needed (the original 2021 base capitalization grant amount was \$21,735,000), and will reserve any remaining amount depending on the availability of match funds and the identified needs as the IIJA program is implemented.

Use of funds and expected accomplishments

A portion of this set-aside will be used to support staff in accomplishing Safe Drinking Water Act program requirements including:

- Data management system upgrades and maintenance.
- Improved system communication resulting in compliance progress and attainment.
- Effective program oversight, compliance assurance, enforcement, rule adoption, regulatory development, public water system assistance, and capacity development.
- Staffing for engineering, compliance assurance, compliance assistance, rule management, data management, enforcement, administration, sampling, SWAP support, sanitary surveys, program management, contract oversight, early rule implementation, training and technical assistance, and for implementing a capacity development strategy.
- Computer acquisition and employee expenses including furniture, vehicles, operational costs, and indirect costs.

Local assistance and other state programs (15%)

2026 IIJA funding - requested amount \$4,100,000

This is to provide assistance with five activities: capacity development programs, the wellhead protection program, source water protection activities (SWAP), SWAP land acquisition, and SWAP implementation. Colorado estimates taking the required amount to supplement any cuts to the base capitalization grant as needed (the original 2021 base capitalization grant amount was \$21,735,000), but will reserve any remaining amount depending on the availability of match funds and the identified needs as the IIJA program is implemented. The amount of the request below reflects up to 15% from the capitalization grant. However, no more than 10% may be allocated for any single activity. See the estimated requested amounts and targets below.

Capacity development (10%)

2026 IIJA funding - requested amount \$2,700,000

This activity is to assist new and existing systems to achieve and maintain technical, managerial and financial capacity as well as to support SWAP activities.

Use of funds and expected accomplishments

- Implement the Safe Drinking Water Program capacity development strategy.
- Support and maintain a source-water assessment and protection program (SWAP) which provides the public with information about their drinking water, emerging contaminants, and creates a way for the community to get involved with protecting the quality of their drinking water.
- Provide continued one-on-one water system training and technical assistance.
- Utilize system self-reported data and information as well as the list of enforcement actions and input from compliance staff to proactively identify trends that suggest a system might lack technical, managerial, or financial capacity and prioritize assistance efforts.
- Support and enhance the efforts of the Safe Drinking Water Program to monitor water system compliance via water quality laws and regulations to detect non-compliance and respond to violations quickly, fairly and consistently to limit the risk of harm to public health and the environment.
- Support and enhance the efforts of the Safe Drinking Water Program to conduct sanitary surveys of public water systems, review public water system designs for conformance with design criteria, prepare and distribute technical assistance materials and track system compliance with follow-up requirements.
- Collaborate with division staff to leverage and focus resources on systems with issues that are indicative of a lack of capacity. This may include but is not limited to disinfection, disinfection byproduct and/or radionuclide issues.
- Provide a Technical, Managerial, and Financial (TMF) evaluation for PWS receiving technical assistance to evaluate areas for improvement, help decision makers and operators to take a holistic view of their system, and document improvement over time
- Coordinate assistance efforts with training partners and division staff to ensure all aspects of TMF are being addressed and the system stays in compliance long-term
- Create opportunities for asset management improvement with every coaching visit regardless of the initial request of the system.
- Partner with drinking water technical assistance providers, associations, and other non-profit organizations to apply resources to assist systems of concern.
- Support collaboration among all drinking water systems, assist smaller systems in understanding their problems and potential solutions. Use performance-based approaches to develop training.
- Support and enhance the efforts of the Safe Drinking Water Program to promote treatment process optimization and provide training and recognition for surface water treatment facilities in Colorado.

- Support and provide comprehensive cooperation in inspections, enforcement, compliance assistance, and technical assistance coaching where possible; conserve resources where practical.
- Provide technical expertise and assistance to local watershed initiatives, local governments, and community and non-community drinking water systems in obtaining technical and financial assistance to develop, implement, and ensure long-term success of source water protection plans.
- Conduct technical, managerial, and financial capacity reviews for all new water systems and water systems applying for Drinking Water Revolving Fund loans to ensure these systems will operate into the future with fewer difficulties, be financially secure and managed with the best interests of the water users in mind.
- Enhance communication and collaboration with the Colorado operator certification program to ensure that available training services meet operator training needs and professional development goals. Identify and overcome barriers associated with cross-program work planning and coordination.
- Continue to foster partnerships through Colorado's water/wastewater agency response network and national incident management system initiative to promote security and all-hazards preparedness throughout the state's drinking water community.
- Maintain staff support related to the above activities, including grant and contract management when activities are performed by a third party.

Wellhead protection program (5%)

2025 IIJA funding - requested amount \$1,400,000

This activity is to delineate and assess source water areas for groundwater systems, produce new wellhead protection/source water protection assessment reports as necessary, and support development and implementation of local source water protection plans.

Use of funds and expected accomplishments

- Completion of new and/or revised ground water source water delineations.
- Evaluate emerging contaminant threats to drinking water sources.
- Enhanced groundwater susceptibility assessments to improve compliance.
- Improved ground water protection plans to minimize source contamination.
- Enhanced wellhead protection/source water assessment and protection data management.
- Enhanced community information and education.
- Assist public water systems with assessing, informing customers (if applicable), and reducing exposure from emerging contaminants.
- Improved data compilation and reporting.

- Financial and technical assistance to facilitate source water protection plans.
- Coordinate and perform community and non-community groundwater sanitary surveys.
- Perform drinking water design reviews and/or Level 2 assessments with consideration of source water protection.
- Provide technical assistance to public water systems concerning source water protection issues and how they may relate to proper water system operations.
- Compilation and reporting of the national source water protection measures to EPA via the Performance Accountability Report (PAR).

DWRF IIJA emerging contaminants funding

The IIJA is anticipated to include a funding allocation in FFY 2026 to Colorado of \$13.38 million (estimated based on the 2025 DWRF IIJA Emerging Contaminants award) to be applied to drinking water emerging contaminant projects.

Eligibility

- Entities and projects eligible for this funding must be eligible under the existing DWRF program and the primary purpose must be to address emerging contaminants in drinking water.
- All eligible projects for this allotment must be listed on the existing Appendix A Drinking Water Revolving Fund 2026 Project Eligibility List
- Eligible emerging contaminants include perfluoroalkyl and polyfluoroalkyl substances (PFAS), manganese, and contaminants on EPA's [Contaminant Candidate Lists](#). Additional eligibility details and requirements for this category are defined in the [EPA IIJA SRF Implementation Memo](#) dated March 8, 2022.

Requirements

- Application, prioritization, and approval for funding will be the same as the existing DWRF program.
- State match is not required.
- 100% of the capitalization grant amount, net of set-asides taken, will be issued as additional subsidization in the form of principal forgiveness and/or grants. At least 25% of these funds must be provided to entities meeting the DWRF IIJA Principal Forgiveness Eligibility Criteria, as confirmed by the authority board, or communities with populations less than 25,000.
- The authority board of directors may establish a maximum award amount based on program demand, which may include a maximum number of times an entity can access funding from this category. In times of high demand, maximum award amounts for principal forgiveness may be as low as \$0.
- Distribution of funding:
 - Twenty-five percent of funds from this category must go to communities meeting the DWRF IIJA Principal Forgiveness Eligibility Criteria, as confirmed by the authority board, or

communities with populations less than 25,000. Seventy-five percent of funds can go to any eligible borrower. Applicants with project costs exceeding a maximum award amount, if one is established by the authority board, exceeding available funds, or with project components unrelated to addressing emerging contaminants, may receive funds for the remaining project costs through the DWRf supplemental or base programs. Additional principal forgiveness may be available from the DWRf supplemental or base programs for applicants meeting DWRf IIJA Principal Forgiveness Eligibility Criteria or base program disadvantaged community criteria. Private non-profits are not eligible for IIJA principal forgiveness/additional subsidy.

Set-aside activities for DWRf IIJA emerging contaminants funding

Colorado may set aside up to 31% of the capitalization grant for non-project, or set-aside activities that are necessary to accomplish the requirements specifically for implementing Emerging Contaminants. It is the division's responsibility to determine the amount of funds necessary under each set-aside and to meet the obligations of the Safe Drinking Water Act and the provisions in the IIJA funding. The 2025 IIJA DWRf Emerging Contaminants appropriation was \$13,384,000 and 2026 appropriation is assumed to be the same. The division may adjust the amounts estimated below for set-asides at the time of application, but reserves the full amount allowed (as indicated by the percentages in the headings) for each set aside if needed in this Intended Use Plan.

Administration and technical assistance set-aside (4%)

2026 IIJA funding - requested amount \$328,825

This is to support ongoing administration of the fund and may also support technical assistance to public water systems (established if Colorado opts to submit an EPA-approved technical assistance work plan). Colorado intends to take the set-aside as needed whether or not a technical assistance work plan is submitted and approved.

Use of funds and expected accomplishments

Funds are used to cover administrative and technical assistance expenses related to projects and activities authorized under the Safe Drinking Water Act, including the provision of technical assistance to public water systems as identified in the EPA-approved work plan. This set-aside will support administration of the funding including but not limited to project management and review of all project submittals throughout the life cycle of a project. This includes improvement and development of comprehensive program project management software as needed by the program to maintain effective oversight of all SRF requirements related to the loan and project. Use of these funds for comprehensive program project management software is eligible as the software supports all program projects inclusive projects funded by the IIJA emerging contaminant funds. A technical assistance workplan if one is developed may include but is not limited the following activities and outputs:

- Collaborate with EPA-supported technical assistance contractors regarding project development to assist drinking water systems in meeting the requirements to obtain funding through the SRF specifically with regards to available Emerging Contaminants funding.
- Collaborate and coordinate with other funding providers throughout the state to address project affordability. This would include coordination with the EPA WIIN Emerging Contaminants in Small or Disadvantaged Communities (EC-SDC) grant program.

- Coordinate with the efforts of the Safe Drinking Water Program regarding communications, training, and understanding with regards to addressing emerging contaminants for projects that may receive funding.
- Partner with drinking water technical assistance providers, associations, and other non-profit organizations to apply resources to assist systems of concern.

Small system training and technical assistance

Not setting aside funding

State program management (10%)

2026 IIJA funding - requested amount \$950,000

This amount covers the administration of the state Public Water System Supervision (PWSS) program used to cover staff directly working on the implementation of emerging contaminants.

Use of funds and expected accomplishments

A portion of this set-aside will be used to support staff to accomplish Safe Drinking Water Act program requirements including:

- Data management system upgrades and maintenance related to emerging contaminants.
- Improved system communication resulting in compliance progress and attainment related to emerging contaminants.
- Effective program oversight, compliance assurance, enforcement, rule adoption, regulatory development, public water system assistance, and capacity development related to emerging contaminants.
- Staffing for engineering, compliance assurance, compliance assistance, rule management, data management, enforcement, administration, sampling, SWAP support, sanitary surveys, program management, contract oversight, early rule implementation, training and technical assistance, and for implementing a capacity development strategy related to emerging contaminants.

Local assistance and other state programs

Not setting aside funding

DWRF IIJA lead service line funding

The IIJA is anticipated to include a supplemental funding allotment in FFY 2025 to Colorado of \$32.8 million (estimated based on the 2024 DWRF IIJA Lead Service Line Funding award) to be applied to the lead service line replacement projects.

Eligibility

- Entities and projects eligible for this funding must be eligible under the existing DWRF program and be a lead service line replacement (LSLR) project or associated activity directly connected to the identification, planning, design, and replacement of lead service lines.

- All eligible projects for this allotment must be listed on the existing Appendix A Drinking Water Revolving Fund 2026 Project Eligibility List.
- Additional eligibility requirements for this category of funding are defined in the [EPA IIJA SRF Implementation Memo](#) dated March 8, 2022.

Requirements

- Application, prioritization and approval will be the same as the existing DWRF program.
- State match is not required
- 49% of the capitalization grant amount may be issued as additional subsidization in the form of principal forgiveness and/or grants. Additional subsidization may be provided to eligible entities that meet the DWRF IIJA Principal Forgiveness Eligibility Criteria, as confirmed by the authority board.
- The authority board of directors may establish a maximum award amount, which may include a maximum number of times an entity can access funding from this category, based on program demand; and loan interest rate and terms will be determined by the board based on market conditions. In times of high demand, maximum award amounts for principal forgiveness may be as low as \$0.
- Distribution of funding
 - Applicants with eligible projects meeting the DWRF IIJA principal forgiveness eligibility criteria may qualify to receive IIJA funds at a flat loan/principal forgiveness combination. Applicants with project costs exceeding a maximum award amount, if one is established by the authority board, exceeding available funds, or with project components unrelated to lead service line identification and replacement, may receive funds for the remaining project costs through the DWRF supplemental or base programs. Additional principal forgiveness may be available from the DWRF supplemental or base programs for applicants meeting DWRF IIJA principal forgiveness eligibility criteria or base program disadvantaged community criteria. Private non-profits are not eligible for IIJA principal forgiveness/additional subsidy.

Set-aside activities for DWRF IIJA lead service line funding

Colorado may set aside up to 31% of the capitalization grant for non-project, or set-aside activities that are necessary to accomplish the requirements specifically for implementing lead service line replacement. It is the division's responsibility to determine the amount of funds necessary under each set-aside and to meet the obligations of the Safe Drinking Water Act and the provisions in the IIJA funding.

The 2024 IIJA DWRF Lead Service Line appropriation was \$32,800,000 and the 2025 appropriation is assumed to be the same. The division may adjust the amounts estimated below for set-asides at the time of application, but reserves the full amount allowed (as indicated by the percentages in the headings) for each set aside if needed in this Intended Use Plan.

Administration and technical assistance set-aside (4%)

2026 IIJA funding - requested amount \$419,318

These monies support ongoing administration of the fund and may also support technical assistance to public water systems (established if Colorado opts to submit an EPA-approved technical assistance work plan). Colorado intends to take the set-aside if needed whether or not a technical assistance work plan is submitted and approved.

Use of funds and expected accomplishments

Funds are used to cover administrative and technical assistance expenses related to projects and activities authorized under the Safe Drinking Water Act, including the provision of technical assistance to public water systems as identified in the EPA-approved work plan. This set-aside will support administration of the funding including but not limited to project management and review of all project submittals throughout the life cycle of a project. This includes the improvement and development of comprehensive program project management software as needed by the program to maintain effective oversight of all SRF requirements related to the loan and project. Use of these funds for comprehensive program project management software is eligible as the software supports all program projects inclusive projects funded by the IIJA lead service line funds. A technical assistance workplan if one is developed may include but is not limited the following activities and outputs:

- Collaborate with EPA-supported technical assistance contractors regarding project development to assist drinking water systems in meeting the requirements to obtain funding through the SRF specifically with regards to available lead service line funding.
- Collaborate and coordinate with other funding providers throughout the state to address project affordability.
- Coordinate with the efforts of the Safe Drinking Water Program regarding technical review, inspections, compliance, and enforcement to ensure that funding is directed to the identified issues of concern.
- Partner with drinking water technical assistance providers, associations and other non-profit organizations to apply resources to assist systems of concern.

Small system training and technical assistance

Not setting aside funding

State program management (10%)

2026 IIJA funding - requested amount \$3,600,000

This amount covers the administration of the state Public Water System Supervision (PWSS) program used to cover staff directly working on the implementation of lead service line replacement.

Use of funds and expected accomplishments

A portion of this set-aside will be used to support staff to accomplish Safe Drinking Water Act program requirements including:

- Data management system upgrades and maintenance related to lead service line replacement.
- Improved system communication resulting in compliance progress and attainment related to lead service line replacement.
- Effective program oversight, compliance assurance, enforcement, rule adoption, regulatory development, public water system assistance, and capacity development related to lead service line replacement.
- Staffing for engineering, compliance assurance, compliance assistance, rule management, data management, enforcement, administration, sampling, SWAP support, sanitary surveys, program management, contract oversight, early rule implementation, training and technical assistance, and for implementing a capacity development strategy related to lead service line replacement.
- Technical and program support for lead service line inventories.

Local assistance and other state programs

Not setting aside funding

DWRF IIJA Principal Forgiveness Eligibility Criteria

An eligible applicant may receive IIJA funds with principal forgiveness in the DWRF IIJA Supplemental General Supplemental Funding, DWRF IIJA Emerging Contaminants Funding, and DWRF IIJA Lead Service Line Funding if:

1. Applicant qualifies as a base (existing) program disadvantaged community

OR

2. Applicant scores a sum of three (3) points using the below criteria:

1. Population loss or growth slower than the state's over 5 years (benchmark is 0.61%). (1 point)
2. Total possible score of 1 point
 - a. County-level job loss over 10-years. (0.5 points)
 - b. Counties with $\geq$ a 24-month average unemployment rate that exceeds the state's plus 1% (benchmark is 4.47%). (0.5 points)
3. Community Median Household Income is less than the State Median Household Income (benchmark is \$92,470): (1 point). Community Median Household Income that exceeds 125% of the State Median Household Income (benchmark is \$115,588) will lose one point (-1 point).
4. Rates compared to Median Household Income exceed the ratio of estimated annual median rates to state Median Household Income. Benchmarks are 1.35% for combined sewer and drinking water, 0.79% for water, and 0.56% for sewer. (1 point)

5. Project addresses removal of lead or emerging contaminants as these water quality contaminants contribute to environmental risk factors and health disparities. (1 point)
6. The percentage of the population within a community that identifies as minority is greater than 40%. (1 point)
7. The percentage of population within a community that is housing-burdened is greater than 50%. (1 point)
8. The percentage of the population within a community living under 200% of the poverty level is greater than 40%. (1 point)
9. Combined percent of population living under 200% of poverty level + percent of population over 65 years is greater than or equal to two-thirds of communities in the state (benchmark is 55.00%). (1 point)

Notes

- IIJA eligibility is subject to confirmation by the authority board.
- Eligible applicants must be an eligible entity under the existing DWRF program. Private non-profit entities are not eligible for principal forgiveness.
- The above criteria is applicable to 25% of DWRF IIJA Emerging Contaminants Funding.
- A community may be evaluated using place, block group, tract, or county-level data, or a combination. The criteria benchmarks listed above will be updated annually and the benchmarks shown may not reflect the most current benchmarks.
- Principal Forgiveness not to exceed amounts may be as low as zero and may differ between base program disadvantaged community and IIJA-eligible projects as determined by the authority board.

IIJA principal forgiveness eligibility determinations and timing

Eligibility for IIJA Principal Forgiveness (PF) will be determined when a project needs assessment is submitted, but is subject to confirmation by the authority board at loan approval. At times, the authority board may request further evaluation of eligibility when scoring does not appear to adequately reflect the intent of the criteria. Eligibility will be noted in the project needs assessment review letter. Loan applications received within 12 months of the date of the project needs assessment review letter will be eligible for IIJA PF, subject to not to exceed amounts as set by the authority board. Loan applications received after that period or that did not qualify during the initial determination will be evaluated again for PF eligibility.

For applicants that do not meet the IIJA PF eligibility criteria, a business case can be drafted and presented to the authority board after Pre-qualification or Project Needs Assessment submission. SRF project staff will work with the prospective applicant to determine the appropriate timing. If approved by the authority board, the loan application must be received within 12 months from the date of approval.

Fundable list and use of funds

The EPA requires the IUP to identify projects that are anticipated to be funded for which the total cost of assistance requested is at least equal to the amount of the grant being applied for. Appendix B - DWRf 2026 Base and IIJA Project Priority/Fundable List is a subset of projects that exist on the 2026 DWRf Appendix A - Project Eligibility List but may receive funding in 2026 because they have started the SRF application process or have applied for or recently received a loan. Since the IIJA provides additional funding specifically for lead service line (LSL) replacement and emerging contaminants (EC), the fundable list indicates which projects may receive funding in 2026 from the IIJA supplemental funds, IIJA LSL funds, and the IIJA EC funding. Projects on the Appendix B - DWRf 2026 Base and IIJA Project Priority/Fundable List may result in funding from both IIJA and base program funding. The fundable lists include a preliminary disadvantaged community status and preliminary priority point scoring score. However, those are strictly preliminary and subject to change based on additional information from applicants. It is important to note that any project on the 2026 DWRf Appendix A - Project Eligibility List is eligible to apply for funding in 2026. The fundable lists are intended to indicate what projects are more likely to be funded in the current year, and indicate to EPA that there is sufficient project demand to spend the EPA capitalization grants. Please note that the application, prioritization, and approval for funding through the IIJA is the same as the base DWRf program and is described in Pgs. 5-7 of this IUP. Appendix B is located in the appendices of this IUP.

In addition, the EPA requires the IUP to include a table identifying all funding sources and uses of funds that are available to the program. As the IIJA provides additional funding to the program in 2026, the sources and uses table includes the IIJA funding. The 2026 DWRf IUP Appendix E - Funds Available to the DWRf Loan Program is included in the appendices.

IIJA funding applicable provisions and additional requirements

All provisions promulgated through statute, guidance, or regulations issued by EPA for the implementation of the WPCRF and DWRf programs will remain in effect (e.g. American Iron and Steel and Davis-Bacon related prevailing wage requirements) unless they are inconsistent with the IIJA, capitalization grant conditions, or the requirements contained in the [EPA IIJA SRF Implementation Memo](#) dated March 8, 2022. The IIJA supplemental appropriations are federal funds and therefore all equivalency requirements apply to projects funded by IIJA.

The EPA IIJA SRF Implementation Memo includes the following other provisions

- 1. Equivalency:** IIJA supplemental appropriations are federal funds and therefore all equivalency requirements apply to IIJA capitalization grants.
- 2. Build America, Buy America Act:** IIJA creates the Build America, Buy America (BABA) Act domestic sourcing requirements for federal financial assistance programs for infrastructure, including the SRF programs. For more specific information on BABA implementation, please refer to the Office of Management and Budget's Build America, Buy America Act Implementation Guidance. EPA will issue a separate memorandum for BABA after the United States Office of Management and Budget (OMB) publishes its guidance. The American Iron and Steel provisions of both the CWSRF and DWSRF continue to apply.
- 3. Reporting:** States must use EPA's SRF Data System to report key IIJA project characteristics and milestone information at least quarterly. Additional reporting will be required through the terms and conditions of the

grant award. The Federal Funding Accountability and Transparency Act (FFATA) of 2010 requires SRF programs to report on recipients that received federal dollars in the FFATA [Subaward Reporting System](#).

4. Blending Funds and Cash Draws: States have the flexibility to craft single assistance agreements (e.g. loans) that contain multiple types of construction components and activities. These assistance agreements may commit funds from multiple IIJA capitalization grants and base program funds. Upon disbursement of funds, these assistance agreements may draw from both IIJA and base SRF capitalization grants for eligible project components.

5. Green Project Reserve: If provided for in the annual appropriation, the Green Project Reserve (GPR) is applicable to the IIJA capitalization grants for the corresponding fiscal year.

6. Inter-SRF Transfers: Per SRF statute and regulation, states have the flexibility to transfer funds between the CWSRF and DWSRF. Given IIJA's requirements, authorities, and narrower SRF eligibilities, states may only transfer funds between the specific IIJA appropriations in the equivalent CWSRF or DWSRF program. In other words, transfer of funds may occur between the CWSRF and DWSRF General IIJA capitalization grants and between the CWSRF and DWSRF IIJA Emerging Contaminants capitalization grants. Because there is no similar CWSRF appropriation to the DWSRF IIJA LSLR appropriation, no funds may be transferred from or to the DWSRF IIJA LSLR appropriation. States may not transfer IIJA appropriations to or from base appropriations.

- As authorized by Section 302 of the Safe Drinking Water Act the state may transfer up to 33% of the capitalization grant between the two revolving funds (DWRF and WPCRF). The SRF program reserves the right to transfer up to the statutory limit of 33% of the IIJA capitalization grants if needed to address the demands on the programs. Based on the lack of demand for WPCRF emerging contaminants funding, and in order to support higher demand for drinking water emerging contaminant funding, the SRF program expects to have completed the transfer of an estimated \$4,149,000 million (sum of 2022-2024 WPCRF IIJA emerging contaminants grants) in calendar year 2024. As of the drafting of this IUP, the necessary authority and all required approvals were obtained for the transfer and the program is applying to the EPA to transfer the funds. The transfer is from the WPCRF emerging contaminant fund to the DWRF emerging contaminant fund. The transfer helps balance the program demand so the DWRF fund can provide more emerging contaminant funding in 2026 and should not impact the overall ability of the SRF program to fund projects in the near or long term or have an impact on drinking water set-asides. No changes to payment schedules or binding commitments are anticipated. SRF stakeholders were notified of the state's intent to transfer funds and a stakeholder meeting was held on June 27, 2024, to discuss the transfer and answer stakeholder comments and questions. Transfers are deposited into the appropriate fund. Based on the statutory language approved by the Colorado State General Assembly in 2002 (ref. CRS 37-95-107.8 and 34-95-107.6), any transfer can be made from one account to the other with appropriate approvals. The SRF program ensures all transferred funds meet the federal compliance requirements including federal crosscutter compliance.

8. Recycled Funds: To the extent assistance recipients repay IIJA funds or provide interest payments to the state SRF program, those repaid funds and interest have the flexibility to be used for any SRF-eligible purpose. For example, repaid DWSRF IIJA LSLR funds are not limited to future LSLR projects and activities.

9. Potential State Match Flexibility: To support implementation of the SRF program, the Department of the Treasury has determined that State and Local Financial Recovery Funds under the American Rescue Plan Act

(ARPA) available for the provision of government services, up to the amount of the recipient's reduction in revenue due to the public health emergency, may be used to meet the non-federal match requirements of the DWSRF and CWSRF programs.

10. Federal Civil Rights Responsibilities, Including Title VI of the Civil Rights Act of 1964 is reviewed by the state to ensure requirements are met and applies to DWRF and WPCRF programs for both base and IIJA funding.

* Cash Basis

(a) Other sources include: Transfers from State Funded Direct Loan Program's Administrative Fee Account and from the Drinking Water Funding Account to cover administrative costs incurred at the beginning of the SRF program and advanced admin fee received at the closing of the issuance of the 2004AR refunding bonds to cover the cost of current and future administration of refunding bond issues. Beginning in 2014, this line item also includes investment income from certain preconstruction accounts.

(b) Beginning in 2008, certain DWRF grant administrative costs incurred by the Authority are being paid from funds transferred from the WPCRF administrative fee account.

(c) Other Program Grants include payments made to recipients of: (1) Planning & Design grants, (2) Flood Assistance grants (2014-2015), (3) Engineering Assistance (2021-).

(d) Other Uses: September, 2011 - March, 2015, administrative fee account funds were used to pay bond debt service for a bond issue affected by a shortage in investment interest income resulting from the early termination of the associated repurchase agreement. In September, 2015, DWRF administrative fee funds were used to call the remaining bonds, and as a result, no further administrative fee funds will be needed for this purpose (resulting in a savings of approximately \$0.1 million.)
